American Railroad Journal.

Saturday, September 26, 1868.

Stock Exchange and Money Market.

Money has been in very full supply, all through the week, and rates have been quoted quite easy for responsible borrowers at 3@5 per cent. on call, and 6½@7½ per cent. per annum in the discount form, as the governing figures. The speculative demand has been less urgent, both from the dealers in the public funds, and from the Stock and Gold Exchange firms. There has been fair average inquiry for accommodation on mercantile credits, which has been responded to with uniform promptness. The outflow of currency to the interior has been very moderate for the season, while we have heard of a few important receipts of legal tender from the interior, including, on one day, a sum of $200,000 in greenbacks by a prominent Government house. The U. S. Sub-Treasury has added two millions of dollars to its cash reserves, during the week, closing with an available balance of about 92¼ millions. The city banks have made an addition of $343,363 to their legal tender hoard, while they have reported a loss of $1,485,200 in specie, and $2,664,487 in their deposit line. They reduced their loan averages nearly a million, and slightly contracted their circulation. The city banks now hold a legal tender reserve of $63,772,700, against $74,051,548 on the 8th of August. Their specie hoard is now down to $14,765,742, against $24,784,427 on the 8th ult. Their deposits amount to $202,824,583, against $231,716,942 six weeks since. The loans of the banks are $271,252,096, against $284,147,708 August 8th. Their circulation is now $34,044,693, against $34,074,374 on the 8th of August.

The specie reserve of the city banks is now $14,665,742, against $8,617,498 same time last year. The city bank deposits are now $202,824,583, against $185,603,937 week ending Sept. 21, 1867. The legal tender reserve amounts to $63,772,700, against $57,709,385 same time last year. The circulation now stands at $34,044,693, against $24,056,442 same time last year. The loans are now $271,252,096, against $254,794,067 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $86,412,000 a day, against a daily average of $82,198,500 the preceding week, and $78,339,350 the week ending with Sept. 3, 1868. The current week's exchanges average about $95,000,000 a day. The city banks, last week, lost $1,485,200 of specie, and $2,664,487 of deposits, while they gained $343,363 of legal tender notes. They reduced their loans, $803,594; and their circulation, $92,233.

The New York Gold Exchange Bank reports for the week ending Saturday, the 19th day of Sept., 1868, the average amount of loans and discounts as $1,340,739; average amount of specie, $386,802; average amount of deposits, $1,119,717.

The Philadelphia Bank movement the past week shows a decrease in loans of $26,030; a decrease of $11,846 in specie; a decrease in legal tenders of $453,533; a decrease of $700,441 in deposits; and an increase of $6,857 in circulation. The Bank Clearings show an increase of $914,597 and the balances, an increase of $10,114.

The outstanding amount of coin certificates on the 1st of Sept., was $25,161,620, against $22,414,000 on the 1st of Aug., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $321,000, and retired $2,710,584 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during August, reached $9,075,920.

The U. S. Sub-Treasury receipts, week ending with Sept. 19, were $9,347,483, including $2,832,584 from customs duties; payments, $7,319,185, including $328,388 of coin interest; balance at the close of the week, $91,330,486, against $89,302,188, at the close of the preceding week, showing an increase of $2,028,298. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,141,463 including $495,000 from customs; and payments, $3,077,064, including $49,336 of coin interest; on Tuesday, receipts, $1,009,879 including $641,000 from customs, and payments, $1,113,276, including $28,000 of coin interest. The balance at the close of business on Tuesday stood at $92,291,486, against $90,261,836, a week previous; and $87,896,063, on Sept. 9, 1868. The aggregate receipts of the office from all sources to August, were $81,253,235; aggregate pay-

ments, $73,830,968. The balance on the 1st inst. was about 7¼ millions more than on the 1st ult., which amounted to $80,133,186.

National Bank notes to the amount of $91,500 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,790,376, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,941,349, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,849,027. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,921,700; and for the public deposits, $38,052,350—making a total of $379,974,050. The Treasury Department last week redeemed and destroyed $483,000 of worn and mutilated fractional currency, and issued $535,613 of new. The outstanding amount of fractional currency on the 1st of September was $31,802,218, against $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been up to a fair average, since our last, in both forms of excise and customs. The excises, last week, yielded some 4½ millions; customs at the port of New York, $2,832,584, and at the outports about $950,000 (in coin) more, making the grand total income for the week equal to about $10,184,700 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $45,500,000.

The Gold market has been much less confidently dealt in, since our last, and the price has receded from 144⅞ as the highest rate to 142⅛ as the lowest figures of the week. The offerings of Gold have been on a more liberal scale than the requirements of purchasers either on speculative account or for legitimate purposes; and the tendency of the premium has been downward. The export demand has been limited. The customs inquiry has been the main reliance of the market, for the absorption of the floating supply. It took an average of nearly half a million a day, last week, and this drain was enlarged to nearly $600,000 a day, through the first half of the current week. The available stock of Gold under the control of the Treasury Department at the close of last week was estimated at 75½ millions, against 71¾ millions the preceding week. The specie movement of the whole country in the fiscal year ending with June 30, 1868, has been officially given thus:

Exported from New York	$76,309,886
From Pacific and other outports	17,389,762
Total twelve months	$93,699,648
Less foreign specie received	13,535,083
Net outgo of specie, 12 months	$80,164,565

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $5,855,645, against $2,417,026 same time last year. The customs demand for Gold last week, averaged $472,097 a day; thus far, this week, it has been equal to $568,000 a day, or equal to a weekly aggregate of $3,408,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $106,728 and from California, $731,452 The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $87,060,193, against $91,669,655 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $31,239,632, against $22,605,470 in 1867, showing an increase thus far in 1868, of $8,634,162. The exports of specie, from this port, last week, were $646,890, against $179,222 same week last year; total, since Jan. 1, 1868, $65,998,946, against $41,494,472 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $328,388; since Jan. 1, 1868, $63,171,733, against $43,172,765. The specie exports from San Francisco, from Jan. 1, to Sept. 2, 1868, were $26,987,496, against $29,527,324 same time last year.

Government received $5,381,120 from customs at the port of San Francisco, from Jan. 1, to Aug. 22, against $4,890,948 same time in the preceding year.

The foreign exchange market has been dull and weak, most of the time that has elapsed since our last review, but toward the close, there was some revival of firmness in values on lighter offerings of prime bills, unaccompanied, however, by any notable improvement in the demand. Bankers' prime sixty day bills on London closed on Wednesday at 108½@108¾, and on Paris to 5.22½c.@5.18¾; sight bills on London to 108⅞@109⅛, and on Paris to 5.17½c.@5.16¼. The offering of produce bills has been comparatively light this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,599,006, against $3,425,523, same week last year; total, since Jan. 1, 1868, $120,294,772, against $133,572,340 in 1867.

Government securities have been in good investment demand on home and foreign account, since our last, and improved in price. The inquiry has been mainly from home investment buyers, who are withdrawing considerable amounts of the funded obligations, particularly of the later. Five-twenty six per cent. coin bearing bonds from the open market, thus perceptibly diminishing the floating supply. The foreign orders are running mostly in the Five-twenties of 1862 and 1867, the latter being daily more and more sought after for shipment. Little, if any speculation business is in progress at present. The 1862 Five-twenties sold as high as 115¼@115⅜ on Tuesday, under purchases to cover outstanding contracts for forward delivery, but receded ⅜@½ per cent. from these figures on Wednesday, under a less urgent call for the bonds. The general market closed with less buoyancy, the demand on Wednesday having been on a restricted scale for nearly all issues of the funded obligations.

U. S. sixes of 1881 closed here on Wednesday at 114⅛@114⅜; U. S. Five-twenties of 1862, 114½@114¾; U.S. Five-twenties of 1864 at 108⅛@110¼; U. S. Five-twenties of 1865 at 111⅛@111¼; U. S. Five-twenties of 1865, consolidated, 109@109⅛; U. S. Five-twenties of 1867, 109@109⅛; U. S. Five-twenties of 1868, 109@109⅜; U. S. Ten-forties at 104¾@105; U. S. Six per cent. currency bonds, 100@100½. The brokers are buying the outstanding October 1865 compound interest notes at 118¾@119.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 9.	Sept. 16.	Sept. 23.
Consols	94⅛	94⅛	94¼
U. S. 5-20's of 1862	72	72¾	73⅛
Erie	30½	30¼	32
Ill. Central	91	91	91½

The railway and miscellaneous share speculation opened quite spiritedly at rapidly advancing prices; but the later dealings were on a less confident basis and the general market closed weak and feverish the investment inquiry having fallen off considerably.

General business has been on a rather more active scale, in both the produce and merchandise lines. Breadstuffs and Provisions have been quoted lower. Cotton has been quite variable, but closed weak and drooping. Middling upland cotton was dull and heavy on Wednesday at 26 cents per lb. The stock of cotton now here is estimated at about 12,500 bales. The receipts at the port this week, have averaged about 1,525 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 36,500 bales, against 18,500 bales same time last year; exports, same time 6,500 bales, against 8,450 bales same time last year; stock on hand at latest dates, 52,500 bales, against 77,500 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales At the Live Stock market, this week, Beeves have been fairly active at from 11@17c. per lb.; week's receipts, 6,920. Veal calves in moderate demand at from 7½@12c. per lb.; receipts, 1,470. Sheep and lambs in more request at from 4¾@7½c., and 8@9c., respectively, per lb.; receipts, 37,878. Swine less active at from 9½@10¾c. per lb., all live weight; receipts, 17,716. Foreign merchandise has been generally firm in price. Groceries have been more freely dealt in, sugars have advanced. Dry Goods have been fairly active; dress fabrics have been selling advantageously. The total imports of foreign dry goods, last week, were $2,298,940, and the total amount marketed $2,609,247. The value of foreign merchandise imported last week, was $3,314,235—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,613,175, against $4,726,415 same week last year; from Jan. 1, 1868, $185,085,419, against $196,510,493 same time in 1867. The freight market has been quoted much firmer, on a moderately active business. For Liverpool we quote flour at 1s. 9d. by sail, and 2s. by steamer, per bbl.; grain at 6½s. 7d. by sail, and 7½@7¾d. by steamer, per bushel; cotton at $\frac{5}{32}$d. by sail, and $\frac{3}{16}$d.@¼d. by steamer, per lb.; and heavy goods at 15s.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 557.

The New York exports, exclusive of specie, for the week ending Sept. 22, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,425,523	$2,599,006
Prev. reported	130,146,817	117,695,766
Since January 1	$133,572,340	$120,294,772

The imports for the week ending September 19, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,846,197	$2,298,940
Gen. merchandise	2,880,218	3,314,235
Total for the week	$4,726,415	$5,613,175
Previously reported	181,169,890	177,182,348
Since January 1	$185,896,305	$182,795,523

The balance in the Sub-Treasury on Wednesday was $92,699,872 30.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Col., Chi. and Ind. Cent. 1st mort., 80¼; Toledo, Peoria and Warsaw 1st mort., E. D., 86; do., W. D., 84¾; Chicago and Milwaukee 1st mort., 90; New York and N. Haven 6s, 96½; Chicago and Gt. Eastern R. R., 40; Stonington R. R., 83; Dubuque and Sioux City pref., 93; Hannibal and St. Joseph pref., 89½; Georgia 7s, 91; do., 6s, 81; N. Y. ☞ COLUMBUS, CHICAGO AND INDIANA CENTRAL RAILROAD COMPANY SINKING FUND FIRST MORTGAGE 40 YEARS 7 PER CENT. COUPON BONDS. INTEREST PAYABLE APRIL AND OCTOBER, IN THE CITY OF NEW YORK.

The road is about 600 miles in length, with unsurpassed connections, passes through the most populous and richest agricultural sections of the States of Ohio, Indiana and Illinois, and its traffic receipts, it is believed, will prove ample in any contingency, not only to provide for the prompt payment of its interest and other liabilities, but also for satisfactory dividend to its stockholders.

The bonds can be registered at the office of the company in New York.

Parties desiring to invest in these bonds can obtain the same, together with any further information that may be desired, on application to the undersigned.

WM. R. FOSDICK,
At St. Nicholas National Bank, No. 7 Wall st.
U. A. MURDOCK,
At Continental National Bank, No. 7 Nassau st.
JNO. A. ISELIN & Co.,
No. 66 Wall st.

☞ PRINCIPAL AND INTEREST IN GOLD. THE FIRST MORTGAGE FIFTY YEAR SEVEN PER CENT. SINKING FUND COUPON BONDS of the Rockford, Rock Island and St. Louis Railroad Company, principal and interest payable in GOLD COIN, *free of Government tax*, are for sale at the office of the Company, No. 12 Wall street, at 95 per cent. and accrued interest in currency.

At the present price of gold the bonds pay an income of over ten per cent.; and, in the estimation of the Company, they are the cheapest first-class security offered in the market.

Pamphlets giving further information may be had at the office.

Government and other securities received in exchange at market rates.

H. H. BOODY, Treasurer.

☞ CENTRAL PACIFIC RAILROAD SIX PER CENT. THIRTY-YEAR GOLD BONDS.—A limited quantity of these bonds will be disposed of at 103 and accrued interest from July 1, in currency. The road will be completed within twelve months, and is now earning, above operating expenses, more than double its current interest liabilities. Principal and interest payable in United States gold coin. Government securities received at market rates in exchange.

FISK & HATCH,
Bankers and Dealers in Government Securities,
No. 5 Nassau-st., New York.

☞ A temporary organization of the Louisville, Harrodsburg and Virginia Railroad has been made with S. B. Buckner as President, and W. B. Hoke Secretary and Treasurer. Subscription books have been opened at Louisville and other points on the route as far as Harrodsburg, and H. M. Patton, a competent engineer of Virginia, is on the route making a reconnoisance from Harrodsburg on a direct line to Wythville, in Virginia.

The Bessemer Process.

PRODUCTION OF CHEAP STEEL IN AMERICA.—COMPLETION OF THE GREAT WORKS AT TROY.—DESCRIPTION OF THE VARIOUS BESSEMER WORKS IN THIS COUNTRY.—THE NATURE AND VALUE OF THE IMPROVEMENT.

Continued from page 913.

The Freedom Iron and Steel Works, at Lewiston, Pa., were the fourth Bessemer works started in this country, and are now producing steel forgings and ingots for rails. The Bessemer plant consists of a pair of five ton converters and apparatus, on the English plan, and mostly built in England. The blowing engine is vertical, and was built by Messrs. I. P. Morris & Towne, in Philadelphia. The iron is melted in cupolas. The works are equal in quality to the best in England. A very heavy plate mill, driven by a Ramsbottom reversing engine, is completed, and a rail mill and a crucible steel works are in progress. A tyre mill and eight hammers of different sizes are in operation. The iron tyres and other products of the Freedom Iron Works are well known. The company also runs four charcoal blast furnaces, and owns some forty-five thousand acres of woodland, and extensive mines of ore, much of which is suitable for Bessemer pig.

The Cleveland Rolling Mill Company's Bessemer Works, at Newburgh, six miles from Cleveland, Ohio, are nearly completed, and will be running within a month. They are connected with the company's present furnaces and rolling mills, and are situated between the lines of the Atlantic and Great Western and the Cleveland and Pittsburg Railways. On both these lines, within sixty miles, are large deposits of bituminous coal, of various qualities. Cleveland is the principal outlet of the iron and ores of the Lake Superior region, most of which are well adapted to Bessemerising. The best raw coal and coke irons in this country, are made within a circuit of seventy-five miles from the works. Railway supplies for the West and Northwest, and lake and manufacturing machinery, are already furnished largely by the various iron works in the region, and there are few, if any, better points for the manufacture and supply of steel rails and products.

The arrangement of the Bessemer works is substantially the same as that of the Pennsylvania Steel Works, but has been somewhat modified by Mr. H. Gmelin, the engineer in charge of construction. The converting house is one hundred and twenty-four feet by seventy-five feet; the engine house, eighty-three by thirty-four feet; the boiler-house, eighty by fifty-six feet; and the melting-house, one hundred and twenty-four by fifty-eight feet. They are all of brick, with iron and slate roofs. The converters are wrought iron, of five tons capacity. The ingot cranes have no top supports. Two have twenty-two feet jibs, and one has a seventeen foot jib. The ladle crane is turned, and the ladle is moved radially, and rotated by hand-gearing. The blowing engine, horizontal and non-condensing, has two thirty-six inch steam cylinders, and two fifty inch air cylinders, five feet stroke, and a twenty feet fly wheel, of twenty-five tons weight. The water pressure engine has two fourteen inch steam cylinders, and four four-inch water cylinders, and discharges into an accumulator. The boilers, eight in number, are twenty-six feet long, by four feet in diameter, with two return flues. The stack is one hundred and twenty feet high, and twenty-five feet square at the foundation. The machinery foundations are very substantial, being built of large stone found near the works. All the machinery, except one converter, was built by the Cuyahoga Steam Furnace Company in Cleveland.

The lower floor of the melting house is used for drying-rooms for ladles, &c., and the mixture and storage of fire materials. The second floor is of iron girders and brick arches, and sustains two six-ton reverbatory melting-furnaces, and two similar small furnaces for the recarburiser, and has room for two more large furnaces and four cupolas.

The adjoining rail-mill contains a three-high twenty-one inch train, driven by a forty-inch four feet horizontal engine, with a twenty-four feet fly-wheel, weighing forty tons. The two blast furnaces are forty-eight feet high, and twelve feet at the boshes. They work Lake Superior ore by the celebrated Briar Hill coal, into pig suitable for steel making. The Bessemer works are under the superintendence of Mr. John C. Thompson, late Assistant Superintendent of the Troy works.

The Wyandotte Steel Works, owned by E. B. Ward, and connected with his extensive iron works, were the first Bessemer works started in this country. The experimental machinery has been replaced by a permanent plant, which is not yet in full operation.

The National Iron Armor Company, at Chester, Pa., have built a Bessemer building and rolling mill—well constructed buildings of brick and iron, and well located on tide water and railway. Their machinery is being constructed by Messrs. Reaney, Son & Co., at Chester.

The Cambria Iron Company, are adding a Bessemer plant substantially like that of the Pennsylvania Steel Company, to their works at Johnstown, Pa., already the largest iron works in America. The Bessemer department will be under the management of Mr. R. W. Hunt, and the plant will be built (the machinery mostly at the company's works,) by Mr. Goerge Fritz, chief engineer of the company, which guarantees their success.

CONCLUSIONS.

The vast importance of the Bessemer manufacture, its success all over the world, the rapidity of its development, and the revolution it has created in the great practical problem of the age—cheap iron—render it the most remarkable, if not the most splendid achievement of modern times. The capital invested is estimated by tens of millions, and the saving to railway companies and to the uses of machinery, by hundreds of millions—and yet it is but twelve years since Mr. Bessemer took out his principal patent. Nearly a century had elapsed since any great stride had been made in the production and alloying of iron, and the time was ripe for the Bessemer process. But the Bessemer process, the locomotive, the sewing machine and all inventions that ameliorate the condition of the race, have not repressed cognate enterprises, nor lowered the condition and pay of labor. Every branch of human industry has been stimulated by them, and even the "pauper labor of Europe" is beginning to feel their elevating influence.

Now that the Bessemer process is an established success in this country, its rapid developments, and, in American hands, its rapid improvement, are assured. But its first introduction, with all the embarrassments of unused materials and labor, was not an easy task, nor one likely to be overtaken by men of narrow views. Capital is ready enough to take hold of an established business, and to stand back when heavy risks and patient experiment are required. The enterprises that set the world ahead are conducted upon higher and more humane principles than mere greed; and something more is due from the public to their projectors than the mere pecuniary compensation they sometimes earn. It is a matter of general satisfaction that Mr. Bessemer's labors have been nobly rewarded in money and in honor. We believe that similar recognition awaits, in this country, the pioneers of the great enterprise we have described, and that it will be gladly awarded to our distinguished townsman, to whom more, perhaps, than to any other person, we owe the Monitor fleet and the establishment here of the Bessemer process.

☞ The contract for building the Cairo, Mound City and Vincennes Railroad has been let to Messrs. Lloyd, Morris, Dodds and Stein.

☞ Work has been commenced on the railroad between Waterloo and Magog. The intention is to grade the road to Stukely Mills this fall.

Journal of Railroad Law.

LIABILITY OF RAILROAD FOR NEGLIGENCE OF ENGINEER—CONDUCTOR OF PRIVATE FREIGHT CARS—WHEN A PERSON, DETAILED FOR SPECIAL SERVICE, CEASES TO BE SUCH AND BECOMES A PASSENGER.

The case of Myers *vs.* Cumberland Valley R. R. Co., [55 Penn. st. 288], was an action on the case brought by Nicholas A. Myers, against the Cumberland Valley Railroad Company, for injury received by the plaintiff, as he alleged, by the negligence of the defendants' agents.

The plaintiff was the conductor on the freight train of Henderson and Myers, and on the 4th of February, 1860, the defendants were, by their engine, drawing these cars. Immediately behind Henderson's were cars belonging to Mr. Bryson, which were to be delivered at his switch at Mechanicsburg. There was evidence that at the request of the company's conductor of the train, Myers consented to cut Bryson's cars loose at Mechanicsburg. When the train came to the place where the cars were usually cut loose, the engineer slackened the speed, and Myers, on a signal from Bryson's conductor, who was on the hinder part of Bryson's cars, drew the bolt which coupled the cars, and gave a signal to the engineer, who moved on. Myers was thrown off, and Bryson's cars, coming up of their own speed, ran over and injured him. There was evidence also that the engineer "jerked suddenly, more so than usual," that the engineer "was more reckless than other engineers," that he did not answer Myers' signal which is usually done on other roads; but seldom on the defendants' road.

The decision of the court was delivered by AGNEW, J.—The question now presented is not the same as it was when this case was here before. The error which the court below then fell into was in instructing the jury in substance that the plaintiff could recover: notwithstanding his own fault, want of skill or awkwardness, and notwithstanding there was no negligence or unskilfulness on the part of the engineer, if the mode of detaching the cars was unnecessary and a useless exposure of person. But on the second trial the judge avoided these objections and answered all of the defendants' points in the affirmative without qualification; excepting the last point, which was qualified by instructing the jury that if the injury was not caused by the drawing of the bolt, but by the negligence or misconduct of the engineer in increasing the motion of the cars with a violent, unnecessary and unusual jerk, such as the plaintiff could not have anticipated, and if this occurred after Myers had resumed his proper position on the platform of his car, the plaintiff might recover. We discover no error in this qualification. Myers was requested by the conductor of the train to cut loose Bryson's cars at his station, by drawing the coupling bolt. The engineer slackened the speed of the train; and after drawing the bolt, Myers stepped to the side of the car with it in his hand, and held it out, showing it to the engineer, to let him see that the cars had been cut off. The engineer who was proven to be a quick, impulsive and somewhat reckless man, suddenly let on steam, started the train with a violent jerk into quick motion, which threw Myers off upon the track, where he was overtaken and badly injured by the cars following up their own speed. Clearly it was a question o

fact for the jury to decide whether Myers at this time had fully accomplished the special duty he had undertaken to perform, and had resumed his position upon the platform of his own car, and whether being in this position his being thrown off and injured was caused by the negligent act or misconduct of the engineer. Assuming according to the former opinion that Myers took upon himself the risk of the act he undertook to perform, there is nothing in this case demanding him to be held to very strict presumptions. He did an act of mere accommodation at the request of the conductor without hire or reward, and as soon as he had performed it and resumed his proper position as a passenger on the train he became entitled to the protection which such a relation gave him, and a jury would not be called on to discriminate against him with an unfriendly eye. If satisfied upon the evidence that the injury was caused by the misconduct of the engineer after he had substantially performed the duty and resumed his position, the railroad company, and not he, should suffer for the mismanagement of the train by their own employees.

The judgment is affirmed.

Louisville and Frankfort & Lexington and Frankfort Railroads.

We give elsewhere a detailed statement of the earnings and expenditures of these roads for the fiscal years ending June 30, 1867 and 1868. The following is a recapitulation:

	1866–'67.	1867–'68.
Earnings	$510,619 02	$493,218 93
Expenses	357,101 90	335,971 87
Net	$153,217 12	$157,247 06

The aggregate earnings and cash receipts for the two years under review have been $1,003,537 95; and the expenses, $693,078 77—leaving as the aggregate net earnings of both roads for the years named, $310,464 18. Deducting from the expenses the sum of $55,184 80 (being decrease in amount of material used from the stock of supplies on hand,) will leave the actual cash expenditures, $637,888 97, and the actual net cash receipts, $365,648 98. These have been disposed of as follows:

Paid Louisville & Frankfort R. R. Co.	$122,313 77
Paid Lexington & Frankfort R.R. Co.	52,690 80
Paid Cincinnati Branch Fund	190,644 41
Total, as above	$365,648 98

The receipts of the Louisville and Frankfort R. R. Co. from all sources for the year ending June 30, 1868, were:

Received from the L., C. & L. R.R., in part net earnings	$103,838 73
Bills receivable—amount received on account	4,486 35
Cash on hand in N. Y. July 1, 1867	2,842 00
Cash on hand July 1, 1867	3,281 91
	$114,448 99

Expenditures, viz:

Preferred joint stock dividends No. 2 and 3	$66,405 00
Interest account	17,551 66
General expense account	2,094 55
Taxes—Municipal, State & National.	6,965 29
Redemption of bonds	12,000 00
Cash in New York	2,699 50
Cash dividends paid	2,891 45
Cash on hand	2,819 78
Bills receivable—charged off	1,021 76
	$114,448 99

The financial condition of the company June 30, 1868, was as follows:

Capital stock	$1,109,594 40
Railroad bonds, due 1869–'78	108,000 00
City of Louisville bonds, due in '81.	100,000 00
Loan from State of Kentucky for right of way on perpetual credit at 6 per cent	74,519 50
Cash dividends unclaimed	4,538 21
Profit and loss	185,179 59
	$1,581,831 70
Construction	$1,532,644 99
Real estate	33,235 10
Bills receivable	1,932 33
Stock in other companies	8,500 00
Cash in New York	2,699 50
Cash on hand	2,819 78
	$1,581,831 70

The receipts of the Lexington and Frankfort R. R. Co. from all sources for the year ending June 30, 1868, were:

Received from L., C. & L. R.R. in part net earnings	$45,700 00
Sale of 13 bonds L. & F. R. R. Co	13,000 00
Rents, etc	136 38
Cash on hand, July 1, 1867	7,186 02
	$66,022 40

Expenditures, viz:

Railroad bonds due in 1869 redeemed	$19,000 00
Interest	2,182 00
Insurance and tax	1,715 31
Government tax on dividends, etc.	2,523 30
Contractors bond	50 00
Cash dividends paid	312 71
Joint stock dividends paid	30,878 76
General expenses	217 04
Cash on hand, July 1, 1868	9,140 28
	$66,022 40

The financial condition of the company June 30, 1868, was as follows:

Capital stock	$514,646 42
Railroad bonds due 1869–'74	44,000 00
Cash dividends unpaid	1,477 22
Joint stock dividends unpaid	1,732 14
Renewal and contingent fund	35,296 72
Stock profits	66,242 94
Sinking fund	10,000 00
Profit and loss	8,266 97
	$681,662 41
Construction	$654,265 87
Bills receivable	1,266 44
Bonds receivable	4,000 00
Stock in other companies	1,500 00
Preferred joint stock	1,732 14
Real estate	9,255 80
E. D. Sayre, Treasurer	602 88
Cash on hand	9,140 28
	$681,662 41

Vermont and Massachusetts Railroad.

As a special meeting of this company on the 19th inst., a resolution was passed authorizing the directors to accept a lease or transfer, for a limited time, or perpetually, from the Turner's Falls Branch Railroad Company of all their property, rights and franchises under acts of the Commonwealth of Massachusetts of 1866, chapter 41, and acts of 1868, chapter 33, on such terms and under such arrangements as they may see fit to make. And in case such transfer is made, the directors are authorized to locate and build a railroad under the same, as soon as they shall be of opinion that the public interests and convenience shall require it. And they are further authorized for the purpose of locating and constructing the road, to use the income of the company, or to borrow money therefor.

☞ NORTH MISSOURI RAILROAD FIRST MORTGAGE 30 YEARS 7 PER CENT. BONDS, INTEREST PAYABLE JANUARY AND JULY, AT THE NATIONAL BANK OF COMMERCE IN NEW YORK.

The road is completed and in operation from ST. LOUIS to BRUNSWICK, on the Missouri River, and to ATLANTA, in Northeast Missouri, 242 MILES.

The entire length of road, which will be completed in NOVEMBER, OF THIS YEAR, 382⅛ MILES.

Amount in actual cash expended in construction to date, $11,340,000.

The only lien upon the Road is this First Mortgage of Six Millions, and which is LESS THAN $16,000 PER MILE.

This road connects with the Union Pacific at Kansas City, already completed westward 350 miles, and with the Iowa Central and the Cedar Rapids Railroads in Iowa, forming by the Iowa Central a direct connection with St. Paul, and by the latter with Dubuque. It runs through the choicest agricultural and coal lands in the State of Missouri, and by its Iowa connections will have the finest and most populous portions of Iowa and Minnesota tributaries to it. The road now completed is constructed in the most substantial manner.

We recommend the above loan as an undoubted security and are authorized to offer a limited amount of the Bonds at 83½ and accrued interest, For the character of the security we refer by permission to

R. LENOX KENNEDY, New York.

Messrs. E. D. MORGAN & CO., New York.

JAMESON, SMITH & COTTING,
16 WALL ST., NEW YORK.

Kansas and Neosho Valley Railroad.

The capital stock of this company has been increased $5,000,000, and the President is authorized to issue mortgage bonds upon the road to that amount. The following directors have been elected for the ensuing year: Nathaniel Thayer, H. H. Hunnewell, Sidney Bartlett, W. B. Weld, and J. H. Burnham, of Boston; James F. Joy, of Detroit; K. Coates, of Kansas City; J. T. Burris, of Glathe; W. R. Wagstaff and B. F. Simpson, of Paola; Benjamin McDonald of Fort Scott.

Taxes and Valuation of Portland.

The Assessors of Portland, Me., have made up the tax list for 1868. The valuation is $28,565,522; real estate, $16,186,900; personal estate, $12,378,622. The rate of taxation is $2 50 per hundred. Number of polls, 7,737. The valuation of 1867 was $28,313,845; real estate, $14,951,500; personal estate, $13,362,345. The rate of taxation was $2 45 per hundred. Number of polls, 7,288.

Atlantic and St. Lawrence Railroad.

The city council of Portland, at their regular monthly meeting on the 17th inst., voted to redeem certain Atlantic and St. Lawrence Railroad bonds by issuing new bonds for the purpose, the road guaranteeing the city against loss of discount and other expenses.

The road is not able to pay the sum that will be due at an early day. The bonds to be redeemed are those authorized by the acts of Aug. 1, 1848, and July 15, 1850. The act of March 3, 1868, authorizing the redemption of the bonds by the city, was accepted by the Council, and is the basis of authority under which their action takes place.

☞ The Shamokin *Herald* says that the contract for building a road from Locust Dale to the breaker about being erected by Mr. R. B. Douty, near the town of Helfenstein, has been let to Thomas Reilly. The work will be commenced immediately, and is to be completed by January, 1869. The road will connect with the Mahanoy and Broad Mountain, and will be six miles in length.

☞ A meeting of citizens of Omaha and delegations from St. Louis and other points was held in Omaha on the 21st inst., at which the subject of building an air line railroad from Omaha to St. Louis was fully discussed. Speeches favoring the project were made by prominent citizens of each city. Omaha gave assurances that she would furnish as much money for the enterprise, in proportion to her taxable property, as St. Louis.

☞ The contract for grading and bridging the Junction and Breakwater Railroad to Lewes, Del., has been given to a company from Pennsylvania for $32,125 in cash, and $10,000 in stock. The work will be completed in January.

☞ At a meeting of the stockholders of the Atlantic and Great Western Railway, in this city, on the 21st inst., resolutions were passed authorizing an issue of $7,000,000 of second mortgage consolidated bonds.

☞ Contracts have been let for building the St. Louis and St. Paul Railroad, from Ackley on the Dubuque and Sioux City Railroad, to Hampton, the county seat of Franklin, about fifteen miles to the northwest.

☞ It has been decided to commence work on the line of the Winona and St. Peter Railroad, between Waseca and Janesville, and the grading will be continued to St. Peter during the next winter and spring.

☞ Contracts for the grading, masonry and bridging on the first division of the McGregor and Sioux City, R.R. extending from Calmer to Charles City, have been let, and work is to commence immediately.

☞ The St. Clair (Mich.) *Republican* says that two hundred men are at work on the Air Line road between Ridgeway and Romeo. The route is level and easy to grade, and good progress has already been made.

PROPOSLAS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., September 14, 1868.

SEALED PROPOSALS will be received at the Office of the Company in Oneida, N. Y., until the 30th day of October, 1868, at noon, for the GRADING, MASONRY and BRIDGING of that portion of the New York and Oswego Midland Railroad, extending from Sidney Plains to the village of Walton, in Delaware County, a distance of about 22 miles. Also, for that portion of the line from Westfield Flats to Centreville, in Sullivan County, a distance of about 25 miles.

Proposals will also be received at the same time and place, for the Grading, Masonry and Bridging of the Delhi Branch, extending from the Main Line at Walton to Delhi, in Delaware County, a distance of about 16 miles.

The company will entertain separate proposals for Bridging only, both on the Main Line and Branch.

Plans, Profiles and Specifiations will be ready for examination at the office of the Resident Engineer, in the village of Walton, for that portion of the line in Delaware County, including the Delhi Branch, on and after the 20th day of October next, and also at the office of the Resident Engineer in Middletown, Orange County, for that portion of the line in Sullivan County, at the same date.

Contractors who may desire to examine the work will receive all necessary information at the respective offices of the Resident Engineers above named.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer. 5t39

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

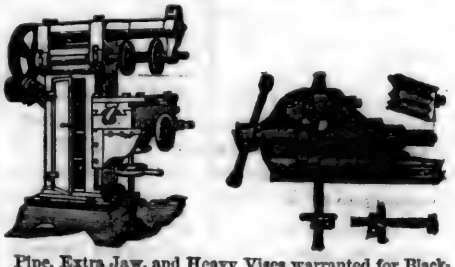
We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.



Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,
69 & 71 Broadway, New York.

UNION VISE COMPANY,
61 Water Street, Boston, Mass.

Pipe, Extra Jaw, and Heavy Vises warranted for Blacksmiths' and heavy work. New style Wood Vise. Covered Screw Vises—Forty styles and sizes constantly on hand. Standard Milling Machines—simple, easily adjusted, great capacity, power and strength—three sizes: large, 2,300 lbs.; medium, 1,600 lbs.; small, 950 lbs. For sale by the trade.

G. H. NOTT, Pres't.
A. H. BRAINARD, Supt.

Godeffroy Brancker & Co.
42 Exchange Place, New York,

are prepared, as Sole Agents in the United States for the Prussian Mining and Iron Co., of Duisburg, Westphalia, to contract or sell in quantities to suit purchasers (delivered in either New York or Philadelphia) the celebrated

V. H. SPIEGELEISEN

used so extensively for the manufacturing of

Bessemer Steel.

This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,

STEEL RAILS

Manufactured by
G. ARNDT & CO.,

of Dortmund, for which latter firm they also have the Sole Agency in the United States.

For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m36

800 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **102**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
SEPT. 14, 1865.

Intercolonial Railway!

TO CONTRACTORS.

THE Undersigned is instructed by the Government of Canada to inform intending Contractors that at an early day orders will be invited for the execution of certain portions of the INTERCOLONIAL RAILWAY, between River du Loup and Rimouski, in the Province of Quebec, between Truro and Amherst, in the Province of Nova Scotia, and between Dalhousie and Bathurst, in the Province of New Brunswick.

It is intended to let the work in Sections or Divisions, ranging from 15 to 35 miles, according to the situation and local circumstances.

The surveys are now in progress, in part completed, and the object of this notice is to afford intending contractors ample opportunity of examining the ground at once.

The Plans, Profiles, Specifications, Conditions of Contract, Forms of Tender, and other documents required for the information and guidance of Contractors, are now being prepared, and when ready, of which due notice will be given, will be seen at the Railway Engineer's Office, in Halifax, St. John, Dalhousie, Rimouski, River du Loup and Ottawa.

SANDFORD FLEMING,
Chief Engineer.

The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.
☞ *All orders will receive prompt attention. Samples sent on application.*
PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.
MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.
The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.
AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*
I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.
I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York Saturday, October 3, 1868.

Union Pacific Railroad.

The Union Pacific Railroad Company have just published a pamphlet replete with important information touching the present and future of this great marvel of engineering skill. Opposite the title page is a map clearly defining the route of the road, and its pages throughout are illustrated by vignettes, in excellent taste, both in design and engraving. The pamphlet treats on the progress of the work and its character; the agricultural resources of the region through which it passes, and its mineral wealth. And gives interesting figures showing the present and prospective earnings of the road, its profit to the Government and the entire country. The cover is very attractive; its medallion centre is occupied by two female figures with clasped hands, representing the union of the East and West. Around and about them are the implements of husbandry and the arts, and in the distance the great slaves of commerce by land and sea—the steamboat and the railroad engine. The East is clad in flowing silk and adorned with jewels; the West in severe simplicity of garb, carries the wand, surmounted by the cap of liberty; a cornucopia lies between them.

Wharton's Safety Railroad Switch.

We invite attention to the advertisement of this Switch in another portion of our paper. The chief feature of this Switch is that by its use the continuity and solidity of both rails of the main track are entirely undisturbed; and therefore switches, so far as the main track is concerned, are entirely dispensed with. The great saving effected in the wear and tear of both rails and rolling stock, as well as the perfect protection it affords to trains traversing the main track in case the switch is by accident left wrong, should not be overlooked by railroad companies.

The Philadelphia and Reading Railroad Company, after a severe trial of 18 months, purchased the right to use them; and now, after a still further and much more extended experience—almost three years in all—upon their main down track, which carries the loaded coal cars, they are putting them down upon their tracks generally.

The annexed certificate from the Chief Engineer of the company will show the estimation in which it is held by that gentleman:

ENGINEER'S OFFICE,
PHILA. AND READING R. R. Co.
Pottstown, September 4th, 1868.

WILLIAM WHARTON, JR., ESQ.

Dear Sir:—My experience, during the past year and a half, with your Safety Switch, proves it to be all that is claimed for it, in respect to safety and economy. Its great economy and advantage consists in its entire freedom from wear, by the through traffic, it only comes into service when necessary to transfer a train from the main track to sidings; thereby avoiding, from the general trade, wear to itself and to the rolling stock.

Its worst feature is its appearance—but on account of its superior merits, I think Engineers and Superintendents of Railroads will come to use it sooner or later. Immunity from accident, to through trains, is the great desideratum in Railway management; and so far as relates to the track, this switch secures it.

Yours truly,
[Signed] CHARLES E. BYERS,
Chief Engineer.

☞ The earnings of the Erie Railway for the first seven months of the current fiscal year, January to July, inclusive, were $7,680,068, against $7,593,252 during the corresponding period of 1867—an increase of $80,816.

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the years ending April 30, 1867 and 1868, were as follows:

	1867.	1868.
From freight	$4,124,692 99	$4,216,911 36
" passengers	1,543,714 15	1,482,506 92
" mails, etc	414,730 91	455,228 97
	$6,083,138 05	$6,154,647 25
Expenses, viz:		
Repairs of track	$845,254 72	$682,125 17

VAN ANDEN RAIL CHAIR COMPANY,

359 MAIN STREET,
POUGHKEEPSIE, N. Y.,

By their improved Machinery are enabled to offer

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

Union Pacific Railroad.

The Union Pacific Railroad Company have just published a pamphlet replete with important information touching the present and future of this great marvel of engineering skill. Opposite the title page is a map clearly defining the route of the road, and its pages throughout are illustrated by vignettes, in excellent taste, both in design and engraving. The pamphlet treats on the progress of the work and its character; the agricultural resources of the region through which it passes, and its mineral wealth. And gives interesting figures showing the present and prospective earnings of the road, its profit to the Government and the entire country. The cover is very attractive; its medallion centre is occupied by two female figures with clasped hands, representing the union of the East and West. Around and about them are the implements of husbandry and the arts, and in the distance the great slaves of commerce by land and sea—the steamboat and the railroad engine. The East is clad in flowing silk and adorned with jewels; the West in severe simplicity of garb, carries the wand, surmounted by the cap of liberty; a cornucopia lies between them.

Wharton's Safety Railroad Switch.

We invite attention to the advertisement of this Switch in another portion of our paper. The chief feature of this Switch is that by its use the continuity and solidity of both rails of the main track are entirely undisturbed; and therefore switches, so far as the main track is concerned, are entirely dispensed with. The great saving effected in the wear and tear of both rails and rolling stock, as well as the perfect protection it affords to trains traversing the main track in case the switch is by accident left wrong, should not be overlooked by railroad companies.

The Philadelphia and Reading Railroad Company, after a severe trial of 18 months, purchased the right to use them; and now, after a still further and much more extended experience—almost three years in all—upon their main down track, which carries the loaded coal cars, they are putting them down upon their tracks generally.

The annexed certificate from the Chief Engineer of the company will show the estimation in which it is held by that gentleman:

ENGINEER'S OFFICE,
PHILA. AND READING R. R. Co.
Pottstown, September 4th, 1868.

WILLIAM WHARTON, JR., ESQ.

Dear Sir:—My experience, during the past year and a half, with your Safety Switch, proves it to be all that is claimed for it, in respect to safety and economy. Its great economy and advantage consists in its entire freedom from wear, by the through traffic, it only comes into service when necessary to transfer a train from the main track to sidings; thereby avoiding, from the general trade, wear to itself and to the rolling stock.

Its worst feature is its appearance—but on account of its superior merits, I think Engineers and Superintendents of Railroads will come to use it sooner or later. Immunity from accident, to through trains, is the great desideratum in Railway management; and so far as relates to the track, this switch secures it.

Yours truly,
[Signed] CHARLES E. BYERS,
Chief Engineer.

☞ The earnings of the Erie Railway for the first seven months of the current fiscal year, January to July, inclusive, were $7,680,068, against $7,593,252 during the corresponding period of 1867—an increase of $80,816.

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the years ending April 30, 1867 and 1868, were as follows:

	1867.	1868.

Leaving balance to credit of income account April 30, 1868		$491,968 80

The gross earnings of the road (including interest and exchange, $43,081 39,) have been $6,197,728 64; and the ordinary expenses of operating and maintaining the road, including taxes, State and County, the tax on the manufacture of cars and tax on dividends, and rent of tracks, depots, etc., $3,475,877 65—leaving for interest and dividends during the year, $2,721,850 99; to which add surplus from the former year ($1,930,067 74,) and the balance to credit of income account, but for payment of dividends and interest, would have been $4,651,918 73. The amount paid for dividends during the year has been $1,667,095; for interest, $363,554 93; stock distribution, $2,079,800; expended for bonds for sinking fund, $49,500—total, $4,159,949 93, leaving balance to credit of income at the close of the year $491,968 80, exclusive of the amount paid into the sinking fund up to that time, viz: $878,225 99. If the amount paid into the sinking fund may be deemed a proper credit to the income account, the balance of that account is $1,370,194 79. The report says:

The gross earnings of the road are, it will be observed, a little in excess of those of the year ending April 30th, 1867, a result not at all anticipated by the board in its report of the business of that year. In that report they state that the failure of the corn crop, which is the great staple of Illinois and which was to a great extent destroyed by frost, would seriously impair the revenues of the road for the then coming year, not only directly, but indirectly also, greatly affect them as it would affect the general prosperity and more or less affect every branch of business.

These predictions have not been realized and the aggregate business of the road has been fully equal to that of any prior year. This has been owing to the extraordinary high prices of grains of all kinds which has induced the farmer to sell much closer than usual, and has brought the full surplus and perhaps more than the actual surplus into market. So high have been the prices, that for the first time in the history of railroads, the transportation of grains from Chicago and the country west of it to New York, by rail, has continued during the whole winter. The result has been that probably much of the corn, which usually waits the opening of navigation to move, has been moved during the winter by rail.

Although it is apparent that it is not safe to predict a diminished business by reason of the failure of the great staple crop, yet it is quite probable that this movement of corn to the seaboard during the winter months will be felt in a diminished business during the summer months when the movement of corn has usually taken place.

The aggregate tonnage of freight transported over the road has not been quite equal to that of the year ending with April, 1867, while the prices have been somewhat better. Some large items of business have fallen off while others have largely increased. The number of cattle transported, for instance, is not equal to that of the former year by 26,000, while the number of hogs has exceeded that of the prior year by 163,000. The traffic in lumber has considerably increased, while that in corn has diminished not quite, but nearly one-half. While, however, there have been these variations in the staples of the country still the aggregate volume of the traffic has not materially changed and has actually yielded a somewhat larger revenue than in the prior year.

In passenger traffic there has been a falling off of $61,207 23, not quite so great as the increased revenue from freight. This decline in passenger business is common to nearly all the roads in the West, and perhaps is so with quite all of them where no additional road has been made tributary to them during or shortly before the year began, and counteracting, so far as they are concerned, the gradual decline of travel which has been generally observable since the close of the war.

The operating expenses have not varied materially from those of past years, having been, exclusive of taxes 49.83 per cent. of the gross earnings, and inclusive of taxes 53.07 per cent. and about one per cent. less than the same expenses during the prior year, evincing an economy in management it is believed equaled by that of very few railways in the country. Yet while there has been great economy used in attaining this result the track of the road and all its appointments have been fully kept up and it is believed they were never in better condition than at the present time. The equipment, both of machinery and rolling stock, are in excellent order, and the condition of the whole property of the company has been kept up to the best working standard, which it has ever been the aim of the managers of the road to fully maintain.

There has been relaid upwards of thirty-five miles of the track with new or re-rolled iron, of which about three miles are steel rails. These last have been laid where they will be subject to the heaviest wear in order to test their quality and durability as compared with iron. The result thus far has not been such as to encourage the board in an extended use of it in the ordinary track of the road. There has also been added about nine and a quarter miles of side or double track during the year, and an additional amount of continuous double track from Mendota eastward is now being put down. Several of the bridges have been rebuilt with iron superstructures resting upon stone foundations, and so nearly all the bridges upon the road are of those materials that the annual expense of keeping them in repair hat been a comparatively small item; that of the lass year having been less than any previous year. A very short period will now elapse before there will be no bridge, except of iron, but little affected by decay and not subject to destruction by fire. About sixty miles of road has been ballasted with stone or gravel, a very considerable portion of which had never received any ballast before and much of which had not been sufficiently ballasted. There remains perhaps thirty-three miles between Galesburg and Quincy, of which eleven miles is between Quincy and Camp Point, and about thirty between Galesburg and Burlington yet to be done. As material for this purpose must be taken from a great distance the work is necessarily slow. But the whole will be completed as soon as practicable.

Thirty-one miles have been fenced, very nearly closing up that work, and on the main lines entirely so. Mainly thoroughly covered with heavy ballasting and with its bridging mostly iron, the whole road bed is rapidly assuming the most permanent form and subject to as little expense for maintenance as is possible in this country unless it shall be found to be good economy to substitute steel entirely for iron in the track, of which the board is not yet satisfied.

It has been found necessary to acquire, at Aurora, additional land for the enlargement of the machine and car works of the company at that place, and at other points upon the lines some small necessary purchases have been made. The principal shops of the company are at Aurora, and as they require enlargement it has been thought best to acquire all the additional land likely to be needed in the future. This has been done and at moderate expense to the company. The necessity for it had become imperative.

The equipment of the road has been somewhat enlarged during the year. Three new locomotives, six new passenger coaches, two new baggage and express cars, and one hundred and eighty-five freight and way cars have been added to the machinery and rolling stock.

Since the date of the last report the important work of bridging the Mississippi, both at Burlington and Quincy, has been mainly done and the bridges at both points will soon be ready for use. That at Quincy does not involve the finances of this company, being built by a bridge company, but under such arrangements with all the railroad companies terminating at Quincy, that the charges of tolls for crossing the bridge must always be moderate, and there being no authority or right in the bridge company to exact tolls in the course of a year, to more than enough to make a ten per cent. dividend upon the stock in the bridge company, and the business of all roads being tolled alike, an arrangement which was deemed eminently fair for the railroad companies securing the use of bridge at reasonable charges for tolls, and which will be constantly diminishing as the business of the several roads increases, while the railway companies were relieved from the necessity of raising money for the construction of the bridge. The bridge at Quincy is in all about four thousand feet long and will be opened for use in August or September it is believed.

The bridge at Burlington is about two thousand two hundred and thirty-seven feet long, and is built from the funds of this company entirely, and it is expected to be ready for use within the next six weeks. Both bridges rest upon ston piers of the most solid construction, and the superstructure of both will be entirely of iron, in the style of the Pratt Truss, so called. Both of them will be drawbridges, and when complete will be structures of great beauty as well as of very great utility and importance to the business of the country as well as of the railway companies.

The capital stock of the company, which stood at the date of the last annual report at $10,399,010, has been increased by a distribution to represent the surplus standing to the credit of income account of twenty per cent. of stock to the stockholders, amounting to $2,079,800, and by conversion of bonds (convertible) amounting to $44,000, and by fractional stock dividend, $21,220. The present capital stock of the company now therefore stands at $12,554,030.

Its funded debt and other liabilities created for the construction of the road and the purchase of the road from Galesburg to Quincy, including $270,000 due on that purchase and not yet called for at the date of the last report, amounts to $5,488,750. The whole aggregate capital stock and debt now therefore is $18,032,780.

The gross revenues of the property represented by this aggregate of debt and capital has been during the past year, $6,197,728 64. The net earnings above the interest on the debt and expenses including taxes of all kinds above stated, including tax on dividends of cash and stock, has been $2,359,296 06.

These taxes this year on four dividends alone have been about $200,000, and considerably more than that on manufactures and for State and county taxes. It will be seen that there has been three cash dividends paid during the last year. This is owing to the change made a year ago by the board in the time at which dividends should be made. Heretofore they had been payable in May and November, while the great mass of the earnings of the road were mainly between May 1st and November 1st, leaving the earnings for the rest of the year comparatively small and about one-quarter only of those of the whole year. By making the dividends payable March and September, the earnings of the year are much more equally divided than before. In making the change, however, and advancing the time of dividends two months, it brought three within the past year, and has somewhat increased the expenses of the year also by reason of the taxation upon them.

The local business of the company, which is its most important and valuable business, has been fully maintained the present as in the past years. Of the $6,197,728 64 of its gross business, the amount contributed to it by business passing over it to and from the Hannibal and St. Joseph Railroad has been $607,597 90, and the amount contributed by the like business with the Burlington and Missouri River Railroad has been $391,069 50, both together being in amount $998,667 40, being something less than one-sixth of the aggregate business of this company.

While, however, the local traffic is the element of chief importance in the value of the property of the company, this through business, in connection with these two roads, is still of very great value and destined to become in the future of very much greater importance. That from both roads is now about a million, and it is probably quite safe to say that our net revenues are increased by this business to the extent of half a million. The western connections of the Hannibal and St. Joseph road are being rapidly extended north and west from St. Joseph, and south and west from Kansas City, with both of which points it is connected, and within a short period it is not unreasonable to suppose that the business of that road alone, passing over ours, will amount to a million and upwards.

The Burlington and Missouri River road has, the past year been extended about fifty miles, and will soon be complete to Afton, twenty-five miles farther. The increased extent of country tributary to our line by the last year's extensions has been an average of twenty-five miles, the whole extensions during the year being fifty. The business contributed to our road has increased during the year from $358,069 46 to the sum $391,069 50. Arrangements are now complete for pushing forward this road with all possible vigor to the Missouri, to the mouth of the Platt River, Plattsmouth, or to Omaha, a few miles above, as may be found most expedient. In either case it will have a connection with the Omaha or Union Pacific, quite as good as that of any road connecting with it from the east, and will be enabled from its connections east as well as by its own favorable route, to command a fair share of business in connection with that road while controlling all the local business of the country for a distance of 300 miles, through which it runs. The country through which this, as well as the Hannibal and St. Joseph Railroad runs, is of great fertility and will be rapidly developed.

The bridges at Quincy and Burlington will stimulate the business of both. The Burlington and Missouri is or will be owned mostly by this company, and its business must be mainly tributary to it. And with the road opened through, and with a through as well as a local traffic, the time cannot be far distant when its contributions to the business of our road must be doubled and trebled beyond what they now are.

Since last year, by authority of the stockholders, this company has entered into arrangements to aid that company for the farther amount of $1,200,000, for the purpose of enabling it to extend its road across the State. The aid thus given, has enabled it to dispose of all the remaining bonds issued or authorized by virtue of the mortgage upon the lands and the property of the company, which provide all the money required to complete the road through. By the terms of the arrangement, which are probably familiar to all the stockholders of the company, the assistance given imposes no burden upon the finances of this company, as the fund from which the aid is given is created by the extensions of that road, and can in no case exceed in any one year the profits we derive from the business which that road will furnish. By such aid given from time to time the Chicago, Burlington and Quincy Railroad Company has secured the construction and completion of what is really an extension of its line west, for a distance of three hundred miles, and through that extent of fertile, and destined to be a populous country, and to a connection with the Union Pacific extending (shortly) to the Pacific coast, an extension which must forever be a large contributor to the revenues of this company. The aid to be rendered is only an annual subsidy from a fund created as above stated for a short term of years. At its termination the Chicago, Burlington and Quincy Railroad Company will be the large majority owner in the stock of that company and will have secured a connection which is not unreasonable to believe will soon contribute from a half a million and upwards to the net profits of this company.

The arrangements made with the Toledo, Wabash and Western for the joint use of the track of this company for about twenty-two miles from Quincy are working well and it is hoped will result in the friendly, at least not hostile, rivalry of the two companies. During the year coming there will be completed probably a line of road from Peoria, (in connection with the road extending eastward from Peoria to Logansport) to Keokuk and crossing the line of this company at Canton, on the Lewiston Branch, and at Bushnell on the Quincy main line. This road it is reasonable to suppose will, to some extent, divide with that of this company the business of that section of country through which it will run. It may, also, if not wisely conducted, somewhat affect the prices of the business by the competition which will be introduced. A true and wise policy may somewhat divide the business but will preserve the rates. Time and experience will develop its effects.

In concluding this report of another year's business it is not out of place for the Board to remark that considering the progress of improvements in the west, it would be remarkable if in time there should not be constructed roads which shall to some extent affect the value of the local traffic of the property belonging to this company. This is of course anticipated. The progress of the country, however, is so rapid, the development of the States west is going forward with such energy, and population is flowing thither in such tides, and the basis of the business of the company is so broadly laid, both in the direction of its main lines and in its local tributaries, sending their large business over the long extent of its main trunk to the outleting point of the country at Chicago, as well as in the extension of its connecting roads, so far to the west and southwest, and destined to bring to it so large a volume of business in the future, that they may also express their conviction that while, possibly, in some respects, chnages may take place affecting some of its business, yet, that on the whole, its volume must continue largely to increase, and that the usefulness of their road to the country and the value of their investment therein to its stockholders themselves will continue to be evinced in the future as it has been in the past, in the steadily increasing revenues of the property.

The company have 122 locomotives, 55 passenger, 30 baggage, mail and express, 1 pay, 1,817 house freight and cattle, 555 platform and coal, 49 drovers' and conductors', 40 gravel and dirt, 2 tool, 1 pile driving, 99 rubble, 123 hand, and 2 wrecking cars.

Number of miles run by locomotives with passenger trains, 710,560; with freight trains, 1,225,100; with miscellaneous trains, 712,894—total miles run, 2,648,554. Average cost per mile run, 26.18 cents.

The number of passengers carried during the year was 908,038; of these, 43,730 were through, and 864,308 way. Of the through passengers, 24,873 went west, and 18,857 east. Of the way passengers, 434,105 went west, and 430,203 east. Total carried west, 458,978; do., east, 449,060. Total mileage of passengers, 39,781,829. Average do., 43.81. Earnings per passenger per mile 3.727 cents.

The whole tonnage moved over the entire line during the year, exclusive of company's freight, was 937,489; of which 428,906 tons were moved westward, and 508,583 tons eastward. Total number of tons moved one mile, 132,435,027. Average earnings per ton per mile, 3.20 cents. Company's freight moved, 126,915 tons; do., moved one mile, 8,236,739. Total tonnage, including company's freight, 1,064,404; do., moved one mile, 140,671,766.

GENERAL ACCOUNT.

Capital stock	$12,544,030 00
Funded debt (See Bond List)	5,218,750 00
Amounts due under decree of court foreclosing the mortgage on the Northern Cross Railroad not yet called for by the bondholders, and therefore retained by order of the court	270,000 00
Unclaimed dividends	2,853 00
Unpaid accounts and pay rolls	296,850 02
Due agents and connecting roads	83,099 82
Sinking fund	878,225 99
Balance to credit of income acc't	491,968 80
	$19,785,777 63
Construction	$14,507,844 47
Equipment	3,205,407 62
Due on Northern Cross R. R.	270,000 00
Materials on hand	440,151 05
Pullman Palace Car Company stock $72,300	48,200 00
Steam ferry and other boats	45,456 91
Burlington depot grounds and accretions	126,137 55
Chicago teams for transferring fr'gt	4,500 00
Monthly traffic accounts and bills receivable	307,817 97
Burlington and Missouri River R. R. preferred stock, 5 installments	299,649 01
Due from agents and connecting roads	64,435 65
Deposits in New York, Boston and treasury	235,012 54
Deposits with Trustees sinking f'd.	231,664 86
	$19,785,777 63

The directors chosen at the annual meeting June 24, 1868, are as follows:

President.—JAMES F. JOY.

Directors.—Erastus Corning, James F. Joy, Chauncey S. Colton, John C. Green, Nathaniel Thayer, John M. Forbes, Sidney Bartlett, John W. Brooks, Robert S. Watson, William Boott and John N. Denison.

Chairman of Board.—JOHN N. DENISON.

Gen'l Superintendent.—ROBERT HARRIS.

Secretary and Treasurer.—AMOS T. HALL.

☞ The Philadelphia *Ledger* says that the Kent County Railroad is rapidly being completed, and the contractors on the Queen Anne's County Railroad have nearly three hundred men at work. Seventeen miles of the road are now ready for the rails, and the opening for traffic with Philadelphia depends upon how soon the Delaware Railroad Company finishes the section from Massey's to Townsend.

☞ We learn that arrangements are nearly completed for commencing the extension of the White Mountain Railroad from Littleton to Lancaster, and ultimately to the Grand Trunk line at Northumberland. The first section of the new road to be constructed will run from Littleton to the "Wing Road" in Bethlehem, a distance of 6½ miles.

☞ We learn that a large force of workmen is engaged in the neighborhood of Bethlehem upon the extension of the East Pennsylvania Railroad to Easton. It is said to be the intention of the company to complete the road through to Easton as rapidly as possible.

☞ The survey for the route of the proposed railroad to connect Georgetown with the Alexandria, Loudoun and Hampshire road has been commenced, under the direction of H. W. Brewer, Esq., city surveyor of Georgetown.

Railroads of the State of New York.

A tabular Statement of their Capital, Bonds, &c., Length and Cost, Earnings, Expenses, Dividends, &c., for the year ending September 30, 1867.

Compiled from the Annual Reports made to the State Engineer and Surveyor.

1. Including leased roads, but not second track or sidings. 2. Including U. S. and local taxes. 3. Has a third rail for wide cars. 4. Dividend on preferred stock 7 per cent. 5. Dividend on preferred stock 8 per cent. 6. Commenced operations June 17, 1867. 7. Average 66⅓ miles The Troy and Bennington and the Vermont Western Railroads not operated after Jan. 17, 1867.

Commerce of New York.

The foreign imports at New York for the month of August are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$13,547,834	$14,005,112
Do. for warehousing....	9,340,292	8,280,600
Free goods	844,664	828,188
Specie and bullion	540,244	846,821
Total entered at port...	$24,273,034	$23,960,721
Withdrawn fr. wareh'use	10,490,050	9,676,657

The foreign imports at New York for the eight months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$89,557,409	$85,123,542
Do. for warehousing...	84,638,097	78,576,756
Free goods	7,587,141	6,876,780
Specie and bullion.....	2,153,546	5,012,163
Total entered at port..	$183,936,193	$175,589,241
Withdrawn fr. wareh'se	77,538,337	68,428,668

The revenue from customs at New York, were:

	1867.	1868.
6 months	$59,354,688 90	$55,450,748 65
In July.....	9,505,432 94	9,237,920 50
In August.....	12,623,300 45	11,995,596 18
Tot. since Jan. 1	$81,483,422 29	$76,684,265 33

The exports from New York to foreign ports in the month of August, were:

	1867.	1868.
Domestic produce.....	$12,116,096	$12,750,918
Foreign free goods.....	24,096	18,192

Total exports.....	$14,571,947	$18,018,177
Do. exclusive of specie.	12,857,353	13,327,188

The exports from New York to foreign ports for eight months from January 1st, were:

	1867.	1868.
Domestic produce.....	$116,930,052	$102,391,078
Foreign free goods....	331,502	460,416
Do. dutiable	5,311,300	4,912,286
Specie and bullion.....	39,830,150	64,379,147
Total exports	$162,403,004	$172,142,927
Do. exclusive of specie	122,572,854	107,763,780

Debt of Boston.

The amount of the consolidated debt of the ity of Boston, (funded, unfunded and water loans,) on the 1st of May, 1868, was $14,146,900 65, and is made up of the following items, viz:

Funded city debt.....	$9,152,639 80
Unfunded do.....	135,243 74
Water loans.....	3,867,711 11
Roxbury debt.....	991,306 00
Total.....	$14,146,400 65
Funded.....	14,011,656 91
Unfunded.....	135,243 74
	$14,146,900 65

Classification of the consolidated debt:

Water debt—The net cost of the works to May 1, 1868		$7,677,702 55
City debt, proper		3,562,392 10
War debt.....		1,915,500 00
Roxbury debt.....		991,306 00
Total, as above.....		$14,146,900 65
To meet which there was belonging to the sinking fund.	$4,762,299.59	
Also bonds and mortgages on hand in the Treasury, amounting to.....	437,070.13	
		5,199,369 72
Net debt May, 1868.....		$8,947,530 93

Since the above date, the funded debt has been increased $1,030,000.

The principal and interest of the funded debt (including the Roxbury debt,) are payable as follows:

$583,205, at 4½	per cent. in gold.
5,672,500, at 5	per cent. in gold.
433,115, at 5	per cent., currency.
2,000, at 5¼	per cent., currency.
224,000, at 5½	per cent., currency.
3,172,325, at 6	per cent., currency.
1,800, at 6	per cent., gold or silver.
55,000, at 7	per cent., currency.

$10,143,945.

The average rate of interest is 5.36 per cent. per annum, and the aggregate annual interest on the funded debt is $538,247 51.

The annual rate of interest on the Water Loans is 4.93 per cent., viz:

$1,949,711 11	at 4½ per cent. in gold	$87,737
1,082,000 00	at 5 " "	54,100
836,000 00	at 6 " in currency	50,160
$3,867,711 11	at 4.93 per cent.....	$191,997

The Cotton Crop.

We have received from several of the cotton brokers of this city the authorized statement of the cotton crop made up to the first of September. The original is compiled at the office of the *Shipping List*, and, although it differs somewhat from other compilations, it is generally accepted without cavil by dealers here, and we therefore adopt it as the basis of our tables. We have again to congratulate ourselves on the nearness of our estimates of the growing crop, made just one year ago, to the actual result.

We do not believe the actual yield varies a thousand bales from two and a half millions. One of the published statements gives the total at 2,498,895 bales, or within 1,105 bales of the round amount, but the total accepted here is 2,430,893 bales, which is quite near enough to our original figures for a twelvemonths' anticipation. We now present the yield from different sections, with a comparison from our records of the same in former years:

COMPARATIVE PRODUCT OF COTTON.

	1865–'6.	1866–'7.	1867–'8.
Louisiana.....	711,629	702,131	579,231
Alabama	429,102	239,616	366,193
Texas.....	174,985	185,919	114,666
Florida	149,139	58,349	34,639
Georgia	263,373	255,965	495,005
South Carolina..	112,273	162,247	240,225
North Carolina..	64,559	38,522	38,587
Virginia.....	37,531	123,627	187,487
Tennessee, etc...	211,885	185,712	374,860
Total bales.....	2,154,476	1,951,988	2,430,893

The total exports for the year ending September 1st show an increase of nearly one hundred thousand bales on the figures of the previous year. The following is a comparison for the last three years:

	1865–'6.	1866–'7.	1867–'8.
To Great Britain...	1,262,271	1,216,262	1,228,596
To France.....	220,650	198,147	197,515
To Northern Europe	48,647	95,342	145,042
To other for. ports.	23,096	47,303	84,663
Total bales....	1,554,664	1,557,054	1,655,816

The total consumed in the United States, including all burnt at the ports, is given at 968,165 bales, which is almost equal to the largest previous total, as will appear from the annexed table:

	North of Virginia.	Elsewhere.	Total.
1856-'7	665,718	154,218	819,936
1857-'8	452,185	143,377	595,562
1858-'9	760,218	167,433	927,651
1859-'60	786,521	185,522	972,043
1860-'1	650,357	193,383	843,740
1865-'6	604,085	127,640	731,725
1866-'7	697,367	156,672	854,039
1867-'8	799,817	168,348	968,165

We now present our usual comparison of the total crop of each year since 1821. The total given as the crop of 1865-6 includes a large amount grown in preceding years, but not sent forward until the ports were opened:

COMPARATIVE CROP STATEMENT.

1820-'1	430,000	1844-'5	2,394,503
1821-'2	455,000	1845-'6	2,100,537
1822-'3	495,000	1846-'7	1,778,651
1823-'4	509,158	1847-'8	2,347,634
1824-'5	569,249	1848-'9	2,728,596
1825-'6	720,927	1849-'50	2,096,706
1826-'7	957,281	1850-'1	2,355,257
1827-'8	727,593	1851-'2	3,015,029
1828-'9	870,415	1852-'3	3,262,882
1829-'30	976,845	1853-'4	2,930,027
1830-'1	1,038,848	1854-'5	2,847,339
1831-'2	987,477	1855-'6	3,527,845
1832-'3	1,070,438	1856-'7	3,939,519
1833-'4	1,205,324	1857-'8	3,113,962
1834-'5	1,254,328	1858-'9	3,851,481
1835-'6	1,260,725	1859-'60	4,669,770
1836-'7	1,422,930	1860-'1	3,656,086
1837-'8	1,801,497	1861-'2(est.)..	4,800,000
1838-'9	1,360,532	1862-'3(est.)..	1,500,000
1839-'40	2,177,835	1863-'4(est.)..	500,000
1840-'1	1,634,945	1864-'5(est.)..	300,000
1841-'2	1,836,574	1855-'6	2,154,476
1842-'3	2,378,875	1866-'7	1,951,988
1843-'4	2,030,409	1867-'8	2,430,893

The Sea Island cotton included in the above statement amounted to 20,927 bales. The highest previous yield was in 1858-'9, when the crop was 47,592 bales. Our readers have had the year's record of quotations in this market. It may be interesting to them to note the price abroad. The average for each month at Liverpool of middling upland, beginning with the first of the new crop, may be set down in sterling pence as follows:

Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May.	June.	July.	Aug.
8⅛	8	8⅛	10¼	10⅜	13	12½	12½	11	12

The estimates in relation to the growing crop vary as widely as usual, and the accounts of damage from different sections are stirring and particular. Notwithstanding these, we cannot think the yield, as a whole, will fall much, if any, below the production of the current year, and a late frost and a good picking season will probably give even more. Still at this date the prospect is all that can be decided on, and we think a proper regard to this will place the yield at between twenty-four and twenty-five hundred thousand bales.—*Journal of Commerce.*

American Central Railroad.

The Burlington *Hawkeye* says the American Central Railway will be built from Galva, Ill., to New Boston, Ill., and that will be end of the project. It has fallen into the hands of the Chicago, Burlington and Quincy Railroad Company, the denial of certain interested parties to the contrary notwithstanding, although a separate organization is still maintained. It will be a feeder of the main trunk of the Chicago, Burlington and Quincy Road, and as such will greatly benefit the company and the country through which it passes.

☞ The Cincinnati, Connellsville and Indianapolis Railroad, extending from Hamilton *via* Connellsville to Indianapolis, 98 miles, is soon to be opened for through passenger trains.

☞ James F. Joy, Esq., of Detroit, has been appointed Receiver of the Louisville, New Albany and Chicago Railroad.

☞ The Portland and Rochester Railroad has been opened to Alfred, and is nearly finished to Alfred Corner.

☞ The first section of the European and North American Railway, extending from Bangor to Oldtown, was formally opened on the 23d ult

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, October 3, 1868.

Stock Exchange and Money Market.

The Money Market worked easily at the rates quoted in our last summary up to the closing day of the week, under review, when chiefly through speculative manipulations, the available supply was materially reduced, a number of loans were called in, and the street rates were sharply advanced to full 7 per cent. in a temporary form, and 7@8 per cent. per annum, on the best grades of mercantile paper. It was alleged in partial explanation of the sudden rise that the Government needed currency and was marketing, or would have to market, a considerable portion of its coin reserve, in order to secure the requisite amount of lawful money. And it was further asserted by those who were talking up the price of loan and discount accommodation that the increase of some ten millions in the U. S. Sub-Treasury cash balances within the past two weeks had so far diminished the floating supply of capital, and thus prepared the way for the important change, adverse to private borrowers, which was so marked a feature of Wednesday's operations, On the other hand, it was urged that none of these circumstances should have had any greater weight on Wednesday. than on any preceding day of the week, and that the explanation thus advanced was insufficient to account for the unusual closeness of the market. The banks, it was admitted, were contracting their business, as much as possible, without seriously involving the interests of their customers, in preparation for the October quarterly exhibit, due the coming week. But it was stated that the banks, so far from helping to make money dear, were doing their utmost to maintain the ease of the market, or to lessen the severity of the pressure on parties in need of aid, for legitimate purposes. The last weekly statement of the city banks was favorable to the steadiness of the loan and discount movement, indicating as it did, very moderate change, the most important having been a further loss of some two millions of specie, and ¾ths of a million of deposits. The orders for currency to go West were scarcely equal at present to the current receipts of greenbacks from other quarters, and the orders for the cotton markets of the South have not yet been felt to any noteworthy extent. The Treasury currency balances are below the corresponding period of last year, while the banks carry into their quarterly returns, $7,500,000 more in greenbacks, and their representative 3 per cent. certificates. The general conclusion was that the stringency of Wednesday was mainly due to the manipulations of the Money Market, by speculative cliques, interested in the depression of values at the Stock and Gold Boards.

The specie reserve of the city banks is now $12,603,483, against $9,496,163 same time last year. The city bank deposits are now $202,068,334, against $181,439,410 week ending Sept. 28, 1867. The legal tender reserve amounts to $63,587,576. against $55,991,526 same time last year. The circulation now stands at $34,050,771, against $34,147,269 same time last year. The loans are now $271,273,544, against $251,918,751 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $103,351,000 a day, against a daily average of $86,412.000 the preceding week, and $82,198,500 the week ending with Sept. 10, 1868. The current week's exchanges average about $97,000,000 a day. The city banks, last week, lost $2,062,259 of specie, $756,249 of deposits, and $185,124 of legal tender notes. They increased their loans, $21,448; and their circulation, $6,078.

The New York Gold Exchange Bank reports for the week ending Saturday, the 19th day of Sept., 1868. the average amount of loans and discounts as $1,340,739; average amount of specie, $386,802; average amount of deposits, $1,119,717.

The Philadelphia Bank movement the past week shows a decrease in loans of $152,424; an increase of $37.345 in specie; an increase in legal tenders of $181,822; a decrease of $332,134 in deposits; and a decrease of $12,582 in circulation. The Bank Clearings show an increase of $2,386,401 and the balances, an increase of $26,575.

The outstanding amount of coin certificates on the 1st of Sept., was $25,161,620, against $22,414,000 on the 1st of Aug., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to

the amount of $513,000, and retired $3,112,617 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during August, reached $9,075,920.

The U. S. Sub-Treasury receipts, week ending with Sept. 26, were $11,670,530, including $3,306,617 from customs duties; payments, $7,947,615, including $164,814 of coin interest; balance at the close of the week, $95,053,401, against $91,330,486, at the close of the preceding week, showing an increase of $3,722,915. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,759,817 including $530,000 from customs; and payments, $3,534,083, including $14,110 of coin interest; on Tuesday, receipts, $3,685,581 including $410,059 from customs, and payments, $1,057,317, including $15,000 of coin interest. The balance at the close of business on Tuesday stood at $97,907,398, against $92,291,486, a week previous; and $90,261,836, on Sept. 9, 1868. The aggregate receipts of the office from all sources in September, were $54,298,704; aggregate payments, $47,354,171. The balance on the 1st of October was $94,499,990, or about 7 millions more than on the 1st of September, which amounted to $87,555,452.

National Bank notes to the amount of $80,000 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,870,376, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,029,599, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,840,777. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,970,900; and for the public deposits, $38,102,350—making a total of $379,873,250. The Treasury Department last week redeemed and destroyed $614,302 of worn and mutilated fractional currency, and issued $1,001,452 of new. The outstanding amount of fractional currency on the 1st of September was $31.802,218, against $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

A decided improvement has been noted in the revenues of the Government, since our last. From this source, most of the increase of the cash balances in the Treasury office has been derived. Very little of the increase has resulted from sales of gold. The excises have been encouragingly prolific, since our last, having yielded $8,186,765; customs at the port of New York, $3,306,617, and at the outports about $1,100,000 (in coin) more, making the grand total income for the week equal to about $14,526,362 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $53,650.000.

Gold has fallen from 142⅝ as the highest figures of the week to 140⅝ as the lowest, closing on Wednesday last at 140⅝. The business of the has been unusually active, and on cash gold, wanted for prompt delivery, on *short* contracts, more than the usual difference has been made in the price, against buyers, or borrowers. The Government has been a seller of coin to a limited extent, probably not over an average of half of the daily income from customs. But the fact that Government gold was being marketed at all, was diligently urged by the *bear* interest, as "proof positive" that it was being freely disposed of, and would continue to be so marketed, until an amount of currency adequate to the anticipated wants of the Department shall have been accumulated in the Treasury vaults. The customs drain was over half a million a day. The outflow to Europe was unimportant, having been only $104,000 last week, and $250,000 thus far this week. Half a million of treasure was received from California, on Monday. The loss of specie by the city banks was mainly due to the absorption of coin by the Sub-Treasury, in the way of Custom House dues. On Thurrday the 1st inst., gold sold down to 139½@139⅝.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $5,875,196, against $2,481,220 same time last year. The customs demand for Gold last week, averaged $551,103 a day; thus far, this week, it has been equal to $490,000 a day, or equal to a weekly aggregate of $2,940,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $19,555 and from California, $401,435 The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $90,520,719, against $94,639,655 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $31,650,067, against $22,605,470 in 1867, showing an increase thus far in 1868, of $9,045,597. The exports of specie, from this port, last week, were $104,468, against $657,347 same week last year; total, since Jan. 1, 1868, $66,103,414, against $42,151,819 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $164,814; since Jan. 1, 1868, $63,336,547, against $43,258,765. The specie exports from San Francisco, from Jan. 1, to Sept. 12, 1868, were $28,245,532, against $30,132,244 same time last year.

Government received $5,796,743 from customs at the port of San Francisco, from Jan. 1, to Sept. 12, against $5,289,918 same time in the preceding year.

Foreign exchange has been in quite moderate request, all through the week, at feebly sustained prices, as a rule. Bankers' prime sixty day bills on London closed on Wednesday at 108½@108¾, and on Paris to 5.22½c.@5.18¾; sight bills on London to 108⅞@109⅛, and on Paris to 5.18½c. @5.16⅞. The offering of produce bills has been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,686,708, against $3,330,163, same week last year; total, since Jan. 1, 1868, $122,981,480, against $136,902,503 in 1867.

Government securities have been quoted decidedly lower, on a much less active market, caused partially by the depression in gold, but mainly by the severe twist in money, which however promises to be merely temporary in its duration, and transient in its influence on current values. At the reduced prices, the offerings of the public funds have been comparatively moderate.

U. S. sixes of 1881 closed here on Wednesday at 113@113¼; U. S. Five-twenties of 1862, 112⅛@112¾; U.S. Five-twenties of 1864 at 109½@109⅝; U. S. Five-twenties of 1865 at 109¾@110; U. S. Five-twenties of 1865, consolidated, 107⅞@108; U. S. Five-twenties of 1867, 107⅞@108; U. S. Five-twenties of 1868, 107⅞@108⅛; U. S. Ten-forties at 104⅛@104¼; U. S. Six per cent. currency bonds, 99⅛@99⅞. The brokers are buying the outstanding October 1865 compound interest notes at 118¾@119.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 16.	Sept. 23.	Sept. 30.
Consols	94⅛	94¼	94⅜
U.S. 5-20's of 1862	72¼	73⅛	73
Erie	30¼	32	31½
Ill. Central	91	91½	95¼

Railway and miscellaneous stocks have been quoted generally much lower, on a less active and quite feverish market, closing irregularly.

The customs revenue of this port in September was $13,279,450, against $11,967,825 same month in 1867.

General business has shown less animation in the produce line, and lower prices have been made on Breadstuffs and Provisions. Middling upland cotton closed rather briskly on Wednesday at 26⅛ cents per lb. The stock of cotton now here is estimated at about 15,500 bales. The receipts at the port this week, have averaged about 1,900 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 55,000 bales, against 31,500 bales same time last year; exports, same time 11,250 bales, against 9,100 bales same time last year; stock on hand at latest dates, 51,000 bales, against 78,000 bales same date last year. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales At the Live Stock market, this week, Beeves have been slow of sale at from 11@17c. per lb.; week's receipts, 6,571. Veal calves in good request and quoted up to 9@18c. per lb.; receipts, 1,267. Sheep and lambs plenty and active at 5@6¾c., and 8@8¾c., respectively, per lb.; receipts, 33,792. Swine less sought after and quoted back to 8¾@10 7-16c. per lb.; receipts, 16,803. At the regular auction sale of Scranton Coal on Wednesday, 59,000 tons were disposed of at advanced prices, ranging from 5.15 @6.90 per ton of 2,240 lbs. deliverable at Elizabethport. N. J. Foreign merchandise has been moderately active and generally firm. The total imports of foreign dry goods, last week, were $1,898,500, and the total amount marketed $2,042,611. The value of foreign merchandise imported last week, was $2,200,001—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,098,501, against $4,114,806 same week last year; from Jan. 1, 1868, $189,183,920, against $200,625,299 same time in 1867. The freight market has been quoted firmer, on a moderate business. For Liverpool we quote flour at 2s. by sail, and 2s. 6d. by steamer, per bbl.; grain at 7@7½d. by sail, and 8@9d. by steamer, per bushel; cotton at ⅛d. by sail,

and 3/16d. by steamer, per lb.; and heavy goods at 20s.@30s. by sail, and 25s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 531.

The New York exports, exclusive of specie, for the week ending Sept. 29, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,330,163	$2,686,708
Prev. reported	138,572,340	120,294,772
Since January 1	$136,902,503	$121,981,480

The imports for the week ending September 26, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,862,594	$1,898,500
Gen. merchandise	2,252,212	2,200,101
Total for the week	$4,114,806	$4,098,601
Previously reported	185,896,305	182,795,523
Since January 1	$190,011,111	$186,894,124

The balance in the Sub-Treasury on Wednesday was $94,499,990 11.

To Cautious Investors.—The First Mortgage Thirty Year Six Per Cent. Gold Bonds of the Central Pacific Railroad Company, based upon the most valuable portion of the main line to and from the Pacific coast, are believed to possess advantages and assurances shared by no other corporate securities. More than 350 miles are now completed, and the whole road will be finished within a year. The local traffic is already very large and growing. The bonds can be had at 103 and accrued interest, in currency. For sale by

FISK & HATCH,
Bankers, &c., 5 Nassau-st., N. Y.

☞ PRINCIPAL AND INTEREST IN GOLD.

THE FIRST MORTGAGE FIFTY YEAR SEVEN PER CENT. SINKING FUND COUPON BONDS of the Rockford, Rock Island and St. Louis Railroad Company, principal and interest payable in GOLD COIN, *free of Government tax*, are for sale at the office of the Company, No. 12 Wall street, at 95 per cent. and accrued interest in currency.

At the present price of gold the bonds pay an income of over ten per cent.; and, in the estimation of the Company, they are the cheapest first-class security offered in the market.

Pamphlets giving further information may be had at the office.

Government and other securities received in exchange at market rates.

H. H. BOODY, Treasurer.

New York and Oswego Midland Railroad.

This company having contracted for the grading, etc., of about 37 miles of their main line in Fulton County, (125 miles, from Oswego to Sidney Plains, having been previously let,) are again calling for proposals for the grading, masonry and bridging of 63 miles in Delaware and Sullivan Counties. This work will be awarded on the 30th inst., when the whole line from Oswego to Middletown, on the Erie Railroad near the New Jersey State line, will be under contract, except about twenty miles in Delaware County. The officers of the company expect to have the road from Oswego to Sidney Plains, the junction with the Albany and Susquehanna road, in running order next fall, and the whole line from Oswego to New York completed within two years.

☞ The citizens of Bath, Me., have decided in favor of a bridge across the Kennebec river to connect with the Knox and Lincoln Railroad. It is to be located in the vicinity of Winslow's Rocks,

Canadian Railways.

The earnings of the Canadian Railways in August, 1867 and 1868, were as follows:

	1867.	1868.
Great Western	$270,183	$260,017
Grand Trunk	600,799	627,713
Welland	4,404	7,608
Northern	59,606	49,295
Cobourg, Peterboro' and Marmora	7,255	2,506
Brockville and Ottawa	10,213	14,115
St. Lawrence and Ottawa	9,518	9,349
New Brunswick & Canada	7,549	10,837
European and N. American	15,517	16,460
Nova Scotia	22,006	25,848
Totals	$1,007,050	$1,023,748

Commerce of the United States.

A few days ago we gave from the Bureau of Statistics a summary of the foreign commerce of the country for the last fiscal year. We have now compiled our usual monthly table with fuller details, which will be interesting to our readers. The totals are subject to further correction, and this is one of the most trying incidents of the statistics of that bureau, that with each additional month's return we are obliged to go back through the whole year and correct the figures already printed. We have now brought forward all the changes reported, and give the official statement for the entire period under review, the compilation being our own, and made with much care and labor.

IMPORTS INTO THE UNITED STATES.

1867-'68.	Dutiable Mdse.	Free Mdse.	Specie.	Total.
July	$31,982,542	$1,255,249	$1,197,893	$34,435,684
Aug.	31,905,788	1,419,676	1,175,831	34,501,295
Sept.	29,098,714	1,473,521	1,199,606	31,771,841
Oct.	27,986,431	1,390,631	1,262,189	30,639,251
Nov.	24,022,927	1,462,826	329,203	25,814,956
Dec.	19,263,448	1,219,873	984,924	21,468,245
Jan.	20,374,657	1,096,976	782,724	22,254,357
Feb.	26,914,091	1,073,342	801,616	28,789,049
Mar.	35,755,908	1,240,415	2,175,584	39,171,907
Apr.	31,584,118	1,337,416	1,453,563	34,375,097
May	31,950,311	1,440,326	834,512	34,225,149
June	30,418,868	1,356,600	1,337,438	33,112,906
Total	$341,257,803	$15,766,851	$13,535,083	$370,559,737

The above are all specie values, the imports being given at their foreign gold cost, freight and duty not included. The following are mostly currency values, and taken from the Custom house records:

EXPORTS FROM UNITED STATES TO FOREIGN PORTS.

	Domestic Mdse.	Foreign Mdse.	Specie.	Total.
July	$26,770,027	$699,500	$16,898,466	$44,367,993
Aug.	21,918,970	1,040,978	3,494,477	26,454,425
Sept.	20,198,539	1,152,147	4,346,002	25,696,688
Oct.	27,202,666	1,080,030	3,747,471	32,030,167
Nov.	35,379,519	953,265	2,494,111	38,826,895
Dec.	35,157,156	830,564	9,710,887	45,698,607
Jan.	35,703,243	940,827	8,137,214	44,781,284
Feb.	37,891,263	695,653	4,431,032	43,017,948
Mar.	40,750,431	1,170,211	4,712,157	46,632,799
Apr.	36,000,964	1,063,028	6,855,882	43,919,874
May	32,603,935	1,296,344	16,235,363	50,135,642
June	20,356,874	1,220,548	12,636,226	34,213,648
Total	$369,933,587	$12,143,095	$93,699,288	$475,775,970

In order to reduce the whole of these figures to specie values we adopt the ratio given by Mr. Delmar, the Director, and compile the year's summary by that standard:

Imports merchandise, 12 months	$357,024,654
" specie	13,585,083
Total imports	$370,559,737
Exports dom. mdse., net.	$268,678,208
" foreign mdse	12,143,095
" domestic specie	83 661,161
" foreign specie	10,038,127
Specie value of exports	374,520,591
Excess of exports	$3,960,854

This gives an apparent excess of exports equal to about four million dollars. The puzzle which troubles many of those who exercise themselves about the balance of trade is in offsetting the Government bonds which are sent out to Europe on orders or for sale. If they are really shipped in such large amounts, what pays for them? One item is undoubtedly the annual charge for interest. If the entire indebtedness of the United States to all foreign countries, including dividend paying stocks held by foreigners, bonds of every description, and capital otherwise advanced, amount to eight hundred millions, then about fifty millions will be required for annual interest and dividends, and this will represent a large part of the yearly increase of our foreign indebtedness by the transmission of new securities.—*Journal of Commerce.*

Journal of Railroad Law.

WHEN RAILROAD COMPANY LIABLE TO WIDOW FOR DEATH OF HER SON, CAUSED BY NEGLIGENCE OF THE COMPANY.—RULE OF DAMAGES.—NURSING, MEDICAL ATTENDANCE AND FUNERAL EXPENSES PROPER ELEMENT OF DAMAGES.

The facts in the late case of Penn. R. R. Co., *vs.* Bantom, 54 Penn. st., 495, were that Lewis, a boy of 13 or 14 years, and the son of Mrs. Bantom, a widow, was struck, while crossing the railroad in a wagon, by the engine and died from the injuries he received. The accident was alleged to have resulted from the negligence on the part of the agents of the railroad.

The opinion of the court was delivered by Woodward, C. J.—The defendant's points on the trial below and the argument here, may be reduced to this single proposition—that inasmuch as any plaintiff who sues for an injury resulting in the death of another, is only entitled to recover an indemnity for pecuniary losses, and inasmuch as a widowed mother has no legal right to the services of a minor son, therefore the measure of her damages is only reasonable compensation for nursing and medical attendance of the deceased.

The answer to the argument is the Act of 26th April 1855, Purd. 754, which declares that the "persons entitled to recover damages for any injury causing death shall be the husband, widow, children or parents of the deceased, and no other relation."

Now here is no limitation of damages to nursing and medical attendance. The legislature did not undertake to define the damages, and yet the power of a widowed mother to recover damages for the injury causing the death of her son is expressly given. What damages? Such as a court and jury, in view of all circumstances, should consider reasonable. If this was not what the Legislature meant, their meaning is past finding out. Both parents are grouped among the persons entiled to recover damages, and by necessary implication the same damages, or damages estimated by a common standard. If the father could recover for loss of the son's services, which is a conceded point, the legislature have imparted the same capacity to the mother, and she may show what they were worth to her; as if she had acquired right to them by arrangement and contract, if not by law, and of course how much she was pecuniarily injured by this untimely taking off.

Thus far the legislature have compelled us to go. We keep step with them and limit the mother's right to a case of *death* and not of *maiming*, because they have changed the rule of the common aw no further than this. Where the injury does not result in death, we decided at the present term, in Railway Co., *vs.* Stutler, 54 Penn. st., 375 that the mother has no right of action for the loss of her son's services, but where it does result in death, we sustain the action by virtue of the Act of Assembly. For the discrepancy of these rules we are not responsible.

Nursing and medical attendance before the death and funeral expenses afterward, are proper elements of estimate, but the value of services lost is equally legitimate since the statute. There was therefore no error in negativing the points, and the judgment is affirmed

West Wisconsin Railroad.

We have the pleasure of announcing to the people of Northwestern Wisconsin, that the first rails on the West Wisconsin Railroad have been laid, nearly half a mile of the road already constructed, and with the army of hands now at work can be pushed rapidly ahead, and completed to Black River Falls inside of one month. It is confidently expected that under the skillful management of the experienced overseers now employed, the work will be pushed at the rate of at least one mile a day. There is at this place already, a sufficient quantity of iron to lay several miles of the road, and the remainder will be on hand as soon as it is required. The road is to be a continuous track, and when completed will be one of the best roads in the Northwest.

This road opens the best pine country in Wisconsin, and also the extensive farming lands of the northwestern counties, and when completed, will do an extensive freight and passenger business, and prove one of the best paying roads in the state.—*Tomah Journal.*

The Hoosac Tunnel.

The Governor and Council have ordered that the bid of Messrs. Carpenter, Odiorne & Gardner for a contract for the completion of the work upon the Hoosac Tunnel be rejected, they having failed to comply with the condition required. They have also ordered the Commissioners to stop all excavation in the Tunnel at East End, and at the East Heading at the West Shaft. Messrs. Carpenter, Odiorne & Co., have petitioned the Supreme Court for a writ of mandamus to compel the Governor and Council to accept a bond for the performance of the contract alleged to have recently been made with the Commonwealth in reference to the completion of the Hoosac Tunnel. The Governor and Council, it will be remembered, required a deposit of bonds to the amount of $500,000. Judge Colt refused to grant the petition on the ground that it was by no means settled that the Court ought in any case to compel another branch of the government to discharge an official duty devolving upon them by the laws of the Commonwealth, and also that the petition in connection with the statute to which it refers did not show a binding contact between the petitioners and the Commonwealth.

Pittsburg and Connellsville Railroad.

The contract for the finishing of the various sections of the Pittsburg and Connellsville Railroad through to Cumberland Valley will be let as soon as practicable, the proposals having ceased on the 20th, and as the terms of the contract make it bounden upon those receiving the same to commence work one month after the closing of such contract, we may confidently expect to see the work fairly inaugurated this fall.

☞ The directors of the Maine Central Railroad have decided to extend the line to Portland, and a survey will be made at once. A charter for the extension was granted by the Legislature of 1867.

Portland and Ogdensburg Railroad.

A meeting of the friends of this enterprise was held in Portland on the 28th ult. The managing agent, Samuel J. Anderson gave an extensive, account of the route proposed, and the committee's recent examination of it and its important connections and advantages, showing its superiority as a great Western route, as to distance as well as connections, even over other proposed routes. The great development of the West, and the necessity for an outlet for its vast products, was referred to, and the benefit in store for Portland as the Eastern American terminus of the great highway to Europe was presented. Vermont has subscribed forty per cent. of the cost of the section in that State, and Maine is called upon to do as well. Portland, we believe, has subscribed $750,000, and other towns, $150,000, leaving some $300,000 to be obtained from individuals, to complete the required amount needed to build the road to the Connecticut River. A committee of fifteen was appointed to solicit subscriptions.

Marginal Freight Railway.

A final hearing on the subject of the location of the Marginal Freight Railway was had in Boston at the office of the Superintendent of Streets on the 28th ult.; and at the regular weekly meeting of the Board of Aldermen on that day an order was unanimously passed that permission be given to the company to lay down tracks in the following streets of the city, viz: Lincoln, Tufts, East, Cove, Beach, Federal, Broad, India, the street east of the Custom House, Commercial, Causeway, Andover, Minot and Lowell, as authorized by chapter 170 of the acts of the Legislature of Massachusetts, of 1867—the whole work of constructing said tracks, and the position of the same in the streets, to be under the direction of the Committee on Paving and the Superintendent of Streets, and approved by them.

Dorchester and Delaware Railroad.

This road, running from Seaford, Delaware, to Cambridge, Maryland, is completed five miles beyond Federalsburg, and it is said will be finished to New Market by the last of next month. This will be considerably more than half the whole length of the road, and indicates very satisfactory progress indeed. The company has contracted for a new engine to cost ten thousand dollars; it is to be called the "Wilson Byrne," after the President of the road.

☞ The Paterson and Little Falls Horse Railroad Company will receive proposals until the 5th inst., at noon, for the construction of about 1¾ miles single track horse railway, with turnouts, at Paterson, N. J. Plans and specifications will be exhibited at the office of H. Hockenberry, Esq., Superintendent, 15 Main street, Paterson.

☞ The Grand Rapids *Eagle* says that several car loads of iron have been received for the Grand Rapids and Indiana Railroad, and that track laying will be soon commenced in good earnest. One half the road between Grand Rapids and Kalamazoo is ready for the iron—nine miles on the north and fourteen miles on the south end.

☞ The Chicago *Railroad Gazette* says that the Des Moines Valley Railroad Company has secured the means necessary to build and equip their road from Des Moines to Fort Dodge.

Paterson and Newark Railroad.

The Binghamton *Republican* says that the new President of the Erie Railway Company has recently consummated a bargain which must exercise an important influence on the business of this road, and bring about a revolution in railroad management in the State of New Jersey. He has leased for a term of years the Newark and Paterson Railroad, and acquired with it the power to extend the track to the city of New York, and to the south or southwest.

The road thus leased is apparently an insignificant affair. It is less than fourteen miles long, but its franchise contains the clause empowering the building of branch roads, "in order to connect said road with other road or roads running to the Hudson, or to the south or southwest." By his contract, Mr. Gould has obtained a fork of the Erie Railway from Paterson to Newark. The business thus obtained is greater than is often supposed. Newark does more manufacturing than Pittsburgh, and the Erie Railway acquires a large share of the trade. The station of the company in that city is right in the very heart, while the other roads only touch it—on the outskirts.

Connecticut Western Railroad.

A meeting of Hartford capitalists was recently held to consider the subject of the new Connecticut Western Railroad. Charles R. Clapman, Mayor of Hartford, was Chairman. Mr. Barnes, a railroad engineer, made a statement in regard to the probable cost of the road, calculated after a careful survey. The distance from State line, the western terminus, to Hartford is nearly 66 miles, and the cost of building and equipping the road be estimated at $259,000. The route skirts along the northern line of the State. For the first three years the company agree to pay six per cent., hoping that by that time it will be a paying road, and 45 miles of it are already under contract. The towns on the route will subscribe liberally, and it was voted to request the selectmen of Hartford to call a meeting to see what action the people of that city will take upon a proposition to take $500,000 of the stock.

Iowa Central Railroad.

Henry M. Clement, of Eddyville, agent for collecting the stock subscribed to the Iowa Central Railroad, has published a circular which shows that the right of way for the entire line has been secured; the subscription books show enough stock to complete the grade from Oskaloosa to the State line; there is already about 50 miles of grading south of Oskaloosa, and about 40 miles north of that point; a good commencement for a bridge across Des Moines river, and the company has expended over $200,000 in grading from Oskaloosa to the State line.

☞ The Monongahela Valley Railroad Company having completed the survey of their road, and obtained letters patent from the Governor, will hold an election for officers on the 14th inst., at the office of T. W. Briggs, Pittsburg. J. B. Stilley is Chief Engineer.

☞ The Cleveland, Wooster and Zanesville Railroad Company has been organized with Gen. J. S. Casement as President.

☞ The contractors on the Knox and Lincoln Railroad are progressing finely with their work.

Boston, Hartford and Erie Railroad.

The engineers employed in the construction of the Boston, Hartford and Erie Railroad have had various sections of the road assigned to them, as follows: Mr. Emil David, late of the Allegheny Valley Railroad, of Pennsylvania, has the first eight miles, running west from Waterbury to Towantic Summit; headquarters near Millville. Mr. Charles E. Webster, late of the Lehigh and Susquehanna Railroad, of Pennsylvania, the next eight miles; headquarters at Southbury. Colonel L. J. Wright, late of the Allegheny Valley Railroad, the next eight miles, reaching to Hawleyville, on the Housatonic Railroad; headquarters at Sandy Hook. Mr. John K. Brown, principal assistant engineer, retains his office at Waterbury.

Hudson Highland Suspension Bridge.

The surveys for the Hudson Highland Suspension Bridge have been completed, including in the examinations both banks of the Hudson River, from Verplanck's Point to Buttermilk Falls. The plans have been prepared with detailed maps of everything necessary to form an opinion of the best place to locate the bridge, and a board of engineers has been convened to decide upon the location. It is understood that arrangements have been made with capitalists under which the work is to be commenced at once.

Union Central Railroad.

Proposals will be received until the 10th inst., for the grading, masonry and bridge work on the Western Division of the Union Central Railroad, extending from Tamaqua westwardly. Also, the Middle Division, from Tamaqua eastward to the Summit, between the Schuylkill and Lehigh rivers. Also, the Eastern Division from said Summit, through the Mahoning Valley to the Lehigh river. Proposals may be made for the whole or a portion of the work in sections or divisions. Address J. W. Geary, Engineer, Pottsville, Pa.

American Central Railroad.

The Galva *Union* says that the first ten miles of the American Central Railway are graded, ready for the ties and iron. On the 10th of October eighteen miles more of the grading will be finished. This will bring the work to within four miles of Viola. At or near Viola there is considerable grading to do. The whole of the grading from Galva to New Boston will be finished by the 15th of November. The ties, iron, and bridges are expected to commence arriving at Galva by the 10th of October and the road be in operation from Galva to New Boston by the 1st of January next.

☞ The Hastings (Minn.) *Union* announces the arrival at that place of a quality of iron for the Hastings and Dakota Railroad, and that the track-layers have commenced their work, anticipates that the cars will be running by the first of November.

☞ C. C. Gilman, President of the Iowa River Railroad Company has removed from Dubuque to Eldora, where the offices of the company are established.

☞ the Minnesota Valley Railroad is completed to Stony Creek, about half way between St. Peter and Mankato.

☞ The route of the Lawrence, Olathe and Kansas City Railroad is being surveyed and it is thought that it will be completed at an early day.

☞ The Boston *Traveler* says that the Council have decided to reduce the amount of securities required on the part of bidders for completing the Hoosac Tunnel from $500,000 to $150,000. If this prevails the lowest bidders, whose contract was rejected on the ground that sufficient securities had not been offered, may renew their application, as they are ready to furnish this amount.

☞ Mr. J. C. McMullen, Assistant General Superintendent of the Chicago and Alton Railroad, has been appointed General Superintendent—Mr. Blackstone resigning the Superintendency only that he may give his whole time to his duties as President.

☞ The gross receipts of the Philadelphia and Reading Railroad for the month of July, 1868, were $314,472, against $864,636 in July, 1867—a decrease of $550,164.

☞ A meeting to consider and act upon the question of raising the means to construct the line of the New Hampshire Central Railroad across the State of New Hampshire, from the boundary of Maine, through the valley of the Ossipee River, to the line of the Northern Railroad at Danbury, was held at West Ossipee on the 22d ult.

☞ The Louisville *Journal* states that the Ohio River Bridge Company have nullified the contract for their bridge at that place, because the contractors were not proceeding rapidly enough with the work. The building will go on under the auspices of the company.

☞ The Dixon *Telegraph* says it is probable that a section of the Dixon, Peoria and Hannibal Railroad will be early put under contract, from Yates City to Buda, on the Chicago, Burlington and Quincy Road, a distance of about forty miles.

English Copper Co. Rails.

1,500 TONS of this well-known make, 56 lbs. per yard, "Erie" pattern, here and to arrive, for sale by

HEYERDAHL, SCHONBERG & CO.,
22 William street, New York.

2,000 TONS FISH-BAR RAILS, 56 lbs. per yard, of approved English make and section, for sale to arrive at this port.
Destination can be changed to Southern port if desired.

HEYERDAHL, SCHONBERG & CO.,
22 William street, New York.

PROPOSALS FOR $40,000 MARKET STOCK.

Sealed proposals will be received at the Comptroller's office until Tuesday, October 20, 1868, at 2 o'clock P. M., when the same will be publicly opened, for the whole or any part of the sum of forty thousand dollars of market stock authorized by chapter 203, Laws of 1868, and by an ordinance of the Common Council, approved by the Mayor September 25, 1868.

Said stock is to be issued for the purpose of providing means for the completion of the market upon the land lying between Sixteenth and Seventeenth streets and avenue C and East River, and will bear interest at the rate of seven per cent. per annum, payable semi-annually, on the 1st day of May and November, in each year, and the principal will be redeemed on the 1st day of May, 1897.

The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premium thereon.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payments.

Each proposal should be sealed and endorsed "Proposals for market stock," and enclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids if the interests of the corporation require it.

RICHARD B. CONNOLLY, Comptroller.

CITY OF NEW YORK, DEPARTMENT OF FINANCE, September 26, 1868. 3t40

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., September 14, 1868.

SEALED PROPOSALS will be received at the Office of the Company in Oneida, N. Y., until the 30th day of October, 1868, at noon, for the GRADING, MASONRY and BRIDGING of that portion of the New York and Oswego Midland Railroad, extending from Sidney Plains to the village of Walton, in Delaware County, a distance of about 22 miles. Also, for that portion of the line from Westfield Flats to Centreville, in Sullivan County, a distance of about 25 miles.

Proposals will also be received at the same time and place, for the Grading, Masonry and Bridging of the Delhi Branch, extending from the Main Line at Walton to Delhi, in Delaware County, a distance of about 16 miles.

The company will entertain separate proposals for Bridging only, both on the Main Line and Branch.

Plans, Profiles and Specifications will be ready for examination at the office of the Resident Engineer, in the village of Walton, for that portion of the line in Delaware County, including the Delhi Branch, on and after the 20th day of October next, and also at the office of the Resident Engineer in Middletown, Orange County, for that portion of the line in Sullivan County, at the same date.

Contractors who may desire to examine the work will receive all necessary information at the respective offices of the Resident Engineers above named.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer. 5t39

COLUMBUS, CHICAGO AND INDIANA CENTRAL RAILWAY COMPANY, No. 57 BROADWAY,
NEW YORK, Sept. 25, 1868.

THE INTEREST COUPONS FROM THE FIRST Mortgage Bonds of the Chicago and Great Eastern Railway Company, due Oct. 1; also the Interest Coupons from the Consolidated First Mortgage Bonds of the Columbus, Chicago and Indiana Central Railway Company, due Oct. 1, will be paid on and after that date, less Government tax, upon presentation at this office.

B. E. SMITH, President.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

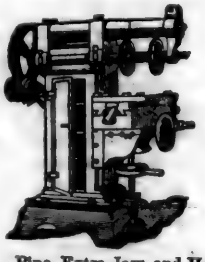
We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.



Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,
69 & 71 Broadway, New York.

UNION VISE COMPANY,
61 Water Street, Boston, Mass.

Pipe, Extra Jaw, and Heavy Vises warranted for Blacksmiths' and heavy work. New style Wood Vise. Covered Screw Vises—Forty styles and sizes constantly on hand. Standard Milling Machines—simple, easily adjusted, great capacity, power and strength—three sizes: large, 2,300 lbs.; medium, 1,600 lbs.; small, 950 lbs. For sale by the trade.

G. H. NOTT, Pres't.
A. H. BRAINARD, Supt.

Godeffroy Brancker & Co.
42 Exchange Place, New York,

are prepared, as Sole Agents in the United States for the Prussian Mining and Iron Co., of Duisburg, Westphalia, to contract or sell in quantities to suit purchasers (delivered in either New York or Philadelphia) the celebrated

V. H. SPIEGELEISEN

used so extensively for the manufacturing of

Bessemer Steel.

This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,

STEEL RAILS

Manufactured by

G. ARNDT & CO.,

of Dortmund, for which latter firm they also have the Sole Agency in the United States.

For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m32

820 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **103**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
SEPT. 14, 1868.

Intercolonial Railway!

TO CONTRACTORS.

THE Undersigned is instructed by the Government of Canada to inform intending Contractors that at an early day orders will be invited for the execution of certain portions of the INTERCOLONIAL RAILWAY, between River du Loup and Rimouski, in the Province of Quebec, between Truro and Amherst, in the Province of Nova Scotia, and between Dalhousie and Bathurst, in the Province of New Brunswick.

It is intended to let the work in Sections or Divisions, ranging from 15 to 35 miles, according to the situation and local circumstances.

The surveys are now in progress, in part completed, and the object of this notice is to afford intending contractors ample opportunity of examining the ground at once.

The Plans, Profiles, Specifications, Conditions of Contract, Forms of Tender, and other documents required for the information and guidance of Contractors, are now being prepared, and when ready, of which due notice will be given, will be seen at the Railway Engineer's Office, in Halifax, St. John, Dalhousie, Rimouski, River du Loup and Ottawa.

SANDFORD FLEMING,
Chief Engineer.

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

American Railroad Journal.

New York Saturday, October 10, 1868.

Lawrence, Olathe and Kansas City R. R.

This road will be 24 miles in length, extending from Lawrence to Olathe. At Olathe it will connect with the Kansas City and Fort Scott railroad, now in course of construction. An arrangement has been made by which the trains of the former will run over the road of the latter company between Olathe and Kansas City, a distance of 20 miles. The preliminary surveys have been made, and the company will soon advertise for bids to build the road. The assets of the company are said to be ample, consisting of money and county and city bonds. The officers are: President, George W. Deitzler; Vice President, S. O. Thatcher; Secretary, B. W. Woodward; Treasurer, Theodore Peohler.

Michigan Air Line Railroad.

We learn from the St. Clair (Minn.) *Republican* that the contract for the construction of this road from Ridgeway to the Indiana State Line, 210 miles, has been awarded to Messrs. J. E. Young & Co., of Chicago, for $1,600,000, or $7,617 per mile. Some 200 men are now at work on the line between Ridgeway and Romeo. The route is level and easy to grade, and good progress is being made. It is expected that portion of the line will be ironed this winter. Grading will soon be commenced on the line between the State Line and Tecousha.

SEVEN PER CENT. INTEREST IN GOLD.

PRINCIPAL ALSO PAYABLE IN GOLD.

The Rockford, Rock Island, and St. Louis Railroad Company offer a limited amount of their First Mortgage Coupon Bonds at 97½ and accrued interest in currency.

These bonds pay seven per cent. interest.—Feb. 1, and Aug. 1—in gold coin, *free of Government tax.* The principal is also payable in gold. They have fifty years to run, and are convertible into stock at the option of the holder. A sinking-fund is provided sufficient to pay off the whole mortgage at maturity.

Each bond is for $1,000, or £200 sterling. Interest is payable in New York or London, at the option of the holder.

These bonds are amply secured, being a first and only lien upon 375 miles of railroad equal in intrinsic value to any line of similar length in the state; upon the Company's franchises, rolling-stock, and other property; and upon all its coal-lands, of which it has 20,000 acres, estimated to contain A HUNDRED MILLION TONS OF COAL. These lands, on the completion of the railroad through them, will be of incalculable value, whether considered as to their intrinsic worth or as a source of business and profit to the Company.

The cost of the line, thoroughly built and equipped, including the cost of all coal-lands, will be about $17,000,000, or $45,000 per mile.

To meet this expenditure the Company have a stock subscription of $5,725,000; additional subscription pledged, and which will undoubtedly be made and duly paid in, $2,900,000; making a total of $8,625,000. Less, expended on the line for labor and materials, $1,880,000; leaving unexpended stock subscription, $6,745,000.

The whole amount of bonds to be issued will not exceed $8,500,000.

The earnings of the line will probably be threefold what is required to pay interest on the bonds. The road passes through the finest district of Illinois; and both its local and through business will be very great.

Of the entire line, 175 miles are now graded, and the work is proceeding rapidly and successfully. A large quantity of rails has been contracted for, to be laid early in the Spring.

The first division of fifty miles, giving an outlet to the coal, will be finished by January 1st, 1869, and the whole road by October 1st, 1869.

The Trustee for the bondholders is the UNION TRUST COMPANY of NEW YORK.

At the present price of gold, the bonds pay an income of over 10 per cent. in currency.

GOVERNMENT AND OTHER SECURITIES received in payment at market rates.

Circulars giving full particulars may be had at the office.

For sale at the office of the Company, 12 Wall street.

H. H. BOODY, Treasurer.

Peoria and Rock Island Railroad.

This road will be about 90 miles in length, extending from Peoria, *via* Princeville, Toulon, Galva, Cambridge and Moline to Rock Island. The location of the road between these places has already been decided upon, with the exception of that between Cambridge and Moline. Bids are invited by the directors, until the 13th inst., for grading, bridging and tieing the entire line from Peoria to Rock Island. Bids are to received on different routes into Rock Island, and probably the figures of those bids will decide the route.

Peoria, Pekin and Jacksonville Railroad.

This road is 147 miles in length, extending from Peoria to Jacksonville, Ills., a point on the Great Western Railroad, 34 miles from Springfield. About 71 miles, from Peoria to Virginia city, have been completed, and the work of grading for the extension of the road to Jacksonville, about 25 miles, has been commenced. Thos. King, Esq., of Pekin, Ills., is Chief Engineer of the road.

☞ The first train over the Minnesota Valley railroad entered Mankato on the 3d inst. Mankato is about 20 miles from Le Sueur, the former terminus of the road, and 84 miles from St. Paul. The final terminus of the road will be Sioux City,

Iowa. J. W. Bishop, Esq., of St. Paul is Chief Engineer.

Richmond and Petersburg Railroad.

The receipts from operations of this road during the years ending September 30, 1866 and 1867, were:

	1866.	1867.
From passengers	$79,293 60	$70,965 05
" freight	55,186 36	49,538 31

Miscellaneous	1,127 85	1,025 19
	$107,097 09	$82,633 09
Earnings less exp	$60,783 79	$53,823 62

The receipts are $31,424 17 less than they were last year, and the actual expenses of working the road have been reduced $24,464. The extraordinary expenses were as follows:

New buildings	$138 800
New cars	9,732 59
New machinery	475 00
Reconstruction	2,288 95
Manchester and Petersburg turnpike	541 76
James River Bridge reconstruction	104 14
Repairs of bridges, omitted in last year's Report	1,000 00
	$14,280 44

The total expenses, both ordinary and extraordinary, amount to the sum of $96,913 53. Deducting this from the gross earnings, the net earnings will be $39,543 18. The report says:

The just expectations of the board, expressed in their last annual report, have been disappointed as to the revenue of the company for the past year. This road has not only shared, like other railroads, in the general stagnation of business, and the recurrence of a failure in the crops of this State, and those south of us, but has had a special cause of diminution of its receipts, in the limited quantity of coal furnished for transportation, caused by disasters to the Clover Hill Mines. That branch of our business has, however, already been largely increased for several months past; and so soon as the pits are again in full operation, as we are assured they will be by the close of this year, the quantity of coal to be moved will reach, if not exceed, that annually carried before the war.

The three railroads between Acquia Creek and Weldon, have long labored under the serious disadvantage of having to transfer passengers, and their baggage, through the streets of Richmond and Petersburg in omnibuses and wagons. This route was consequently in danger of seeing its through travel diverted to more comfortable lines. It is with much satisfaction, therefore, that the Board can now inform the stockholders that these impediments to the successful operation of this road have at length been removed. On the completion of the connecting tracks through the two cities, an agreement was entered into by the three companies to run through trains of passenger, mail, express and baggage cars, continuously over their roads from the Potomac to the Roanoke. Accordingly a suitable number of superior first class cars, with all the modern improvements, have been provided at joint expense. These trains commenced to run through on the 20th of August, 1867, and the marked increase in the through travel which began, and has continued from that date, proves the wisdom of the efforts to perfect this as one of the most comfortable and expeditious routes through the Atlantic States.

The benefits of this continuous line of railway will not be confined to travel, but, so soon as through tariff arrangements shall have been completed south of this city, we may reasonably expect a considerable addition to the general freight business of the road.

The compensation for carrying a twice daily mail over this road has recently been increased to one hundred and fifty dollars a mile, or one-half of what was paid for similar service before the war.

The company have 7 locomotives, 4 first class and 6 second class passenger cars, 3 baggage and mail, 2 express, 29 freight, 15 platform, and 28 coal cars. Number of miles run, 71,591. Cost for repairs per mile run, 7½ cents. Number of passengers carried, 54,780, of which 20,405 were through, 33,793 local, and 582 Clover Hill passengers. Number of passengers carried one mile, 1,146,910. Tons of freight transported (including 16,414 tons coal) 35,647.

General Statement.

Cost of road and property including interest		$922,822 39
Less loss by fire, April 3d, 1865		254,318 30
		$668,504 09

President.—Charles Ellis.

Directors.—R. B. Haxall, T. H. Wynne, Dr. D. W. Lassiter, J. Davenport, Jr., B. H. Nash.

Treasurer.—M. W. Yarrington.

Engineer & Sup't.—E. H. Gill.

Montgomery and West Point Railroad.

The earnings of this road for the years ending February 28, 1867 and February 29, 1868, were as follows:

	1867.	1868.
From passengers	$226,127 19	$158,439 77
" freight	214,880 07	245,274 54
" U. S. mail	8,000 00	8,000 00
	$449,007 26	$411,714 31
Expenses, viz:		
Maintaining road	$76,970 28	$90,830 02
Maintenance of rolling stock	64,818 16	48,088 70
Operating	106 253 60	115,450 91
Taxes	13,563 92	13,622 70
	$261,605 01	$267,992 33
Leaving	$187,402 25	$143,721 98

From which deduct extraordinary expenses, viz:

Bridges and culverts	$14,890 10	
Depots, division houses, etc.	19,239 25	
Rebuilding and changing gauge of locomotives	12,159 25	
		46,288 60
Leaving a balance of		$97,433 98

which has been applied to the payment of interest on the debt of the company. The President in his report says:

The Report which I have now to submit to you, of the operations of the road for the past year, is not as favorable as I had every reason to hope it would be on the 1st of November last, when eight months of our railroad year had expired.

Up to that time, the receipts of the road from the 1st of March, 1867, amounted to	$270,588 33
And for the same period of the previous year amounted to only	249,868 05
Showing an increase of	$20,720 28

As we had through arrangements for the transportation of cotton to New York both by way of Charleston and Savannah, offering inducements both in shortness of time and low rates, and as the disposition not only in Montgomery, but in Selma, and on the line of the Alabama and Florida Railroad, was to ship cotton to New York, we had no reason to apprehend any decrease in our income for the remaining four months of the railroad year, but that it would certainly be equal to what it was for the same period of the previous year.

Early in November, however, the steamers running from both Savannah and Charleston to New York, broke up the contract and advanced their rates. We could give no bills of lading through to New York, which at once turned shipments to Mobile and New Orleans. Cotton rapidly declined, affecting the whole population of the country, and the receipts from the road decreased so largely as to seriously embarrass the company.

For the four months from November 1st, 1866, to March 1st, 1867, they had been	$199,139 21
For the four months from November 1st, 1867, to March 1st, 1868, they were only	141,125 98
Showing a decrease of	$58,013 23

Relying certainly upon this income, I had made no other provision for the payment of our Semi-Annual Interest, and although, when it became apparent to me that I must look to some other source, I made every effort, I was unable to provide for more than that portion of it due in New York, and had to submit to the bitter mortification of failing, for the first time in the history of the company, to pay all its coupons promptly when due. I have since then provided for the interest due at the National Bank of Augusta, and hope by the 1st of July to be prepared to pay up

all past due coupons, and those due on that day. Hoping from week to week that some satisfactory arrangements could be made with the steamers, I did not deem it advisable to lessen the working force in the various departments, but to keep prepared to move freight rapidly if they should offer. Finding, however, in January, but little hope of any settlement of the matter so as to give us an increase of business, I directed the Superintendent to reduce the number of employees in every department, to cut down in every possible way the expenses of working the road, and to give notice that from and after the 1st day of February, the pay of every officer and employee retained in service would be reduced Twenty per cent., which order was promptly carried out, and although this reduction in wages bears very severely upon some of our best men, it affords me pleasure to say, I have heard but few complaints, for our employees as fully appreciated the necessity of reducing the expenses, as did those having the management of the road. I hope before the close of this year, such an improvement may take place as will warrant some increase on their present wages.

For your information, and for future reference, I submit a statement of what was the financial condition of the company before the war, and what amount has been expended in restoring the road and its outfit to its present condition.

On the 1st of March, 1861, the outstanding bonds and obligations of the company were reported as...		$922,621 77
During the war, and up to the 1st of March, 1864, these obligations were reduced by payment of b'ds, amounting to		196,121 77
And on 1st of March, 1864, the bond debt of the company was		$726,500 00
But when we were enabled to ascertain the condition of our debt, we found that a large amount of our coupons, which fell due between 1861 and 1865, had been held back, and to provide for them, and for the settlement of debts contracted during the war, which were generally compromised, required		300,000 00
Making a total of		$1,026,500 00
As the debt of the Co. at the close of the war.		
The total of outstanding bonds and obligations of the company, of every kind, up to the 1st of March, 1868, amounts to		1,473,337 65
Leaving the sum of		$446,837 65

Which has been expended to repair and rebuild the road and outfit, and which has been provided for by the creation of new debt. Although it is a large sum, I feel confident you will, upon examination, find that it has been judiciously expended.

When the war closed in 1865, we had no depot buildings, work shops, or bridges, and only one old engine and five cars fit for service. Now you have twenty effective locomotives and 162 cars, depot buildings, work shops, station houses, and bridges have all been rebuilt, and the gauge of the road changed, the value of which is being most satisfactorily demonstrated every day, for with it we are now in a condition to do, with more ease and dispatch, a business yielding one million of income, than we could have done half that amount of work before the change was made.

The immediate future of the road is not very encouraging. It is so located as to be seriously injured by roads now in progress, but which may, to some extent, be obviated by building the road to Selma, and, under the provisions of the act incorporating the Western Railroad Company, make it a part of your road. The Selma, Rome and Dalton Road will no doubt be completed and in operation to Rome within this year; and when in operation it will afford to the through travel to Selma and the country west of it, a shorter route than by way of Montgomery. The completion of the connection with Selma will still enable us to retain the freights to and from the East for all that section of the country; but if we depend on boats between here and Selma, and fail to build the road, freights will take the same route. It is, therefore, absolutely necessary for the protection not only of your road, but of the entire line east of Montgomery, connecting with the Atlantic at Charleston and Savannah, that the connection with Selma should be made, and for months past I have made every effort to obtain the necessary aid to do so.

Before the work was commenced in 1860, I had assurances from the Central Railroad Company of Georgia, that it would, upon certain conditions, aid in building the road, by a guarantee of bonds jointly with the Georgia Railroad Company. In August last, I made application to these companies to give me their endorsement for $500,000, with which I could, by this time, have built the road to Weaver's Bluff, on the Alabama River, within six miles of Selma. The Central Railroad Company agreed to do so, but to my great surprise and disappointment, the Georgia Railroad Company refused. I have recently renewed the application to the Central Railroad Company, proposing that, if they will take the sole responsibility of guaranteeing the bonds, this company and the Western Railroad Company will give to the Central Railroad Company the entire control and arrangement of freight rates to and from the Atlantic over both this and the Western Railroad; for I can see no justice in giving to the line which will not aid in the completion of this important connection, any of the advantages of it; and if the Central Railroad Company will give the necessary aid, that company should derive the benefit of it.

Without the aid of the Selma connection, I can see but little hope of making more income than will pay working expenses and provide for the interest on your debt.

I cannot estimate the receipts for the year to come at over		$400,000
The expenses cannot be less than 65 p. c.		260,000
Leaving a net income of		$140,000
Which will provide for the payment of interest on your entire debt		$120,000
And leave a net income of only		$20,000

If the road to Selma can be built and consolidated with your road, the cost of the entire road would be—

Of Montgomery and West Point Railroad, in stock		$1,644,224
Amount of debts due		1,500,000
		$3,144,224
Of Western Railroad stock	$250,000	
Debt	750,000	
		1 000,000
Total cost of road 163 miles long		$4,145,224

Which would be in bonds, $2,250,000; in stock, $1,894,244.

Now with even an income of		$700,000
And expenses at		420,000
Leaving net		$280,000
After payment of 8 per cent. per annum interest on the debt of $2,150,000		180,000
There would be left the sum of		$100,000

or within a fraction of 6 per cent. on the capital stock. But such would be the commanding position of the road as a part of the shortest freight line from the Atlantic to the Mississippi at Vicksburg, that, I feel confident, as soon as the quiet of the country is restored, the receipts would run up to one million per annum; and yet I hope that, upon reflection, the directors of the Central Railroad Company will come to our aid and enable us to complete this important work.

As our extraordinary expenses will hereafter be very small, and our current expenses kept down to the very lowest point consistent with the safe working of the road, and the prompt transportation of the freight and passengers offered, I hope to be enabled to work through with our present embarrassments, the most serious of which is our floating debt. It costs largely over the legal rates of interest to manage it, and I have used every effort to fund it with our second mortgage bonds which the board gave me authority to issue, to the extent of $400,000, which I yet expect to be enabled to make available for this purpose; but deemed it better to struggle on with the debt in its present condition, than to submit to the great sacrifice at which I must have sold them at any time during the past year.

The equipment of the road consists of 21 locomotives, 5 first-class and 8 second-class passenger cars, 6 baggage and mail, 8 conductor's, 2 express, 77 box, 24 platform, 1 wood, 8 crank, and 21 repair cars. The number of through passengers carried was 14 626; do., way, 29,278—total, 44,504, against 50,618 in 1867, a decrease of 6,114. Total number of bales of cotton transported, 57,405, against 25,226 in 1867, an increase of 32,179.

The Liabilities and Assets of the company March 1, 1868, were as follows:

LIABILITIES.

Capital stock		$1,644,224 00
Bonds due in 1863 and 1865		24.000 00
Mortgage bonds due in 1866		33,500 00

American Railroad Journal.

Saturday, October 10, 1868.

Stock Exchange and Money Market.

The Money Market was quite active and excited during the earlier half of the week under review. The available supply of capital was seriously reduced, chiefly by the manipulations of the *bear* operators, who endeavored to produce a closeness in the market, adverse to ruling values at the Stock and Gold Boards, to which we made allusion in our last. The best street borrowers, under this temporary artificial stringency, were unable to obtain accommodation at less than 7 per cent. Very many parties, urgently needing aid, were compelled to pay a commission in addition to this figure, and in not a few instances, even equal to the full legal rate in gold, or $9.80 per cent. per annum in currency. Discount applications were practically uncurrent, during the severe pinch, part of which was due to the action of the city banks, in preparing for their quarterly return of Oct. 5, to the Treasury Department. During the latter half of the week, under review, the activity and unusual firmness in the market diminished perceptibly, and by Wednesday afternoon, the offerings of money gained so decidedly on the inquiry for borrowers, that rates closed quite easy at 6@7 per cent. on call, and 7@8½ per cent. per annum in the best discount form, the tendency having been unmistakably against lenders. The city banks, last week, lost $7,149,157 of their deposit averages, $3,347,129 of the legal tender reserve, (temporarily to re appear on the next weekly exhibit,) and $846,148 of their specie hoard. Their loans were cut down $1,719,676, while their circulation was augmented $104,035. The public debt statement for Oct. 1, showed an encouraging increase of $9,244,946 in the coin balance, in the ownership of the Treasury, with a reduction of $4,925,220 in the private deposits of coin, during the past month. The currency reserve was diminished $1,705,076, placing the aggregate of lawful money in the Treasury vaults on the 1st inst., at $13,365,994, against $15,071,070 on the 1st ult. The aggregate cash (coin and currency) reserves of the department on the 1st of October, stood at $110,257,841, against $107,641,971 on the 1st of September. The outstanding volume of lawful money on the 1st inst., was precisely the same as on the 1st of September, namely $356,021,073 of plain legal tender notes. There were $6,822,070 of matured compound notes, and $5,251,930 of the same class of notes not yet matured, outstanding a week ago.

The specie reserve of the city banks is now $11,757,335, against $9,388,603 same time last year. The city bank deposits are now $194,919,177, against $178,477,422 week ending Oct. 5, 1867. The legal tender reserve amounts to $60,240,447, against $56,853,585 same time last year. The circulation now stands at $34,154,806, against $34,025,581 same time last year. The loans are now $269,553,863, against $247,934,369 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $124,603,000 a day, against a daily average of $103,351,000 the preceding week, and $86,412,000 the week ending with Sept. 17, 1868. The current week's exchanges average about $124,000,000 a day. The city banks, last week, lost $846,148 of specie, $7,149,157 of deposits, and $3,347,129 of legal tender notes. They reduced their loans, $1,719,676; and increased their circulation, $104,035.

The New York Gold Exchange Bank reports for the week ending Saturday, the 3d day of October, 1868, the average amount of loans and discounts as $1,460,372; average amount of specie, $542,890; average amount of deposits, $1,347,586.

The Philadelphia Bank movement the past week shows a decrease in loans of $219,774; a decrease of $38,863 in specie; a decrease in legal tenders of $361,315; a decrease of $339,366 in deposits; and an increase of $381 in circulation. The Bank Clearings show an increase of $565,242, and the balances an increase of $473,192.

The outstanding amount of coin certificates on the 1st of Oct., was $20,236,400, against $25,161,620 on the 1st of Sept., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $292,000, and retired $2,197,241 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during September, reached $1,963,300.

The U. S. Sub-Treasury receipts, week ending with Oct. 8, were $16,895,577, including $2,814,

241 from customs duties; payments, $16,987,878, including $100,853 of coin interest; balance at the close of the week, $94,961,099, against $95,053,401, at the close of the preceding week, showing a decrease of $92,302. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,562,462 including $426,000 from customs; and payments, $2,919,660, including $17,000 of coin interest; on Tuesday, receipts, $2,194,161 including $556,960 from customs, and payments, $1,599,505, including $19,600 of coin interest. The balance at the close of business on Tuesday stood at $94,198,577, against $97,907,398, a week previous; and $92,291,486, on Sept. 16, 1868. The aggregate receipts of the office from all sources in September, were $54,298,704; aggregate payments, $47,354,171. The balance on the 1st of October was $94,499,990, or about 7 millions more than on the 1st of September, which amounted to $87,555,452. From this it appears that the bulk of the cash in the U. S. Treasury on the 1st of October, ($110,257,841) was held by the U. S. Sub-Treasurer at this port.

National Bank notes to the amount of $65,790 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,936,166, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,108,601, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,827,565. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342 019, 950; and for the public deposits, $38,065,850—making a total of $380,085,400. The Treasury Department last week redeemed and destroyed $326,300 of worn and mutilated fractional currency, and issued $753,188 of new. The outstanding amount of fractional currency on the 1st of October, was $32,933,614, against $31.802,218 on the 1st of September; $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues continue liberally, in both forms of customs and excises. They were so prolific at the close of October, as to enable the Treasury officials to cancel about a million of the recognized debt of the country. An increase in the debt had been generally anticipated, and, of course, the reduction occasioned an agreeable surprise in financial circles. The excises last week, yielded about 6½ millions; customs at the port of New York, $2,314,241, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $9,461,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $60 000,000.

The warrants issued by the Treasury Department during the month of September, 1868, to meet the requirements of the Government, amounted to $30,027,731 95 in the following sums: Civil, miscellaneous and foreign intercourse, $3,710,287 89; interest on the public debt, $9,671,375 03; war department, $8,959,301 02; navy department, $2,276,762 74; interior, pension and Indian departments, $5,410,005 27. The grand aggregate disbursements of the Treasury Department, during the month, including payments on account of interest and principal of the public debt, amounted to $46,441,194.

Gold has been much less active, since our last, the dealings having been within a range of from 140½ as the highest, to 139⅛ as the lowest figures of the week, and the latest quotations on Wednesday having been 140@140⅛. The speculative and export demand has been on a restricted scale, while the customs inquiry has been fair, approximating half a million a day. The Treasury Department closed the month of September with a coin reserve of $96,891,847, of which $20,236,400 belonged to private depositors, against a total coin reserve, on Sept. 1, of $92,570,901, including $25,161,620 deposited on private account. The increase in the coin owned by the Department, during the month, was fully $9,244,166, and this too, notwithstanding the disbursement of nearly five millions of coin interest, during the month.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $5,878,895, against $2,599,726 same time last year. The customs demand for Gold last week, averaged $385,707 a day; thus far, this week, it has been equal to $491,500 a day, or equal to a weekly aggregate of $2,949,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $3,699 and from California, $202,028 The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $92,848,867, against $96,842,480 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $31,852,095, against $23,424,598 in 1867, showing an increase thus far in 1868, of $8,225,469. The exports of specie, from this port, last week, were $283,128, against $297,393 same week last year; total, since Jan. 1, 1868, $66,386,537, against $42,449,212 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $100,853; since Jan. 1, 1868, $63,630,013, against $48,333,924. The specie exports from San Francisco, from Jan. 1, to Sept. 15, 1868, were $28,245,532, against $30,756,480 same time last year.

Government received $5,796,743 from customs at the port of San Francisco, from Jan. 1, to Sept. 12, against $5,289,918 same time in the preceding year.

There has been but little activity in the foreign exchange line, since our last, and rates have been without marked change, the tendency at the close having been in favor of buyers. Bankers' prime sixty day bills on London closed on Wednesday at 108⅝@108⅞, and on Paris to 5.22½c.@5.18¾; sight bills on London to 109@109¼, and on Paris to 5.17⅛c. @5.16¾. The offering of produce bills has been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,072,568, against $2,872,657, same week last year; total, since Jan. 1, 1868, $126,054,048, against $139,775,160 in 1867.

Government securities have been in moderate request, most of the week, closing with reviving firmness, on a more general call from investment buyers. To the funded debt, during September, there were added $3,662,550 of Five-Twenties, and $4,320,000 of Pacific Railroad aid bonds. To the three per cent. certificate issues, there were also added $3,025,000. The reductions in special items of the debt included of the six per cent. compound interest notes, $4,054,900; bonds of 1847 and 1848, $290,550; five per cent. treasury notes, $110,000; gold certificates, $4,925.220; seven-thirty treasury notes, $1,113,008; currency in treasury, $1,705,076; and in the total net debt, $970,595.

U. S. sixes of 1881 closed here on Wednesday at 114@114¼; U. S. Five-twenties of 1862, 113⅛@113¾; U.S. Five twenties of 1864 at 110⅜@110⅝; U. S. Five-twenties of 1865 at 110¾@110⅞; U. S. Five-twenties of 1865, consolidated, 113⅛@113¼; U. S. Five-twenties of 1867, 108⅞@109; U. S. Five-twenties of 1868, 109¼@109⅜; U. S. Ten-forties at 105@105⅛; U. S. Six per cent. currency bonds, 99@99½. The brokers are buying the outstanding October 1865 compound interest notes at 119.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 23.	Sept. 30.	Oct. 7.
Consols	94¼	94⅜	94½
U.S. 5-20's of 1862	73⅛	73	74
Erie	32	31½	31¾
Ill. Central	91½	95¼	95½

Railway and miscellaneous stocks have been more than usually active, since our last, and despite the pinch in Money, prices have been generally quoted higher, though quite irregular. The most notable improvement was in Pacific Mail shares, which advanced sharply.

General business has been fairly active, but prices have been quoted lower in most instances. Middling upland cotton closed heavily on Wednesday at 26 cents per lb. The stock of cotton now here is estimated at about 10,000 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 85,500 bales, against 45,000 bales same time last year; exports, same time 21,000 bales, against 9,750 bales same time last year; stock on hand at latest dates, 62,500 bales, against 75,000 bales same date last year. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. At the Live Stock market, this week, Beeves have been in less demand at from 10@16½c. per lb.; week's receipts, 7,160. Veal calves in moderate request at 8@12½c. per lb.; receipts, 1,303. Sheep and lambs less active at 4¼@7c., and 7¼@8c., respectively, per lb.; receipts, 44,900. Swine in demand and quoted back to 9@10¼c. per lb.; receipts, 21,693. The demand for foreign merchandise has been fair, and the changes in values have not been important. The total imports of foreign dry goods, last week, were $2,403,015, and the total amount marketed $2,259,558. The value of foreign merchandise imported last week, was $4,330,618—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $6,733,633, against $4,025,402 same week last year; from Jan.

1, 1868, $195,429,665, against $204,650,701 same time in 1867. The freight market has been unsettled, on a moderate business. For Liverpool we quote flour at 2s. by sail, and 2s. 3d.@2s. 6d. by steamer, per bbl.; grain at 7d. by sail, and 7½@8½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 20s.@30s. by sail, and 25s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 543.

The New York exports, exclusive of specie, for the week ending Oct. 6, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$2,872,657	$3,072,568
Prev. reported	136,902,503	122,981,480
Since January 1	$139,775,160	$126,054,048

The imports for the week ending October 3, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,546,195	$2,403,015
Gen. merchandise	2,479,207	4,330,618
Total for the week	$4,025,402	$6,733,633
Previously reported	190,011,111	186,894,124
Since January 1	$194,036,513	$193,627,757

The balance in the Sub-Treasury on Wednesday was $94,965,875 60.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

To Careful Investors.—The First Mortgage Thirty Year Six Per Cent. Gold Bonds of the Central Pacific Railroad Company, based upon the most valuable portion of the main line to and from the Pacific coast, are believed to possess advantages and assurances shared by no other corporate securities. More than 350 miles are now completed, and the whole road will be finished within a year. The local traffic is already very large and growing. The bonds can be had at 103 and accrued interest, in currency. For sale by

FISK & HATCH,
Bankers, &c., 5 Nassau-st., N. Y.

Indianapolis and Vincennes Railroad.

We learn that rapid progress is being made in the construction of this road. It will be 114 miles in length, and when completed, as it will be in a short time, will come under the joint charge of the Indianapolis, Cincinnati and Lafayette Co., the Columbus, Chicago and Indiana Central Company, and the Pittsburg, Cincinnati and St. Louis Company, as part of the through connection with these east and west lines, on a lease equivalent to (and so guaranteed,) $199,500, or 7 per cent. upon the first mortgage of $1,700,000 on the road, and over 6 per cent. upon the common stock of $1,300,000.

☞ J. E. Chamberlain of Newbury, Vt., and R. M. Bishop of Plymouth, have taken the contract for building the first section of the extension of the White Mountain Railroad from Littleton to the Wing Road in Bethlehem, a distance of six and one-half miles, the work to be completed by July next.

☞ The Dorchester and Delaware Railroad, running from Seaford, Delaware, to Cambridge, Maryland, is completed five miles beyond Federalsburg, and, it is said, will be finished to New Market by the last of this month. This will be considerably more than half the whole length of the road, and indicates very satisfactory progress indeed.

☞ The officers of the Cleveland, Worcester and Zanesville Railroad Company, are: J. S. Casement, President; O. M. Burke, Vice President; J. McDermot, Treasurer; and Charles C. Smith, Chief Engineer.

☞ Books for subscription to the capital stock of the Schenectady and Duanesburgh Railroad Company are now open at the office of the company in Schenectady.

☞ The fast freight line of the Baltimore and Ohio Railroad Company, which was withdrawn in July last, was resumed on the 5th instant, and will be hereafter run regularly.

Ontario and Huron Ship Canal.

To the Board of Provisional Directors of the Huron and Ontario Ship Canal Company:

GENTLEMEN.—It is more than a year since, invested with full powers from you, I proceeded to England for the purpose of negotiating with capitalists and contractors there, for the subscription of the capital stock and the construction of the works of the Huron and Ontario Canal. My overtures to the parties, whose co-operation I sought, were based upon the assumption of an anticipated grant of ten millions of acres of land, by the Canadian Government, in aid of the work, as well as upon a previous agreement with certain influential and responsible men of the United States, who, in consideration of sharing with English contractors to the extent of one-half of the contract for construction, were prepared to guarantee the subscription in the United States of one-half of the capital stock, or $20,000,000. To secure subscribers for stock and contractors to the extent of the remaining half, or $20,000,000, was, therefore, the object of my mission to England.

Arriving in London in the month of August, I found that the season when it is usual for persons whose circumstances permit it annually to leave the city, had commenced, and that consequently my prospect was a probable delay of three months before I could expect the presence of the class of men to whom it was desirable to submit my proposals. Although I felt this as a serious discouragement at the first, it proved to be no real disadvantage; for I was enabled to improve the interval in making numerous valuable acquaintances and obtaining much information, of which I was afterwards enabled to make good use. It was a matter of course that my first step must be to bring the project under the notice of engineers of such standing that their approval and endorsement, both as regards the feasibility of the work and the fairness of the estimate of its cost, would be satisfactory to the British public.

Having a letter of introduction to Mr. A. Rendel, C. E., who I found held a very prominent position as an Engineer, I called upon him, presented my credentials, and was most courteously received. After a short explanation of the object of my visit, an appointment was made with Mr. Sykes (your local engineer who accompanied me to England) and myself to meet him and go into a full disclosure of the project, and an examination of the plans, and topographical model. After several meetings with him, and when he had become sufficiently conversant with the scheme to appreciate it, he acknowledged that he felt much interested and impressed with the grandeur of the undertaking, and with the commercial and national importance of the work, and he had no doubt of its perfect feasibility, so far as the engineering features were concerned. The financial feasibility was altogether another matter in respect of which we should have the counsel and opinion of men whose acquaintance with and experience in the money market made them more competent to advise. Mr. Rendel then said that a work of such magnitude and importance should be put before the public of England, only in connection with names of the very highest standing in all the departments. The engineers, contractors and managers of the finance should be all men of the very highest class, so that their association with the undertaking would, at once, be a passport to public respect and confidence. With much modesty and candor he said he could not pretend to such a position in his profession as would give his name the weight necessary to do our project full justice, and he therefore suggested Mr. John Hawkshaw, C. E., and F. R. S., as the recognized head of the profession in England. With my permission he would invite Mr. Hawkshaw to meet Mr. Sykes and me at his office, and had no doubt that, if we could succeed in producing in that gentleman's mind impressions of our project corresponding to his own, he would willingly accept the position of chief consulting engineer, and if he was disposed to allow his (Mr. Rendel's) name to be associated with him, he (Mr. R.) would be glad to be connected with an undertaking which, to his mind, offered the promise of honor and credit to those who should be enabled to carry it into execution. Mr. Hawkshaw was then communicated with, and according to appointment made with him by Mr. Rendel, Mr. Sykes and I met him, and went fully into the matter. Mr. Hawkshaw, on this and subsequent occasions, showed himself to be a man of extreme caution; but after repeated and extended meetings with him and Mr. Rendel, at which Mr. Hawkshaw's assistant, Mr. Hayter, was present, and after the most patient and elaborate examination of all the plans, documents, and various *data* submitted for his consideration, and a most rigid cross examination as I might call it, of Mr. Sykes in reference to his measurements and quantities, the result was that he was perfectly satisfied of the practicability of the work, and also, as far as he could form a judgment, of the fairness and sufficiency of the estimate of the probable cost. He was pleased also to compliment Mr. Sykes on the able manner in which he had, in his comprehensive report, set forth the merits and details of so stupendous a work. He consented to the association of his name with Mr. Rendel's and they should be, jointly, the consulting engineer of the company.

Mr. Hawkshaw's professional reputation is literally world-wide; for each quarter of the globe, Europe, Asia, Africa, and America has in its turn, been the theatre of his operations. At one time in Holland, overlooking the great Amsterdam ship canal, at another in Egypt, at the request of the Viceroy, to survey and report upon the Suez canal, and then in India, where he and Mr. Rendel are both extensively engaged as consulting engineers of the principal Indian railways. To enable you to form some idea of Mr. Hawkshaw's professional position and experience, and of the value of his association with our canal, I refer you to what I may call my Exhibit No. 1—being the London *Engineering*, of January 10th 1868, in which you will find a short biographical notice of him, and a summary of various important works in which he has been engaged.

The important matter of the appointment of engineers being accomplished, it remained for me to find suitable contractors and financial managers. Consulting some well informed and influential friends I was directed and introduced to Mr. George Wythes, now the most experienced contractor in England, as decidedly the ablest and most eligible man for our purpose. The model, plans, &c., having for convenience been removed to the office of Mr. Hawkshaw, Mr. Wythes was invited to meet us there, which he accordingly did. This gentleman proved, on acquaintance, as prudent and as cautious as we had found Mr. Hawkshaw, and it was no light trial of the patience of one of my temperament to have to wait for the deliberate action of a man of slower habit, whose affluent circumstances, long experience, and position as a successful contractor, placed him above other influences than the intrinsic merits of the undertaking itself and who, therefore, would take his time before arriving at a conclusion.

The result, however, was all the more satisfactory; for if, like Mr. Hawkshaw, he was cautious and reticent of his sentiments, pending the discussion, like him also, he was convinced and satisfied in the end. He expressed himself as quite willing to take part in a conditional contract, and recommended that Mr. Brassy's co-operation be sought. Mr. Brassy was at that time absent from England and in poor health, but on his return Mr. Wythes invited him to a conference on the subject. Mr. Brassy had no hesitation in pronouncing a favorable opinion of the project, as grand in conception, and while most important in its bearing on European and American interests, pre eminently so in its relations to Canadian advancement and prosperity. Considerations of a private nature and bearing no reference to the merits of the undertaking, made him unwilling at his time of life, and in his then precarious health, to enter upon engagements of such magnitude, and therefore he declined participating in a contract, although he acknowledged himself very strongly prompted to it, both by the character of the work itself and the proposed association with Mr. Wythes, his previous experience with whom had been most satisfactory. Under the circumstances Mr. Wythes decided alone, to enter into a conditional agreement for the execution of the work in conjunction with and on the same basis as the United States contractors. Mr. Wythe's known wealth and prominence as a contractor will enable him, at any time, to command any co-operation that may be desired or necessary.

I refer to exhibits Nos. 2, 3 and 4, being letters of Mr. Hawkshaw and Mr. Rendel touching the engineering feasibility of the project and their satisfaction with the full and complete character of Mr. Sykes' report. Also to No. 5, being Mr. Wythes' letter, agreeing conditionally to contract with the company for construction.

With respect to subscriptions of stock, and the important question of ways and means, I have to report that I had communication with many individuals and firms of high position in the financial world, who looked upon the project with great favor as sure to command public attention, and to secure the support of capitalists, provided the land grant was actually obtained; but until that was done it would be premature to press the stock upon the market. As it is not unlikely that this report may be made public, I am influenced by various considerations of propriety and expediency in refraining from any disclosure here of the various financial suggestions and proposition submitted to me; but I refer to the accompanying letters, marked Nos. 6 to 10, as calculated to afford you every possible satisfaction as to the popular character of the stock, when associated with the grant of land, and the certainty of its being readily taken up.

Being desirous to impress the Colonial department of the British Government with the importance, both to British and Canadian interests, of our canal, more particularly in its relations to the Hudson's Bay territory, and as a link in the chain of communication with the Pacific, through British territory I solicited and obtained an interview, at the Colonial Office, with the Duke of Buckingham. At that interview I was accompanied by Mr. Hawkshaw, Mr. W. C. McKenna, of the financial firm of Chadwick, McKenna & Co., and Mr. J. B. Hewitt, and the topographical model and plans and drawing, illustrative of the work, were by His Grace's express desire produced. His Grace evinced the liveliest interest in the explanations made by Mr. Hawkshaw, and the questions which he put respecting the natural obstacles in the way and the various engineering resources for overcoming them were so pertinent as to elicit from Mr. Hawkshaw the remark that His Grace might pass anywhere for one of the profession. I refer you to one of the accompanying copies of my address to the Duke on that occasion, and His Grace's reply (marked Nos. 11, and 12), and I have reason to believe that His Grace's communication on the subject to our Dominion Government was of a very favorable character.

In conclusion, I have to say that I succeeded in placing the project of the Huron and Ontario Canal on such a footing in England as gives it a most prominent place in the public mind, a rank in importance equal to that of any of the great public works of this century, and peculiar and strong claims upon the favor and support of the British public. I have not the smallest doubt, with the reasonable aid and encouragement which we have always depended on from our Provincial and Dominion Governments, the Huron and Ontario Canal may be considered an established fact, and that the works upon it will be commenced within a few months after the aid is granted. I cannot for a moment think that when the favor and confidence with which the project is viewed in England are properly represented to our government, there can be any hesitation about granting to our company the assistance necessary to the carrying out of the objects its charter, and

which the true interests of both the Province of Ontario and the Dominion of Canada equally demand. To this Province the local expenditure of so enormous a sum of money, and the tendency of the work itself to open up the country and develope its now dormant resources, are advantages which immeasurably outweigh any value, to the public, which can be set upon the land; while the land itself can only be advantageously used by the company, in ways decidedly promotive of the country's best interests. The Dominion cannot fail to secure, through the customs and excise, a large accession to its revenue derived from this work, and therefore a reasonable subsidy to ensure its construction would be a profitable investment and an advantageous measure of finance, without taking into account the vast benefits which the work is calculated to confer on the commercial and general interests of the whole Confederation.

All of which is respectfully submitted,

F. C. CAPREOL,
President.

Toronto, 15th September, 1868.

Journal of Railroad Law.

DISCREPANCY BETWEEN TONS DELIVERED BY RAILROAD COMPANY AND EXPRESSED IN BILL OF LADING.—WHEN COMPANY NOT LIABLE FOR THIS.—FORCE OF CUSTOM.

The facts in the late case of The Naugatuck Railroad Co., *vs.* Beardsley, Scythe Co., 33 Conn., 218 are clearly stated in the opinion of the Court, delivered by Herrman, C. J.—The case is this. A cargo of coal was shipped at Newburgh, to be transported by schooner to Bridgeport, and from thence to be forwarded by the plaintiffs' railroad to the defendants at West Winsted. The plaintiffs on receiving the coal at Bridgeport paid the schooner's freight, and drew on the defendants for the amount which the defendants accepted and paid. The plaintiffs transported all the coal, which they received from the schooner, but it appears that the quantity when it came to the defendant's hands was some six tons less than the quantity which appears by the bill of lading to have been shipped at Newburgh, and the defendants now claim that the plaintiffs should pay for the deficiency, and also should pay the small sum overpaid the schooner for the carriage of it; or, what amounts to the same thing, that these two sums should be deducted from the account of the plaintiffs for other charges, which it is admitted the plaintiffs have against the defendants. The claim of the defendants is, that it was the duty of the plaintiffs to weigh the coal, or to take some other mode of ascertaining that the quantity received by them corresponded with the quantity mentioned in the bill of lading, before paying the schooner's charges for freight. But we know of no rule of law, requiring this, and it conflicts directly with the custom of carriers of this description, as one of the facts in the case is, that it is the custom of the plaintiffs, and of railroad companies generally, not to weigh cargoes of coal received from vessels for transportation over their roads, except when directed to do so by the shipper or consignee, he paying the expense of such weighing. The plaintiffs then in this instance acted in the usual and accustomed manner, and it is obvious that a different custom would be very burdensome upon intermediate carriers, since the expense and delay caused by such weighing at the end of every link in a short route might be so burdensome as to render the business impracticable. It appears to us therefore, that the plaintiffs in transacting this business according to the established custom, did all that the law required of them. As common carriers they were bound to receive and forward the coal to its destination. They of course could not obtain it without paying freight to the carrier of whom they received it. The defendants knew this when they directed the coal to be sent by this route. They must have known of the custom also not to weigh, since it appears that they had previously received goods in the same way. And this surely is tantamount to a request of the plaintiffs to transport the goods in the usual mode. The defendants therefore should look to the carrier, whose negligence caused the deficiency. Their remedy against him seems ample, unless indeed there was some mistake in the bill of lading, in which case they ought to have no remedy except for the small sum overpaid for freight.

In respect to this the plaintiffs may be regarded as paying it at the defendants' request, and therefore would be entitled to receive it, if it was still unpaid. It was paid too by the plaintiffs in the regular course of business and the defendants having paid it to the plaintiffs, and it being equitable for them to retain it, the defendants ought not to be permitted to recover it back.

We advise judgment for the plaintiffs for the full amount of their claim.

Illinois Central Railroad.

The statement of this Company for the month ending September 30, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	24,909.46 for	$249,366 83
Acres Int. Fund Lands sold	80.00 for	1,128 60
Acres Free Lands sold	2,878.47 for	40,133 35
Total sales during month of September, 1868	27,867.93 for	$290,628 78
To which add Town Lot Sales		175 00
Total of all	27,867.93 for	$290 803 78
Cash collected in September		$400,754 28

TRAFFIC DEPARTMENT.

Receipts from Freight		$481,178 00
do. Passengers		158,896 78
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		90,000 00
Total Receipts in September, 1868		$740,433 11
Total Receipts in September, 1867		$704,893 96
Estimated earnings in the month of September, on the D. & S. C. R. R., not included above		$133,066 49

☞ The Baltimore and Ohio Railroad Company will receive proposals until the 20th inst., for the graduation and masonry of Sections 7, 16, 19, 34, 37, 38, 39, 40, 41 and 42 of the Metropolitan Branch Railroad between Washington and Point of Rocks; also for the graduation and masonry, ballast and cross ties for the Winchester and Strasburg Railroad. James L. Randolph, Esq., is Chief Engineer.

☞ The contract for the work on the east end of the extension of the Sun Prairie Branch of the Milwaukee and St. Paul Railroad, from Sun Prairie to Madison, has been let to J. C. Cooly, of of Rosendale, Wis., who did the grading between Omro and Winneconne. That on the other end has been let to J. H. Harvey & Co., of Madison. The grading is to be done by the 1st of May, and the track laid by the 1st of June next.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States September 1, and October 1, 1868:

	Sept. 1, 1868.	Oct. 1, 1868.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$221,588,400.00	$221,588,400.00
Six per cent. bonds of 1881	283,677,300.00	283,677,300.00
Six per cent., Five-twenty bonds	1,591,226,050.00	1,594,888,600.00
Total	$2,096,491,750.00	$2,100,154,300.00
DEBT BEARING CURRENCY INTEREST.		
Six per cent. Pacific R. R. bonds	$35,314,000.00	$39,634,000.00
Three-year compound interest notes	10,595,410.00	5,251,930.00
Three per cent. certificates	62,205,000.00	66,230,000.00
Navy pension 3 p. ct.	13,000,000 00	13,000,000.00
Total	$121,114,410.00	$123,115 930.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$4,650,000.00	$3,537,000.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, Aug. 1, and Sept. 1 and 15, 1868	5,033,490.00	6,322,070 00
Bonds (Texas indemnity)	256,000.00	256,000.00
Treasury notes, (acts July 17, 1861, and prior thereto)	154,511.64	154,111.64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	1,258,200.00	967,650.00
Treasury notes, March 3, 1863	555,492.00	445,492.00
Temporary loan	744,920.00	744,920.00
Certificates of indebtedness	13,000.00	13,000.00
Total	$12,665,213.64	$12,440,243.64
DEBT BEARING NO INTEREST.		
United States notes	$356,021,073.00	$356,021,073.00
Fractional currency	31,802,218.37	32,933,614.17
Gold certificates of deposit	25,161,620.00	20,236,400.00
Total	$412,984,911.37	$409,191,087.17
Total debt	$2,643,256,285.01	$2 644,901,560.81
AMOUNT IN THE TREASURY.		
Coin	$92,570,901.21	$96,891 847.10
Currency	15,071 070.77	13,365,994.76
Total	$107,641,971.98	$110,257,841.86
Debt less cash in the Treasury	$2,535,614,313.03	$2,534,643,718.95

By comparing this with the statement of September 1, it is shown that the debt bearing coin interest has increased $3,662,550; the debt bearing currency interest has increased $2,001,520; the matured debt not presented for payment has decreased $224,970 00; and the debt bearing no interest has decreased $3,793,824 20—making the increase in the total debt since September 1, 1868, $1,645,275 80. The amount of coin in the Treasury during the same period has increased $4,320,945 89, and the amount of currency has decreased $1,705,076 01—leaving the amount of debt less cash in the Treasury October 1, $970,594,-08 less than on September 1st.

☞ Three miles of the track of the Kansas City and Ft. Scott R. R. have been laid, and a construction train placed thereon. Sufficient iron ha been received to extend the track to Paola, an the work is to be pushed vigorously forward.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 30th Sept., inclusive, during the years 1867 and 1868, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1867..	125,000	1,720,800	11,304,300	153,300
1868..	185,300	6,621,700	13,256,400	771,400
Inc..	60,300	4,900,900	1,952,100	618,100

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 1,040,480 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of September in the years indicated:

	1866.	1867.	1868.
Canal opened—	May 1.	May 6.	May 6.
Flour, bbls.	120,000	125,000	185,300
Wheat, bushels..	2,261,300	1,720,800	1,621,700
Corn, bushels...	20,180,900	11,304,300	43,256,400
Barley, bushels.	342,600	153 300	771,400
Oats, bushels...	6,643,800	3,586,700	6,581,300
Rye, bushels....	679,800	255,900	304,900
Malt, bushels...	333,100	239,200	340,900

☞ The extension of the Omro Branch of the Horicon Division of the Milwaukee and St. Paul Railroad has been formally opened to Winneconne.

22 William street, New York.

PROPOSALS FOR $40,000 MARKET STOCK.

Sealed proposals will be received at the Comptroller's office until Tuesday, October 20, 1868, at 2 o'clock P. M., when the same will be publicly opened, for the whole or any part of the sum of forty thousand dollars of market stock authorized by chapter 203, Laws of 1868, and by an ordinance of the Common Council, approved by the Mayor September 25, 1868.

Said stock is to be issued for the purpose of providing means for the completion of the market upon the land lying between Sixteenth and Seventeenth streets and avenue C and East River, and will bear interest at the rate of seven per cent. per annum, payable semi-annually, on the 1st day of May and November, in each year, and the principal will be redeemed on the 1st day of May, 1897.

The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premium thereon.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payments.

Each proposal should be sealed and endorsed "Proposals for market stock," and enclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids if the interests of the corporation require it.

RICHARD B. CONNOLLY, Comptroller.

CITY OF NEW YORK, DEPARTMENT OF FINANCE, September 26, 1868. 3t40

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., September 14, 1868.

SEALED PROPOSALS will be received at the Office of the Company in Oneida, N. Y., until the 30th day of October, 1868, at noon, for the GRADING, MASONRY and BRIDGING of that portion of the New York and Oswego Midland Railroad, extending from Sidney Plains to the village of Walton, in Delaware County, a distance of about 22 miles. Also, for that portion of the line from Westfield Flats to Centreville, in Sullivan County, a distance of about 25 miles.

Proposals will also be received at the same time and place, for the Grading, Masonry and Bridging of the Delhi Branch, extending from the Main Line at Walton to Delhi, in Delaware County, a distance of about 16 miles.

The company will entertain separate proposals for Bridging only, both on the Main Line and Branch.

Plans, Profiles and Specifications will be ready for examination at the office of the Resident Engineer, in the village of Walton, for that portion of the line in Delaware County, including the Delhi Branch, on and after the 20th day of October next, and also at the office of the Resident Engineer in Middletown, Orange County, for that portion of the line in Sullivan County, at the same date.

Contractors who may desire to examine the work will receive all necessary information at the respective offices of the Resident Engineers above named.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer. 5t39

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

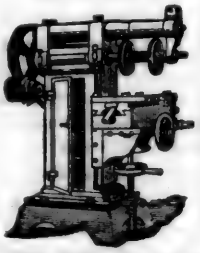
We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

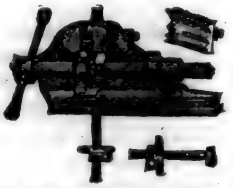
of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.



Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,
69 & 71 Broadway, New York.

UNION VISE COMPANY,

V. H. SPIEGELEISEN

used so extensively for the manufacturing of

Bessemer Steel.

This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,

STEEL RAILS

Manufactured by

G. ARNDT & CO.,

of Dortmund, for which latter firm they also have the Sole Agency in the United States.

For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m32

820 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **10?**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
SEPT. 14, 1868.

Intercolonial Railway!

TO CONTRACTORS.

THE Undersigned is instructed by the Government of Canada to inform intending Contractors that at an early day orders will be invited for the execution of certain portions of the INTERCOLONIAL RAILWAY, between River du Loup and Rimouski, in the Province of Quebec, between Truro and Amherst, in the Province of Nova Scotia, and between Dalhousie and Bathurst, in the Province of New Brunswick.

It is intended to let the work in Sections or Divisions, ranging from 15 to 35 miles, according to the situation and local circumstances.

The surveys are now in progress, in part completed, and the object of this notice is to afford intending contractors ample opportunity of examining the ground at once.

The Plans, Profiles, Specifications, Conditions of Contract, Forms of Tender, and other documents required for the information and guidance of Contractors, are now being prepared, and when ready, of which due notice will be given, will be seen at the Railway Engineer's Office, in Halifax, St. John, Dalhousie, Rimouski, River du Loup and Ottawa.

SANDFORD FLEMING,
Chief Engineer.

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

Interest on Virginia State Bonds.

The following is a copy of the reply of the Governor of Virginia to a communication which had been referred to him by the Commanding General, asking that the interest on the State bonds held in Europe be paid at once, for the reason that Europeans cannot be made to understand why there should be a suspension of payment now that the war is over, and because the delay is seriously injuring the credit of the State abroad, and urging prompt payment of the interest due foreign bondholders as the only means of restoring it to a healthy basis:

The subject matter of the within letter has been frequently brought to my attention, and what has been supposed to be the superior claim of foreign bondholders has been urged with great earnestness and force of language, but I am not able to appreciate the claim which is made, but rather place the obligation of the State upon a higher ground than the one indicated, to wit: the moral obligation to pay in full, and at the earliest practicable moment, all of the State's indebtedness; failing to pay in full at present, then to distribute the largest per cent. possible among all creditors. If, however, any discrimination could be made, it should be in favor of widows and orphans, the helpless and distressed, who need for their present necessary maintenance and support the accrued interest on State bonds held by them. But even this peculiarly strong and meritorious claim has not, thus far, been esteemed sufficient to warrant the giving any preference or priority in payment, and I believe that, independent of special pecuniary interest, the policy of an equal distribution will finally command the approval of all the creditors of the State, and establish her credit on the firmest basis. The practical repudiation of any portion of the State indebtedness would receive the severest censure of the people, without regard to partisan feelings or political associations; and they would undoubtedly now cheerfully submit to an additional tax to be levied for the purpose of paying the installment due on July last, feeling themselves more than compensated for the temporary inconvenience it might occasion by the consciousness that they had discharged to the utmost their just liabilities. Therefore, I cannot recommend the payment of foreign bondholders before a like payment has been made to all others, but would respectfully urge such additional taxation, at once, as will enable us to pay four per cent. to all bondholders on the 1st of January, 1869.

Union Pacific Railroad.

The Vice President of the Union Pacific Railroad Company, THOMAS C. DURANT, Esq., has addressed a letter to the President of the United States in reference to the recent appointment of a special commission to examine their road, in which he says: "If the commission includes all roads receiving similar government subsidies and bonds this company will regard the appointment with satisfaction; but if no other is included it becomes evident that the government has listened to representations of an unfavorable character regarding our work, and which justice requires I should contradict. I think it my duty, therefore, to assure your Excellency that the Union Pacific Railroad is at least equal to any of these other lines in construction, appointments and permanent improvements, and that you ascertain the thoroughness and excellence of this work by reference to Generals Grant, Sherman and Sheridan, who lately passed over the line. I can also furnish the names of many of the most eminent practical railroad men in the country to corroborate these statements from personal knowledge. I respectfully request that the commissioners be instructed to include all the roads in the examination, and to report in detail on the comparative qualities of each. To any test this road shall cheerfully submit, only asking to be protected from unnecessary delays, which are as hostile to the interests of the country and the safety of the settlements along our route as they would be unjustly expensive to ourselves."

West Side Elevated Railway.

At a recent meeting of the directors of this company it was reported that the necessary legal steps had been completed for the extension of the railway. The result of surveys for fixing the line of the road was submitted, and after discussion was referred to the chief engineer with power. The proposals for the immense quantities of iron work required for the road were opened and the terms found to be generally more favorable than were anticipated. Some of the most important contracts were concluded, and work has begun on them. The machinery for the half mile already constructed, which is to be the test of the adaptability of stationary motive power, was reported as nearly finished, together with the vault at the corner of Greenwich and Cortlandt streets, intended for its reception. The cars will run over this section about the 1st of November. The remainder of the railway will be built to permit of the use of "dummies," if advisable. Owing to legal delays the sale of securities of the company had not been pressed of late, but it is now determined to proceed as rapidly as possible to raise money and build the road.

Massawippi Valley Railroad.

The Contracting Committee will receive proposals until the 9th prox., for the grading, masonry, bridging, cross ties and fencing of this road from the northern terminus of the Connecticut and Passumpsic Rivers Railroad, at the boundary line at Stanstead, to the Grand Trunk Railway, near the village of Lennoxville, P. Q. Also a branch from the main line to the Bryant Place, near Rock Island. Tenders are invited for the whole, or by sections, to be completed by the 1st of December, 1869, or for doing the work and furnishing all the materials, the same to be completed ready for use by the 1st of July, 1870. Communications should be addressed care of A. P. Ball, Secretary, Stanstead. H. N. Chamberlin, Esq., is Engineer of the road.

Atlanta and West Point Railroad.

The earnings of this road for the fiscal years ending June 30, 1867 and 1868 were as follows:

	1867.	1868.
From passengers	$158,911 41	$122,389 58
" freight	208,638 38	205,783 05
" mails	6,562 44	7,028 07
" express	12,739 77	8,763 24
', miscellaneous	4,624 81	7,157 14
	$391,476 81	$351,071 08
Expenses, viz:		
Conducting transp	$62,202 14	$56,832 48
Motive power	72,923 46	71,216 50
Maintenance of way	72,676 55	72,618 11
Maintenance of cars	11,574 15	9,538 43
	$219,376 30	$210,205 52
Earnings less expenses	$172,100 51	$140,865 56
From which deduct extraordinary expenses in 1867-'68, viz:		
Rent of cars	$2,636 99	
Taxes	2,960 86	
Old claims, judgments, etc.	7,100 00	
Renewal of engines	10,000 00	
New cars	4,000 00	
Re-rolling iron rails	2,500 00	
		29,197 85
Balance		$111,667 71
Deduct two dividends of 4 p. ct. each.		98,576 00
Leaving a surplus of		$13,091 71

In 1867 the extraordinary expenses were $103,229 12, leaving the balance of earnings at the close of that year, $68,880 39.

The percentage of ordinary expenses to gross earnings in 1868, was 61 against 56 for the previous year. The President in his report says:

By the report of the Superintendent, it appears that the gross receipts for the past year were $351,071 08; and expenses, ordinary and extraordinary, $239,403 37; leaving net earnings for the year, $111,667 71; from this two dividends have been declared, $4 each, $98,576; leaving surplus to required fund, $13,061 71.

This result is fully equal, it is believed, to the expectations of the stockholders, and therefore realizes the anticipations of the superintendent, in his last annual report. Whether results as favorable may be expected in future, depend on so many contingencies, which the wisest cannot foresee, that it is perhaps idle to speculate upon the subject. The past history of the company has been one of unparalleled prosperity; but the stockholders have not expected that the prosperity of former years would be continued without interruption. So early as 1851 they were reminded of this in the annual report of the directors. In 1853, on the same subject, they were reminded of a probable increase of competition and lessened profits; but the hope is there expressed that the "local business" would pay fair "remunerating dividends to the stockholders." In 1857 the board say, in the annual report: "Our travel from distant points, known as through travel, will be doubtless affected by the progress of Western and Northwestern improvements; but the board has never placed any permanent reliance on this source of income. A good local travel and traffic can only give certain value to railroads as reliable investments;" &c. In fact, during the whole period of our unrivalled prosperity, the stockholders were annually reminded, in reports or speeches, of the probability of reduced profits from increased competition; but the hope is as constantly expressed that the local business might be fully relied on for reasonable dividends.

The opinion expressed in the annual report of the Georgia Railroad for 1867 has been constantly recognized and adopted by the Directors of this: "It may, perhaps, be safely admitted (says that Report) that we shall suffer still further by competition for distant or through travel. Roads continue to multiply, and especially in the Southwest; and the tendency is to cut off every angle and take the most direct route between important points. This travel is already divided between so many competing lines that it is scarcely worth the cost of competition. As a general rule, the conviction is gaining strength that no road should be built as an investment, unless its local business will pay an interest on the cost. The only exceptions will be a few great thoroughfares, the shortest and most direct between certain important points, and presenting such advantages, in distance and business attractions, as to shut out all competition."

The board has dwelt somewhat upon this subject, as it has been charged in some quarters that the directors have been supinely inattentive to the progress of competing improvements, against which a proper vigilance might have guarded. It will be seen that the charge of ignorance and inattention is utterly groundless; and how the directors could have stopped the improvements or averted the danger, is not very apparent.

The competition came, as was foreseen and predicted from the first. The route by Macon, Columbus and Opelika was completed. The route by Grand Junction and Jackson to New Orleans was completed. The Mobile and Ohio Road was completed; and by all these routes we suffered in through travel; yet but for the war, it is by no means certain that our highest receipts would not have been fully maintained. We had always underestimated the compensating increase of local business from the progressive improvement in the resources of the country, when not disturbed by abnormal causes. The competition came; but despite of it, our income, and what was more important, the elements of a local, reliable business, continued to improve. In 1855 the receipts were $251,076, and cotton transported 44,550 bales. In 1860, the last year before the war, the receipts were $418,036, and cotton transported on the road, 72,906 bales!

The country immediately tributary to our road—in fact the whole South—was in an enviable state of progressive prosperity. The war came; and when peace returned, the effect upon the local resources of the country was painfully apparent! In 1866 the cotton transported was 29,584 bales, in 1867, 18,275 bales, and for the year just closed, 45,507 bales. After the close of the war the gross receipts were influenced by several causes, temporary in their nature, and indicating rather the wants than the resources of the country. But the elements of prosperity most reliable are best indicated by exportable productions. We are pleased to see some improvement in cotton shipped the last year over the preceding; but a full restoration of former resources is scarcely to be hoped for, at least for many years.

The Superintendent reminds us that we may look for further competition in travel "by an anticipated opening of an all rail route between Atlanta and Selma, *via* Kingston and Rome." This route, when opened, will evidently take the travel between Selma and Kingston, as points; but on the completion of the Selma and Montgomery Road, any competition between Atlanta and Selma and points beyond is not much to be dreaded. It will be perceived that the changed condition in our situation and prospects may be mainly attributed to the war, by which so many other important interests in the country have been destroyed. Some of the causes have been common to other roads, but some others have borne with peculiar severity on ours. Notwithstanding these discouraging circumstances, the board is inclined to agree with the Superintendent, who says, in his report: "I yet maintain an abiding confidence in our ability to pay reasonable dividends to the stockholders, and in an ultimate increase of business and net profits." In the present condition of our country any confident opinion cannot well be formed; but the stockholders will not likely think this opinion unreasonable, when it is recollected that much less than one half the average annual net profits of the company before the war, will pay dividends of eight per cent. The board will not enlarge on these subjects. We have suffered by the progress and completion of rival improvements, and will suffer further from the same cause. This was foreseen and predicted from the beginning of our enterprise. We have suffered still more from the war and its direct and indirect consequences. That was not foreseen or predicted. But we should not complain or despond. This destructive scourge has left us in much better condition than most other Southern Roads. We have a very small capital, and the cheapest road, perhaps, that was ever built anywhere. We are not embarrassed by debt. We owe no floating debt, and our funded debt, beyond immediate means, is too insignificant to notice. We have still a very reliable business beyond competition.

The board is pleased to learn that the Montgomery and Selma Road will probably be completed at an early day, and that the Pensacola extension of the Alabama and Florida Road will soon be rebuilt. These improvements completed, and our road has the following position, giving assurance of reliable business beyond competition:

1st. At its eastern terminus it has the growing and prosperous city of Atlanta, which must always attract a local traffic and travel.

2d. It runs through a well-settled and productive country its entire length, the local business of which of course belongs to it.

3d. The travel between Atlanta and Columbus, Montgomery, Pensacola, Mobile, New Orleans, Selma and all points West. What Southern Road is in better condition, or with fairer prospects? Amid the wrecks of fortune scattered about us, we should not undervalue what we have, because we were once better off. Instead of complaining of what is lost, we should be grateful for what remains to us. A continuance of the large dividends we once enjoyed was not to be expected; but, with good management and close economy, it is believed that our stock will continue to be a valuable and productive investment.

It is proper that the board should inform the stockholders that the expense of management has been increased $3,000 per annum, for that amount as increased compensation to the Macon and Western Railroad Company, for the use of six and a half miles of their road. That part of the road was destroyed in the war, and it was deemed only just and equitable that our road should bear one half the loss.

The company have 14 locomotives, 6 passenger, 4 baggage, 1 express, 2 cab, 1 shanty, 49 box, 15 stock and 21 platform cars. Number of through passengers carried, 10,975; way do., 32,007—total, 42,982, against 47,253 in 1867, a decrease of 4,271. Tons of freight transported, 40,480 against 46,569 in 1867—a decrease of 6,089.

The assets and liabilities of the company July 1, 1868, were as follows:

Assets.	
Road outfit and real estate	$1,200,230 26
Bills receivable	22,779 20
Ala. and Fla. R. R. Co., for interest.	11,861 50
Supply fund	2,500 00
Due by agents and companies	33,716 01
Balance due on Jno. D. Gray & Co.'s note	2,627 51
Cash	43,568 16
	$1,317,282 64

Liabilities.	
Capital stock	$1,232,200 00
Bonds of the company	47,000 00
Dividends unpaid	2,252 00
Due to agents and companies	4,360 62
Profit and loss	31,470 02
	$1,317,282 64

President.—Hon. John P. King.

Directors.—R. Peters, Jesse McLendon, John E. Robinson, W. B. Berry, F. Phinzy, J. F. Moreland.

Gen'l Superintendent.—L. P. Grant.

Secretary and Treasurer.—William P. Orme.

Hartford and New Haven Railroad.

The earnings of this road for the years ending August 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$941,536 18	$891,091 20
" freight	625,992 72	632,454 06
" expresses	114,007 61	114,709 50
" mails	.....	55,627 28
" rents, etc	3,798 08	3,452 35
	$1,685,334 59	$1,697,334 39
Expenses, viz:		
Repairs of road and bridges, including new	$255,780 32	$326,427 99
Wood, coal and oil	117,382 08	96,318 14
Material and labor on engines and cars	257,347 31	224,838 38
Transp. account and general expenses	286,669 80	325,867 95
Station repairs and improvements, including new structures	62,786 95	48,009 83
Lost and damaged goods, gratuities, etc.	2,552 44	3,472 79
	$982,518 90	$1,024,935 08
Net earnings	$702,815 69	$672,399 31
Interest and taxes	158,818 80	190,808 50
Balance	$543,996 89	$481,590 81

Compared with the previous year the gross earnings of 1867–'68, show an increase of $11,999 80, with an increase in operating expenses of $42,416 18—making the decrease in net earnings, $30,416 38. The balance remaining after the payment of interest and taxes is less than that of the preceding year by $62,406 08. Only about $20,000 of the receipts for mail service belong to the earnings of the year, the balance is for mail service performed in previous years. The difference in the gross receipts from passengers results from the fact that a sum of $19,154 was collected during the preceding year from Government, and credited in the accounts for that year, on old claims for transportation of soldiers during the war. The President in his report says:

It will be observed that the expenditures have somewhat exceeded those of the preceding year. The largest item of increase will be found in the charges for repairs of road and bridges. The wearing and breaking of rails, by the severity of the last winter, upon the railroads generally, throughout the north, is well known. Our road, in common with others, suffered seriously from this cause, and although a very considerable number of rails were found broken during the winter, and a large number of others so far crushed and injured, as to be unfit for further use, we were so fortunate as to escape any serious accident; but the spring found us almost destitute of rails fit to place in the track; we had laid 600 tons new rails in the previous autumn, and 1,100 tons have been provided during the present season, in addition to which a further quantity of 1,000 tons has been contracted for to be delivered and laid before winter. The short duration, and liability to breakage of the common rails now offered in the market, have conduced to convince us that rails of a superior quality for the supply of our road are demanded, by a proper consideration for the safety of our trains, as well as for true economy in operating the road. One thousand tons of steel headed rail have been provided and most of it placed in the track during the present season, and a further order for 500 tons of same quality is soon to be delivered, as is also a lot of 500 tons iron rails of superior quality now being manufactured in England, at a cost considerably exceeding that of the common rails we have used previous to the present year. Experience with these different kinds of rail will enable the managers of the road to form some reliable opinion whether either of them, or an entire steel rail will be most desirable for the company's future use. In addition to the increased expenditure for the larger quantity and increased cost of rails, we have during the present season constructed an additional track between Windsor Locks station and the west end of the Connecticut River Bridge, and continued the same by an additional line of rails across the bridge, so that the double track is continuous now between Windsor Locks and Warehouse Point stations, where heretofore it has been single. This improvement, the cost of which is included in the item of repairs of road, will remove a cause of frequent delay to trains as well as hazard of accidents.

The new bridge at Windsor was completed during the autumn of last year, and the remainder of its cost is also included in the charge for repairs of road and bridges.

The new freight house at Springfield, mentioned in our last report as under construction, was completed and occupied about the 1st of January last, and in connection with the changes of track made practicable by this improvement, has greatly facilitated the business at that station.

Additions to the equipment of the road have been made, as heretofore, during the year just past. One new locomotive of the first class, has been turned out of the shop, and is now at work. Another of the same grade is nearly completed. Our entire motive power is now in excellent condition to meet any emergency which the business of the road may create.

The important freight and passenger depot of the company at the steamboat dock at New Haven, has been since the original construction of the road, established on ground held under a lease from the Tomlinson Bridge Co., and although this company was the owner of nearly the entire stock of the Bridge Co., yet for various reasons it was thought advisable that this company should acquire the title to these grounds. The Board of Directors therefore passed resolutions, under the authority of the statute providing for such cases, for taking, for additional depot ground, all the property of the Bridge Co., lying south of the Bridge causeway and west of the channel of the harbor. The amount to be allowed to the Bridge Co., for this property was adjusted by agreement, at $142,332 30, and this amount, charged in our accounts to the cost of the road, and an equal amount credited against the advances heretofore made to the Bridge Co., and the cost of the Bridge Co.'s stock held by this company, leaving the general result the same.

The Board of Directors, (in conjunction with the directors and stockholders of the New Britain and Middletown Railroad Co., and in pursuance of authority conferred by the stockholders at their annual meeting in 1866,) proceeded on the 19th day of August last to perfect the merger and consolidation of the New Britain and Middletown Railroad with the road of this company. The effect of this merger was to place 1,500 shares of the capital stock of this company, converted from stock of the New Britain and Middletown Co., upon our books to the credit of the Treasurer in trust, and this company having also authority under previous legislation, to issue 1,500 additional shares of capital stock, the Treasurer was authorized and directed to distribute pro rata, among the several stockholders, the whole 3,000 shares of new stock, which distribution is now in process of execution.

The cost of the stock of the New Britain and Middletown road, and the amount advanced for the indebtedness of that company, have been charged to the cost of the road, and those accounts balanced. The capital stock account has been increased $300,000, for 3,000 shares stock added, and the contingent fund account reduced to the same amount.

A compromise of our long standing differences with the General Post Office Department was effected in October last, and an amount agreed on for past services was paid, and since that period we have received regular payments on account of mail service.

No change has occurred in regard to our claims against the New York and New Haven Railroad Co.

A quarterly dividend of three dollars per share, free of Government tax, has been declared payable on the 1st of October.

The number of miles run by passenger trains during the year was 315,540; by freight trains, 176,863; by express freight trains, 23,706; by other trains, 59,939—total, 576,048, which is 29,935 miles in excess of the preceding year. Number of passengers carried, 931,821. Tons of freight carried, 380,123. Decrease in passengers, 19,807. Increase in freight, 25,883 tons.

The income of the company from all sources during the year was as follows:

Cash on hand, September 1, 1867	$166,963 06
Earnings of the road	1,697,334 39
Sales of real estate, etc	6,367 44
Total	$1,870,664 89
Thus accounted for—	
Dividends	$422,566 00
Interest	57,526 51
Operating and repairing road	1,008,829 24
Tomlinson Bridge Co., for depot grounds, New Haven	49,332 30
Steamboat "Orient"	3,445 36
Real estate in Conn	4,975 10
Balance debts due the Co	20,134 52
State and National taxes	133.281 99
Cash	170,573 87
Total, as above	$1,870,664 89

The following from the Ledger presents a general statement of the affairs of the company September 1, 1868.

Capital stock	$3,300,000 00
Bonds	927,000 00
Contingent fund	314,843 84
Reserved fund	150,000 00
Profit and loss	211,590 81
Dividends unpaid	7,227 00
Debts due by the company	69,221 79
	$4,979,883 44
Railway, depot grounds, buildings, etc	$3,407,284 76
Real estate, land, dwellings, etc	131,522 43
Bonds purchased	37,000 00
Tomlinson Bridge stock	8,888 67
Advance to Tomlinson Bridge Co	1,760 30
Equipment, engines and cars	254,000 00
Wood, stock and tools on hand	189,935 47
Debts due the company, including account due from N. Y. & N. H. R. R. Co., and funds in the hands of agents	410,145 88
Connecticut River Bridge	176,577 36
Steamboat "Orient"	193.094 70
Cash	170,573 87
	$4,979,883 44

President.—W. P. Burrall.

Directors.—W. P. Burrall, Chester W. Chapin, Cornelius Vanderbilt, Ezra C. Reed, Eli Butler, Julius Catlin, C. M. Pond, H. C. Robinson, E. G. Howe.

Secretary.—S. P. Conner.

Treasurer.—C. M. Pond.

Superintendent.—E. M. Reed.

☞ The Union Pacific Railroad has been completed to Green River, Utah, 850 miles from Omaha. It was the original intention to cease operations at Green River for the winter; but the road is to be pushed on to the Bear River Mountains, where Brigham Young's contract for grading commences.

Indebtedness of Railroad Companies to the United States.

MONTHLY STATEMENT of the Account between the United States and Railroad Companies indebted to the United States, for the sale of Military Railroad Property under Executive Orders of August 8 and October 14, 1865, and orders of the Quartermaster General, for the month ending the 31st day of August, 1868.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *"Italics."* State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, October 17, 1868.

Stock Exchange and Money Market.

The Money Market has been fairly active, since our last. The available supply of Money has been comparatively liberal, especially on call, at from 6@7 per cent., at which the prominent street borrowers have been readily accommodated to the full extent of their requirements. There has been a better inquiry for prime to good mercantile paper at from 7@8½ per cent. per annum. The offerings of marketable grades have been somewhat more extensive, particularly through private channels. The Treasury Department has been drawing rather more freely on the public monies deposited in the national banks, and the resulting liquidation has had an unfavorable effect on the city bank averages. The loss of deposits reported by the city banks is nearly six millions, of which about four millions were drawn to pay off loans and discounts. The banks also lost nearly two and a half millions in gold from the continued large daily demand for customs. It is believed that the treasury sold some moderate amounts of gold up to Friday, but these do not appear to have told upon the bank average of specie. Some currency remittances are going to the cotton ports, and the banks being bare of National Bank Notes, this demand is met by Greenbacks.

The specie reserve of the city banks is now $9,346,097, against $9,603,771 same time last year. The city bank deposits are now $189,053,997, against $177,135,634 week ending Oct. 5, 1867. The legal tender reserve amounts to $60,005,086, against $53,114,922 same time last year. The circulation now stands at $34,188,103, against $34,006,041 same time last year. The loans are now $265,595,582, against $247,833,133 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $109,659,693 a day, against a daily average of $124,603,000 the preceding week, and $103,351,000 the week ending with Sept. 24, 1868. The current week's exchanges average about $109,951,892 a day. The city banks, last week, lost $2,411,238 of specie, $5,865,180 of deposits, and $235,361 of legal tender notes. They reduced their loans, $3,958,286; and increased their circulation, $33,297.

The New York Gold Exchange Bank reports for the week ending Saturday, the 10 day of October, 1868, the average amount of loans and discounts as $1,459,347; average amount of specie, $281,590; average amount of deposits, $1,221,741.

The Philadelphia Bank movement the past week shows an increase in loans of $125,774; a decrease of $34,407 in specie; a decrease in legal tenders of $595,531; a decrease of $78,410 in deposits; and a decrease of $917 in circulation. The Bank Clearings show an increase of $3,275,522, and the balances an increase of $488,224.

The outstanding amount of coin certificates on the 1st of Oct., was $20,236,400, against $25,161,620 on the 1st of Sept., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $765,000, and retired $2,454,413 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during September, reached $1,963,300.

The U. S. Sub-Treasury receipts, week ending with Oct. 10, were $11,341,642, including $2,571,413 from customs duties; payments, $11,337,095, including $77,474 of coin interest; balance at the close of the week, $94,965,646, against $94,961,099, at the close of the preceding week, showing an increase of $4,547. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,283,752 including $567,000 from customs; and payments, $3,785,131, including $8,898 of coin interest; on Tuesday, receipts, $3,231,930 including $595,000 from customs, and payments, $2,533,685, including $9,065 of coin interest. The balance at the close of business on Tuesday stood at $94,162,516, against $94,198,577, a week previous; and $97,907,898, on Sept. 23, 1868. The aggregate receipts of the office from all sources in September, were $54,298,704; aggregate payments, $47,854,171. The balance on the 1st of October was $94,499,990, or about 7 millions more than on the 1st of September, which amounted to $87,555,452.

National Bank notes to the amount of $195,730 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,131,896, against $282,555,440 at the close of the fiscal year ending

American Railroad Journal.

Saturday, October 17, 1868.

Stock Exchange and Money Market.

The Money Market has been fairly active, since our last. The available supply of Money has been comparatively liberal, especially on call, at from 6@7 per cent., at which the prominent street borrowers have been readily accommodated to the full extent of their requirements. There has been a better inquiry for prime to good mercantile paper at from 7@8½ per cent. per annum. The offerings of marketable grades have been somewhat more extensive, particularly through private channels. The Treasury Department has been drawing rather more freely on the public monies deposited in the national banks, and the resulting liquidation has had an unfavorable effect on the city bank averages. The loss of deposits reported by the city banks is nearly six millions, of which about four millions were drawn to pay off loans and discounts. The banks also lost nearly two and a half millions in gold from the continued large daily demand for customs. It is believed that the treasury sold some moderate amounts of gold up to Friday, but these do not appear to have told upon the bank average of specie. Some currency remittances are going to the cotton ports, and the banks being bare of National Bank Notes, this demand is met by Greenbacks.

The specie reserve of the city banks is now $9,346,097, against $9,603,771 same time last year. The city bank deposits are now $189,053,997, against $177,135,634 week ending Oct. 5, 1867. The legal tender reserve amounts to $60,005,086, against $53,114,922 same time last year. The circulation now stands at $34,188,103, against $34,006,041 same time last year. The loans are now $265,595,582, against $247,833,133 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $109,659,693 a day, against a daily average of $124,603,000 the preceding week, and $103,351,000 the week ending with Sept. 24, 1868. The current week's exchanges average about $109,951,892 a day. The city banks, last week, lost $2,411,238 of specie, $5,865,180 of deposits, and $235,361 of legal tender notes. They reduced their loans, $3,958,286; and increased their circulation, $33,297.

The New York Gold Exchange Bank reports for the week ending Saturday, the 10 day of October, 1868, the average amount of loans and discounts as $1,459,347; average amount of specie, $281,590; average amount of deposits, $1,221,741.

The Philadelphia Bank movement the past week shows an increase in loans of $125,774; a decrease of $34,407 in specie; a decrease in legal tenders of $595,531; a decrease of $78,410 in deposits; and a decrease of $917 in circulation. The Bank Clearings show an increase of $3,275,522, and the balances an increase of $488,224.

The outstanding amount of coin certificates on the 1st of Oct., was $20,236,400, against $25,161,620 on the 1st of Sept., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $765,000, and retired $2,454,418 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during September, reached $1,963,300.

The U. S. Sub-Treasury receipts, week ending with Oct. 10, were $11,341,642, including $2,571,413 from customs duties; payments, $11,337,095, including $77,474 of coin interest; balance at the close of the week, $94,965,646, against $94,961,099, at the close of the preceding week, showing an increase of $4,547. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,283,752 including $567,000 from customs; and payments, $3,785,131, including $8,898 of coin interest; on Tuesday, receipts, $3,231,930 including $595,000 from customs, and payments, $2,533,685, including $9,065 of coin interest. The balance at the close of business on Tuesday stood at $94,162,516, against $94,198,577, a week previous; and $97,907,898, on Sept. 23, 1868. The aggregate receipts of the office from all sources in September, were $54,298,704; aggregate payments, $47,354,171. The balance on the 1st of October was $94,499,990, or about 7 millions more than on the 1st of September, which amounted to $87,555,452.

National Bank notes to the amount of $195,730 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,131,896, against $282,555,440 at the close of the fiscal year ending

June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,208,401, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,923,495. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,080,950; and for the public deposits, $38,071,350—making a total of $380,152,300. The Treasury Department last week redeemed and destroyed $541,100 of worn and mutilated fractional currency, and issued $685,916 of new. The outstanding amount of fractional currency on the 1st of October, was $32,983,614, against $31,802,218 on the 1st of September; $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been moderately prolific, since our last.. The excises, last week, yielded about 5 millions; customs at the port of New York, $2,571,413, and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $9,704,500 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $65,000,000. The Treasury Department will probably be in need of $8,000,000 or $10,000,000 currency in all this month, over its receipts from internal taxes, and will doubtless be a daily seller of gold to the amount of nearly the average of the custom receipts hence to the close of the month, at this port, to supply the want. The Funded Gold-bearing Public Debt having reached $2,100,000,000, and ample provision in gold having already been made for the November Interest without reducing the gold balances at any time below $60,000,000, the Secretary would, of course, prefer to sell a good part of his October customs to adding further sums in 5-20s to the permanent Gold-bearing Debt. It is confidently believed that no further sales of new 5-20s, July and January interest, will be made in any event.

Gold has declined nearly 2½ per cent., during the week, under increased offerings, both on private and public account. The highest sales were 139⅛ and the lowest at 136¾. The latest figures on Wednesday were 137¾@137⅞. On Monday last, the Treasury Department officially announced an experimental change in the mode of disposing of Government gold, as follows:

"SALE OF GOVERNMENT GOLD.—Proposals will be received, in writing, at this office for the purchase of Government Gold, in exchange for Currency, commencing on Wednesday, the 14th instant, and continuing for ten consecutive business days. The amount for which proposals will be received each day is limited to $300,000, and the whole, or any part thereof, not less than $5,000, will be awarded to the highest bidder. Proposals will be received from 11 to 12 o'clock of each day, and the bids will be opened and the result declared immediately thereafter. To guard against fictitious bids a certified check for 3 per cent. of the amount for which proposals are made must accompany each offer. The gold will be ready for delivery immediately after the awards are made.

H. H. DYCK, Assistant Treasurer."

This announcement served to weaken the market, up to the formal commencement on Wednesday, of the public sales, thus advertised. On Wednesday, bids were received from some nineteen firms for the $300,000, which was offered for sale on that day. The aggregate of the bids for these $300,000 ran up to $3,330,000 at a range of from 136@136⅞. The successful bids were one of Messrs. Fisk & Hatch (the highest) for $100,000 at 136⅞; and another of Messrs. A. Rodenald & Co., for $200,000 at 136$\frac{99}{100}$. The sales of Government Gold, in this way, according to the official announcement, will be continued for nine business days more, or up to the 24th inst. What the Department will do thereafter cannot be divined at present.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,108,670, against $2,627,800 same time last year. The customs demand for Gold last week, averaged $428,559 a day; thus far, this week, it has been equal to $583,000 a day, or equal to a weekly aggregate of $3,498,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $229,775 and from California, none. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $95,613,217, against $99,039,480 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $31,852,095, against $23,855,604 in 1867, showing an increase thus far in 1868, of $7,997,491. The exports of specie, from this port, last week, were $43,620, against $473,478 same week last year; total, since Jan. 1, 1868, $66,430,157, against $42,922,690 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $77,474; since Jan. 1, 1868, $63,707,487, against $43,368,924. The specie exports from San Francisco, from Jan. 1, to Sept. 22, 1868, were $28,245,532, against $30,971,689 same time last year.

Government received $6,514,247 from customs at the port of San Francisco, from Jan. 1, to Sept. 22, against $5,988,898 same time in the preceding year.

Foreign Exchange has been in better request, and with lighter offerings of prime bills, rates have been quoted higher. Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109¾, and on Paris to 5.20c.@5.16¼; sight bills on London to 109⅞@110⅛, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been restricted this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,753,889, against $3,134,082, same week last year; total, since Jan. 1, 1868, $128,807,937, against $142,909,242 in 1867.

Government securities have been gaining in public favor, since our last, and prices have been on the advance. The dealings on Wednesday were the most extensive day's business of the week, and the market was quite strong, and buoyant at the close. Popular orders were running mainly on the later issues of the Five-twenty six per cent. coin bearing bonds, the offerings of which were on a reduced scale. The issue of 1868 was particularly scarce. Higher figures all through the list were confidently looked for by the street dealers, who were more inclined to buy than to sell at the going rates at the close.

U. S. sixes of 1881 closed here on Wednesday at 114⅛@114¾; U. S. Five-twenties of 1862, 113⅛@113¼; U.S. Five-twenties of 1864 at 111@111⅛; U. S. Five-twenties of 1865 at 111⅛@111¼; U. S. Five-twenties of 1865, consolidated, 109⅛@109¼; U. S. Five-twenties of 1867, 109⅜@109½; U. S. Five-twenties of 1868, 109¾@110; U. S. Ten-forties at 105⅛@105¼; U. S. Six per cent. currency bonds, 99¼@99⅝. The brokers were buying the outstanding October 1865 compound interest notes at 119, up to the 15th inst., when they matured and practically passed out of the market.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 30.	Oct. 7.	Oct. 14.
Consols	94⅜	94⅛	94⅞
U. S. 5-20's of 1862	73	74	74½
Erie	31½	31¾	31¾
Ill. Central	95¼	95½	95¼

There has been an active and spirited speculative inquiry for railway and miscellaneous share property, all through the week, and prices of the favorite stock, have been steadily advancing. The market was particularly strong and buoyant on Wednesday on very extensive dealings.

A fair trade has been reported in domestic produce, since our last. Breadstuffs closed with a downward tendency. Provisions were somewhat firmer. Middling upland cotton closed heavily on Wednesday at 25½ cents per lb. The stock of cotton now here is estimated at about 12,500 bales. The receipts at the port this week, have averaged about 2,850 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 127,750 bales, against 63,500 bales same time last year; exports, same time 33,750 bales, against 19,500 bales same time last year; stock on hand at latest dates, 78,500 bales, against 77,500 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. At the Live Stock market, this week, Beeves have been in limited demand at from 10@16½c. per lb.; week's receipts, 6,100. Veal calves have been in fair request at from 8@12½c. per lb.; receipts, 1,216. Sheep and lambs moderately active and cheaper, at from 4½@6½c., and 6½@7½c. per lb., respectively; receipts, 38,533. Swine less sought after and quoted back to 8½@9¾c. per lb., all live weight; receipts, 20,977. The dealings in foreign merchandise have been somewhat more animated, particularly in groceries and dry goods. Prices have been generally well supported. The exports of domestic cotton goods, since Jan. 1, have been 7,405 pkgs., against 6,508 pkgs., same time last year. The total imports of foreign dry goods, last week, were $1,591,972, and the total amount marketed $1,800,460. The value of foreign merchandise imported last week, was $2,465,477—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,057,449, against $4,191,500 same week last year; from Jan. 1, 1868, $197,685,206, against $198,228,013 same time in 1867. The freight market has been fairly active, but irregular. For Liverpool we quote flour at 2s. by sail, and 2s. 3d. by steamer, per bbl.; grain at 6½d. by sail, and 7@7½d. by steamer, per bushel; cotton at $\frac{5}{8}$d. by sail, and

⅛d. by steamer, per lb.; and heavy goods at 20s.@30s. by sail, and 25s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 560.

The New York exports, exclusive of specie, for the week ending Oct. 13, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$3,134,082	$2,753,889
Prev. reported.....	139,775,160	126,054,048
Since January 1.....	$142,909,242	$128,807,937

The imports for the week ending October 10, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,665,307	$1,591,972
Gen. merchandise..... ..	2,526,193	2,465,477
Total for the week.....	$4,191,500	$4,057,449
Previously reported....	194,036,513	193,627,757
Since January 1.....	$198,228,013	$197,685,206

The balance in the Sub-Treasury on Wednesday was $94,986,851.

☞ THE WAY TRAFFIC OF THE CENTRAL Pacific Railroad is already greater than the present supply of rolling stock will accommodate, and increases as fast as the track is extended. The net earnings, over and above expenses, will be *more than a million in gold*, and the through line will be opened next Summer. At this time the SIX PER CENT. (GOLD) FIRST MORTGAGE BONDS can be had at 103 and accrued interest in currency.

For sale by Banks and Bankers, Agents for the Loan, and by FISK & HATCH,

General Financial Agents Central Pacific Railroad Company, No. 5 Nassau-street, New York.

☞ PRINCIPAL AND INTEREST IN GOLD.—The First Mortgage fifty-year seven per cent. Sinking Fund Coupon Bonds of the Rockford, Rock Island, and St. Louis Railroad Company, principal and interest payable in GOLD COIN, *free of Government tax*, are for sale at the office of the Company, No. 12 Wall street, at 97½ per cent., and accrued interest in currency.

Pamphlets giving fuller information, may be had at the office.

Government and other securities received in exchange at market rates.

H. H. BOODY, Treasurer.

Central Pacific Railroad.

The track of the Central Pacific Railroad is finished to Reese river valley, 550 miles east of San Francisco, and about sixty-five miles north of Austin. The grading is ready for the iron 100 miles beyond, and it is said the requisite grading to Salt Lake will be done by the 15th of December. The earnings of the railroad for September were $268,000 in gold. In a few days Wells, Fargo & Co.'s stages will connect with the railroad at Gravelly Ford, on the Humboldt river, instead of Wadsworth. This will shorten the stage route nearly 200 miles.

☞ The earnings of the European and North American Railway in September, 1868, were $14,028 38, against $16,167 35 in September, 1867—a decrease of $2,138 97.

Toledo, Peoria and Warsaw Railway.

We announced in brief terms, on Monday, the laying of the last rail on the Toledo, Peoria and Warsaw railway between this city and Warsaw, thus giving this corporation a magnificent line from east to west, through the centre of our great State. The road will be opened for traffic the beginning of next week. Trains will then be run from opposite Keokuk to Philadelphia and New York, with but one change of cars—at Columbus, Ohio. The first through car from Columbus came into our city, yesterday, and went on to Canton, in Fulton county, which is as far as the road is now operated.

The company are now receiving the new rolling stock for their extension. Two new locomotives arrived here last week. Another came in yesterday morning. Four more are on the road, and five additional are to be here next month. Two new passenger cars for the through route East, left Wilmington, Del., where they are manufactured, on Monday. The Columbus, Chicago and Indiana Central Company, which is to run in connection with the road, and which stretches from the Indiana State line to Pittsburg, furnishe their share of the passenger cars, so that the line is to start off, next week, thoroughly equipped. Arrangements are also being pushed for carrying on the splendid freighting business which the road will receive when opened. Grain and flour will be shipped through to the seaboard without breaking bulk, and all the rolling stock necessary for that purpose will soon be forthcoming. In addition to this great through line to the East, the T., P. & W. Co. start the beginning of the week also, a through line, without change of cars, from Keokuk and Warsaw to Chicago. It is to be a part of the regular eastern train until it arrives at Gilman, where it is to be switched off to the Central Branch and taken into Chicago as an independent train by the Illinois Central. The Central Company join in furnishing the passenger coaches for this line. The T., P. & W. Co. will put on entirely new coaches, on their part, having run one of them on a trial trip for the first time over their road last Saturday. The American Transportation Company will put on two of their magnificent sleeping cars, thus making this line the very best running out of Peoria. The time between Keokuk and Chicago, 284 miles, will be twelve hours. As this line will run through without delay and without change of cars, we predict for it great popularity all along the route.

Our people will hardly be able to realize the grandeur and extent of this opening of the T., P. & W., until after the road has passed into successful operation. It puts Peoria on the great highway of the country and of nations. We become a part and parcel of the great Midland Route from the Atlantic to the Mississippi, and eventually to the Pacific. When we look back to the first inception of an east and west railroad across the State, with Peoria as its central point, and follow its varying fortunes, we have good reason for feeling proud over the fact that the work is at last accomplished, and that our road has connections surpassed by no other road in the country.

Two years ago the T., P. & W. made an arrangement with the Mississippi and Wabash road, by which the two companies were consolidated, and at once commenced to push a new route through to the Father of Waters. The section between Bushnell and Warsaw was at once pushed to completion, and was opened to traffic, last January. The section between Peoria and Bushnell was delayed by a legal dispute in regard to the ownership of the road bed between this city and Pekin Junction. This was not settled until October of last year. About the middle of that month, Vice President Drug*r* let his contracts for the grading between Pekin Junction and Canton. In December he contracted the balance to Bushnell, and in less than a year, the whole distance, sixty miles, was finished, and ready for operation.

The total length of the new line, from Warsaw to the Indiana State Line, is 227 miles. That portion between here and the Mississippi has been built in a most thorough manner, inferior in superstructure to no line in the West. We are happy to announce that the balance of the road, between here and State Line, is at once to be put into an equally good condition. The trestle work over Walnut and Panther creeks, (the first near Eureka and the second near Secor) is being filled in with earth. The present iron is to be re-rolled to sixty pounds to the yard, and laid down with the fish-tail joint. That portion between El Paso and Gilman will be re-laid early in the spring.

An arrangement has been entered into between the T., P. & W., the Columbus, Chicago and Indiana Central, and the Des Moines Valley roads, and all the means provided, for throwing a bridge across the Mississippi at Keokuk, next year. The work will be commenced early in the spring. This will give an extended line from New York and Philadelphia to Des Moines, Iowa, without break of bulk. As it now is, passengers can go through from Des Moines by this route to New York with only two changes.—*Peoria Transcript, 7th.*

Journal of Railroad Law.

OF WHOM A PERSON SHOULD INQUIRE, RESPECTING LOST BAGGAGE.—AS TO LIABILITY OF RAILROAD COMPANY, WHEN BAGGAGE MASTER ARRANGES WITH PASSENGER THAT BAGGAGE MAY REMAIN AT THE DEPOT AND THAT THE FORMER WILL SEE TO IT UNTIL IT CAN BE SENT FOR.

The facts in the late case of Curtis *vs.* The Avon, Geneseo and Mount Morris R. R. Co., (49 Barb., 148) was briefly as follows: The plaintiff's minor son, a cripple, unable to carry his baggage, was placed on board the defendant's cars at Avon, and his fare paid to Mount Morris; on arriving at that place, the son informed the baggage man that he could not take away his baggage until he could go home and his father would come after it. The plaintiff was not at home when his son arrived, on Saturday afternoon, but came home between that time and Monday, and on Monday morning went to the station for the baggage and it was not to the found. The keeper of the station house had put the baggage into the room occupied by passengers, where they usually left baggage and allowed any person to take baggage away. The doors were open in the day time, and the station man was absent occasionally, from the room. There was a warehouse attached to the depot, but the baggage was not put into the warehouse.

On the trial the plaintiff proposed to show what was said to the plaintiff, the principal witness, by Booth, the company's agent, at the depot, who takes charge of the station.

The decision of the court was rendered by Johnson, J.—The objection to the inquiry made of Booth and his answer was not well taken. Booth was the defendant's agent, and had charge of the depot and freight therein, at Mount Morris, when the baggage in question was lost. He was the proper person to inquire of, and his answer is part of the evidence of the loss. It is clearly *res gestæ*. So in regard to the arrangement between the plaintiff's son and Leming, the baggage master, that the baggage might remain at the depot, and he would see to it, till it could be sent for. (McCotter *vs.* Hooker, 4 Seld., 497.) But were this otherwise, the error would be cured, a both these agents were used as witnesses on behalf of the defendant, and testified to the same facts precisely and to nothing different in any essential particular.

The evidence to show that the plaintiff's son was lame and unable to take charge of his baggage personally, was properly received. It tended to prove that he was guilty of no negligence in not calling for and taking charge of his baggage upon the arrival at his place of destination; and also, a good reason for making the arrangement, with the defendant's agents, that it should remain in the defendant's custody until called for.

Upon the merits, the defendant's liability was correctly determined. The case of Roth *vs.* Buffalo and State Line R. R. (84 N. Y. Rep. 548.) settles the rule, that where a passenger on arriving at his destination, neglects to look after his baggage and negligently leaves it, without any arrangement that the carrier shall retain it for him and it is lost while thus situated, without fault on the part of the carrier, he is not liable. In the present case, there was no delivering of the baggage by the defendant, and no neglect to claim it, or to inquire for it, by the plaintiff's son. On the contrary, it was retained by the defendant on request, until it could be sent for. In this respect, the case is nearly identical, in its facts, with that of Powell *vs.* Myers, (26 Wend., 591) which is not overruled in Roth *vs.* State Line R. R. Co., but is on the contrary conceded to be good law. Upon the undisputed facts of the case, the defendant's liability, as common carrier of the baggage in question, continued after such baggage was taken from the cars, and until it was delivered or tendered to the owner. The judgment must, therefore, be affirmed.

(Monroe General Term, June 3, 1867.)

Georgia Air Line Railroad.

An act to Loan the Credit of the State to the Georgia Air Line Railroad Company, and for other purposes:

Whereas, The Georgia Air Line Railroad, a road chartered by the Legislature of the State of Georgia, to be built from the city of Atlanta, in this State, to the South Carolina State Line, in the direction of Anderson C. H., in said State, is a work of great general, as well as local value and importance to a large portion of the good people of this State; and whereas, the State of South Carolina has chartered a Railroad Company to effect the extension and continuous construction of said Railroad through that State; and whereas, the building of said Georgia Air Line Railroad will be of incalculable benefit to the State of Georgia, by developing the resources of a large and valuable portion of the State hitherto unprovided with Railroad advantages, and, with its proposed Eastward connections, will open an important and necessary link in a great through trunk line between the North and South, and the Atlantic and Pacific States.

SEC. 1. *Be in enacted by the Senate and House of Representatives of the State of Georgia in General Assembly convened*, That from and after the passage of this act, whenever the Georgia Air Line Railroad Company shall have completed and fully equipped twenty continuous miles of road, at either or both ends of its line, it shall be the duty of the Governor of the State, and is hereby required, for and in behalf of the State, to indorse the guaranty of the State on the first mortgage bonds of said Railroad Company, to the extents of twelve thousand dollars ($12,000) per mile for that portion thus finished, completed and equipped, and when a second section of twenty miles is completed and equipped, it shall be the duty of the Governor, and he is hereby required, to indorse the like guaranty on the said first mortgage bonds of the said Railroad Company, upon the presentation of said bonds by said company to the extent of twelve thousand dollars ($12,000) per mile for the second section of twenty miles; and this rate and extent of indorsement shall be continued upon the same conditions for each sub-

sequent section of twenty miles, until said railroad is completed. It being the true intent and meaning of this act, that the State shall indorse the first mortgage bonds of said railroad company to the extent of twelve thousand dollars ($12,000) per mile for each mile of company's line, within this State, whenever said railroad company shall prepare and execute said first-mortgage bonds, and shall make request for such indorsement of guaranty thereof as aforesaid.

SEC. 2. *Be it further enacted*, That if the last section of said railroad shall be less than twenty miles, the indorsement shall be at the said rate of twelve thousand dollars ($12,000) per mile.

SEC. 3. *Be it further enacted*, That before any such indorsement shall be made, the Governor shall be satisfied that so much of the road as the said indorsement shall be applied for, is really finished and in complete running order, and that said road is free from all mortgages or other legal incumbrances, which may, in any manner, endanger the security of the State, and upon the further condition, and express understanding, that any indorsement of said bonds as aforesaid, when made, shall not only subject all property of every kind, within this State, which may be purchased with said bonds, to the obligation of said first-mortgage lien until all the principal and interest due on the bonds so indorsed shall be paid; but the said indorsement shall be, and is hereby, understood to operate as a prior lien or mortgage on all of the property of the company to be enforced as hereinafter provided for.

SEC. 4. *Be it further enacted*, That in the event any bond or bonds indorsed by the State as provided in the first section of this act, or the interest that may accrue and become due thereon, shall not be paid by said railroad company at maturity or when due, it shall be the duty of the Governor, upon information of default by any holder of said bond or bonds, to seize and take possession of all the property of said railroad company, and apply the earnings of said road to the extinguishment of said unpaid bond or bonds, or coupons, and may, at his discretion, upon continued default in such payment by said company for the period of six months, sell the said road and its equipments, and other property belonging to said company, or any portion thereof, in such a manner and at such time as in his judgment may best subserve the interest of all concerned.

SEC. 5. *And be it further enacted*, That no railroad company in this State shall, under any pretext, sell or dispose of any bonds issued to it by the State, or any of its own bonds indorsed by the State, at less than ninety cents in the dollar in lawful money of the United States, and in case any such company to which the State has or may extend its aid, has or may, by any direct contract, or by any evasion or pretext, sell or dispose of, or attempt to sell or dispose of any bonds issued or indorsed by the State as aforesaid, for less than ninety cents in the dollar, it shall be the duty of his Excellency the Governor to withhold all further issue of bonds to such company, and all further indorsement of the bonds of such company; and any citizen or taxpayer in this State may appeal to the courts in his own name, to restrain such illegal use of the bonds so issued or indorsed to said company, and to discover the fraudulent or illegal use made of such bonds, by reason of which the credit of the State may be depreciated and the burdens of the citizens increased, and said indorsement shall in no case exceed the amount per mile already invested by stockholders or private persons, and actually paid in by stockholders, nor shall said indorsement exceed one million five hundred thousand dollars in any event.

SEC. 6. That all laws and parts of laws in conflict with this act, be, and the same are hereby repealed.

Approved, September 21, 1868.

BUFUS B. BULLOCK, Governor.

☞ The Naugatuck Railroad Co. is erecting an engine house and turn table at Ansonia.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of September, were:

☞ The Fort Wayne, Muncie and Cincinnati Railroad will be in operation in about a year. The City Council of Fort Wayne have voted to advance one hundred thousand dollars to the road as soon as it is in running order between that city and Bluffton, and Muncie and other towns along the line of the road have made liberal donations.

Manassas Gap Railroad.

The Manassas Branch of the Orange, Alexandria and Manassas Railroad was, before the war an independent road, extending from its junction with the Orange and Alexandria Railroad, to Strasburg, Shenandoah County, a county adjoining Frederick County, in which, at Winchester, the railroad from Harper's Ferry (worked by and in connection with the Baltimore and Ohio road) terminates, a short extension of which would unite it with the Manassas. Since then the road has become a branch of the Orange and Alexandria Railroad, a road which unites Alexandria and Lynchburg and connects with the Virginia and Tennessee road, and through it with the whole network of Southwestern railroads. The Manassas Branch of the Orange and Alexandria Railroad pursues a course somewhat northwardly from Manassas Junction; crossing the Blue Ridge at Manassas Gap, and traversing Warren County, and a portion of Shenandoah, it makes a turn almost at right angles near Strasburg, and thence proceeds southwestwardly almost through the centre of Virginia Valley. The cars on this road are now running to Mount Jackson, in Shenandoah County, and the road is expected to reach Harrisonburg, the county seat of Rockingham County, by the first of December. This place is twenty-five miles northeast of Staunton, the county seat of Augusta.

Interest on Virginia State Bonds.

The Governor of Virginia, in reply to a communication referred to him by the General commanding the first military district, in reference to the payment of interest on the State bonds, says: "I am informed and believe that when the Legislature provided for levying a tax of thirty cents on the one hundred dollars, with which to pay two per cent. semi-annually, it was not anticipated that the arrangement should extend beyond the year 1867, or the 1st of January, 1868. After that period it was supposed the improved condition of the State would warrant a much higher rate of taxation. * * All that can be expected to be done with the present means, and out of the tax already assessed, is to pay current expenses and two per cent. upon the bonded debt on the 1st of January next. I would, however, respectfully recommend that an additional assessment be ordered of twenty cents on the $100, to be immediately collected, which, with the surplus which will probably be on hand on the 1st of January, would enable the State to pay at that time an additional two per cent. which was due on the 1st of July, 1868.

Erie Railway.

The annual election of directors of this company was held on the 13th inst., when the following gentlemen were unanimously chosen directors for the ensuing year: Jay Gould, Alexander S. Diven, James Fisk, Jr., Frederick A. Lane, J. C. B. Davis, Wm. M. Tweed, Peter B. Sweeney, Daniel S. Miller, Jr., Homer Ramsdell, John Hilton, George M. Groves, John Ganson, Chas. G. Sisson, O. W. Chapman, Henry Thompson, William B. Skidmore, George M. Diven. Subsequently Jay Gould Esq., was re-elected president, and A. S. Diven, Esq., vice-president. The vote is said to have been the largest ever polled in the history of the company on a similar occasion.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of September, as compared with the same period of the year 1867:

	1868.	1867.
From freight.....	$476,525 01	$405,129 19
" passengers.....	258,638 96	239,743 53
" express matter...	10,257 00	7,987 50
" mail	7,825 00	7,825 00
" rent of railway...	7,083 34	7,083 34
" miscellaneous....	1,000 00	1,268 16
Total.....	$761,329 31	$669,036 82
Expenses	451,968 38	383,945 13
Net earnings.....	$309,360 93	$285,091 69

This shows an increase in earnings of $92,292 49; with an increase in expenses of $68,023 25—making the increase in net earnings, $24,269 24.

The earnings and expenses, from January 1 to September 30, compare as follows:

	1868.	1867.
Earnings	$5,768,702 28	$5,193,000 45
Expenses	3,628,758 27	3,596,944 77
Net earnings.....	$2,139,944 01	$1,596,055 68

This shows an increase in earnings of $575,701 83; with an increase in expenses of $31,813 50—making the increase in net earnings, $543,888 33.

Toledo, Wabash and Western Railway.

The following gentlemen have been elected directors of this company for the ensuing year: A. Boody, A. M. White, A. B. Baylis, J. H. Knox, Wm. Kidd, J. R. Jesup, W. J. Schenck, T. R. Butler, Wm. Mason, C. M. Smith, C. A. Savage, James Spears, George C. Ireland, W. Colburn, and J. N. Drummond. The officers are: A. Boody, President; Warren Colburn, Assistant President; J. N. Drummond, Vice President; Secretary and Treasurer, George H. Burrows; General Superintendent, C. H. Pierce.

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., September 14, 1868.

SEALED PROPOSALS will be received at the Office of the Company in Oneida, N. Y., until the 30th day of October, 1868, at noon, for the GRADING, MASONRY and BRIDGING of that portion of the New York and Oswego Midland Railroad, extending from Sidney Plains to the village of Walton, in Delaware County, a distance of about 22 miles. Also, for that portion of the line from Westfield Flats to Centreville, in Sullivan County, a distance of about 25 miles.

Proposals will also be received at the same time and place, for the Grading, Masonry and Bridging of the Delhi Branch, extending from the Main Line at Walton to Delhi, in Delaware County, a distance of about 16 miles.

The company will entertain separate proposals for Bridging only, both on the Main Line and Branch.

Plans, Profiles and Specifications will be ready for examination at the office of the Resident Engineer, in the village of Walton, for that portion of the line in Delaware County, including the Delhi Branch, on and after the 20th day of October next, and also at the office of the Resident Engineer in Middletown, Orange County, for that portion of the line in Sullivan County, at the same date.

Contractors who may desire to examine the work will receive all necessary information at the respective offices of the Resident Engineers above named.

D. C. LITTLEJOHN, President.
W. B. GILBERT, Chief Engineer. 5139

PROPOSALS FOR $40,000 MARKET STOCK.

Sealed proposals will be received at the Comptroller's office until Tuesday, October 20, 1868, at 2 o'clock P. M., when the same will be publicly opened, for the whole or any part of the sum of forty thousand dollars of market stock authorized by chapter 203, Laws of 1868, and by an ordinance of the Common Council, approved by the Mayor September 25, 1868.

Said stock is to be issued for the purpose of providing means for the completion of the market upon the land lying between Sixteenth and Seventeenth streets and avenue C and East River, and will bear interest at the rate of seven per cent. per annum, payable semi-annually, on the 1st day of May and November, in each year, and the principal will be redeemed on the 1st day of May, 1897.

The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will thereupon be required to deposit with the Chamberlain the sums awarded to them respectively, together with any premium thereon.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the sums awarded to them, bearing interest from the dates of payments.

Each proposal should be sealed and endorsed "Proposals for market stock," and enclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids if the interests of the corporation require it.

RICHARD B. CONNOLLY, Comptroller.

ONE OF THE

BEST INVESTMENTS.

THE First Mortgage Bonds OF THE UNION PACIFIC RAILROAD COMPANY.

850 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
OCT. 6, 1868.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

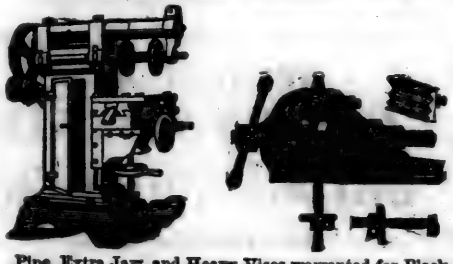
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

Intercolonial Railway!

TO CONTRACTORS.

THE Undersigned is instructed by the Government of Canada to inform intending Contractors that at an early day orders will be invited for the execution of certain portions of the INTERCOLONIAL RAILWAY, between River du Loup and Rimouski, in the Province of Quebec, between Truro and Amherst, in the Province of Nova Scotia, and between Dalhousie and Bathurst, in the Province of New Brunswick.

It is intended to let the work in Sections or Divisions, ranging from 15 to 35 miles, according to the situation and local circumstances.

The surveys are now in progress, in part completed, and the object of this notice is to afford intending contractors ample opportunity of examining the ground at once.

The Plans, Profiles, Specifications, Conditions of Contract, Forms of Tender, and other documents required for the information and guidance of Contractors, are now being prepared, and when ready, of which due notice will be given, will be seen at the Railway Engineer's Office, in Halifax, St. John, Dalhousie, Rimouski, River du Loup and Ottawa.

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York Saturday, October 24, 1868.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 14th inst. John W. Garrett, Esq., President, in the chair.

After the transaction of the usual routine business, the committee on finance reported the following resolutions, which were adopted:

Resolved, That a dividend of four per cent. be declared on the stock of the main stem of the Baltimore and Ohio Railroad Company, payable on and after the 30th of October instant, at the Merchants' Bank of Baltimore, and that the transfer books be closed on the 19th, and remain closed until the 31st instant.

Resolved, That the United States tax be paid by the company.

Resolved, That a dividend of five (5) per cent. be declared on the stock of the Washington Branch Railroad for the half year ending the 30th of September last, payable on and after the 16th of October at the Merchants' Bank of Baltimore.

Resolved, That the United States tax be paid by the company.

The President submitted the fortieth annual report, which was read and adopted, and ordered to be printed in pamphlet form, to be presented to the annual meeting of the stockholders to convene in November.

The President stated that he had been advised by President Hughart and the Chief Engineer, (B. H. Latrobe, Esq.,) of the Pittsburg and Connellsville Railroad Company, that the competition for the work recently advertised for proposals had been very active, 173 bids having been received. Awards have been recommended and confirmed of contracts to parties, who are reliably represented to be able, experienced and effective, for 38 sections of the road between Connellsville and Cumberland, which embrace all the heavy work on the line. The work awarded is estimated, at the prices bid, to amount to $1,393,905.

The estimates upon which the financial arrangements for this company were made were based upon the condition of the labor and provision market when higher than at present; and the President had the gratification to state that the work as contracted for, would amount to $253,901 less than those estimates. The contracts were doubtless secured at these prices in view of the certainty of prompt cash payment for the work as it progresses. This reduction in the cost enables the Pittsburg and Connellsville Company to decide to arch the tunnels upon its line permanently as those works are constructed. As the line is singularly free from water courses, and those which are crossed are of limited width, it has been determined that all the bridges shall be constructed upon durable masonry and of iron, so that the whole work will be of first class character.

The seven per cent. first mortgage bonds on the Pittsburg and Connellsville road, which are being sold at ninety per cent., with the accrued interest, are proving a very favorite investment, and the prospect is that the entire amount will be disposed of in advance of the requirements of the company. The contracts require the heaviest work to be completed within two years, and the work on sections of a lighter character will be contracted for in such time as to insure the completion of the whole line within that period.

Much interest and enthusiasm are exhibited in reference to this work upon the entire line to Pittsburg and in the Northwest. The importance of the road to the interests of this community cannot be overrated. Such was the practical appreciation of the advantages of the road to the region through which it passes that the right of way has been granted without charge, with trifling exceptions, upon the entire line.

The President stated that the business of the Baltimore and Ohio Company continued very heavy. The tonnage eastward and westward was alike large. The aggregate revenue for September of the main stem, the Washington and Parkersburg Branches, the Winchester and Potomac, Washington County and Central Ohio roads, was $966,915 99, showing an increase upon September, 1867, of $58,868 46. The transportation of coal, exclusive of that for the company's use, exceeded 95,000 tons during that month. The present equipment of the company for this trade continues to be fully employed, and should the enormous demand for the gas and semi-bituminous coals continue, it will doubtless be the policy of the company to increase the plant for this traffic.

The decision of the North German Lloyd to place two additional first class steamers upon the line between Baltimore and Bremen was some time since communicated. The work upon those steamers, which are being built by the Messrs. Laird, upon the Clyde, is progressing with such rapidity as to insure that they will be placed upon the line early in the ensuing spring. That company decided to open subscription books for four thousand shares of additional stock for the Baltimore and Bremen line to supply a portion of the capital needed for the new steamers. By the last mail the "Weser Zeitung," published at Bremen, September 28, has been received, in which the following statement appears:

"*North German Lloyd.*—The subscription books opened to-day for four thousand shares North German Lloyd stock, letter B. of one hundred rix dollars each, show that 137,600 shares were subscribed, so that subscribers will receive about 29 100 per cent. of their subscriptions in stock. This is the more remarkable as fifty per cent. of all subscriptions had to be deposited in cash at the time of subscribing."

What a pregnant fact is presented by this action of the astute merchants and capitalists of Bremen. In less than a year the vast economies and advantages on the part of Baltimore and the Baltimore and Ohio Railway and its connections for the interchange of business for the transportation of emigrants have been so palpably exhibited that, upon an application for $400,000 of capital, more than *thirteen millions* are proffered to participate in the enterprise.

There is no community in Europe in which the merchants are better informed or more sagacious than the merchants of Bremen. These careful capitalists have thus practically shown that they understand that steamships plying betwixt Bremen and Baltimore, through which, as compared with New York, nearly 300 miles of land carriage to the West are saved—a port at which coal is furnished at more than two dollars per ton less than the cost of the same fuel in New York—combined with the advantages of the lowest charges, a most convenient harbor, and the best

steamship piers on this continent, must control the transfer of a large portion of the business heretofore transacted with New York to Baltimore, and that the profits of steamers engaged in this trade must prove handsomely remunerative. This action of these capitalists is not based upon theory or speculative views, but is founded upon an experience which has shown that without difficulty traffic has been organized from the very commencement of the line of a profitable character, and to an extent at once greater than the capacity of the steamships placed in the trade.

The arrangements made for the convenience of emigrants have proved entirely satisfactory. The maximum of economy and comfort has been realized by these arrangements. The steamships are placed upon their arrival alongside a covered pier, through which a double track railway extends for 650 feet. Emigrants pass simply over the intermediate platform from the steamship to the cars, and without delay, as soon as their baggage is examined by the custom house officers, are transported to the West.

The steamship company has also arranged that, in case of delay in passing all the large quantities of baggage during the first day, the portion of the emigrants detained from this cause are kept on board until the following morning without extra charge. Thus every emigrant that uses this excellent route becomes an agent through whom its merits are advertised.

A striking evidence of the appreciation of the line was recently shown by the fact that tickets were furnished for nearly 1,600 emigrants arriving by one steamer, by the Baltimore and Ohio road, who were distributed to different points in *sixteen States and Territories*, to all of which passage was furnished at a cost materially less than the rates from New York. The increasing business of the port in tobacco, cotton, naval stores, etc., and in articles imported from Germany, France and England, assure a continuous and permanently large business for the steamers of this line. Adjourned.

Old Colony and Newport Railroad.

The income of this road for the years ending May 31, 1867 and 1868, was as follows:

	1867.	1868.
From passengers	$822,199 09	$766.060 75
" freight	469,817 49	436,295 58
" rents, etc	25 054 02	19,250 64
" expresses	27,954 17	35,776 45
" mails	10,750 00	23,913 26
" extra baggage	.....	2,139 76
" A. Holmes, $37,-078 73, less note $985 22	.....	36,093 51
" miscellaneous	5,588 30	4,919 58
	$1,369,863 07	$1,324,449 53

The expenditures in 1867–'68 were:

Passenger department	$96,341 58	
Merchandize department	105,977 82	
Locomotive department	228,385 20	
Maintenance of way	180,291 18	
General expenses	39,792 12	
Miscellaneous expenses	126,422 28	
		777,160 18
Earnings less expenses		$547,289 35
From which deduct—		
Town, city & State taxes	$72,303 91	
U.S. taxes on gross rec'pts	17,849 68	
Coupons and interest	142,992 72	
		233,146 31
Net earnings		$314,143 04
Add balance of income per last report		187,687 23
Total		$501,820 27
Deduct dividends January and July, 1868, 3 per cent. each and U. S. tax		306,246 32
Balance May 31, 1868		$195,583 95

Compared with the previous year the gross income shows a decrease of $36,413 54, with a decrease in working expenses of $85,928 88—making the increase in net earnings, $49,515 54. The amount paid for interest and taxes is $44,658 96 in excess of the previous year. The increase of net income, after payment of interest and taxes, is therefore $4,856 38. The report says:

Your directors found it expedient in August last to dispose of $1,000,000 of the bonds authorized by vote of the stockholders at the last annual meeting, and they were sold at par, less brokerage, payable in ten years from Aug. 1, 1867, with interest at seven per cent. per annum, payable semi-annually. In November, a further sale was made of $388,000 of the bonds at a premium. These sales were considered to be made on favorable terms.

There have been paid during the past year, of the bonds which matured April 1, 1867, $5.000; December, 1867, $179,000; April 1, 1868, $59,-500; notes payable account has been reduced, $570,000, and the remainder of the proceeds arising from the sales of bonds has been applied to the various expenditures charged in construction account, and a considerable portion appears in bills receivable account.

The expense of working the road for the last year has been about $77,000 more than for the year ending May 31, 1866; but, since then, the Dighton and Somerset Road, thirty-three miles in length, has been added to our road, and the trains were run last year 224,410 miles more than they were run in 1866.

About a hundred and fifty tons of steel rails have been laid down, which thus far have proved very satisfactory; and in those portions of the track subject to much use in shifting trains, &c., there is no doubt it is economy to use them.

During the past year one new locomotive, and ten new merchandise cars, have been added to the rolling stock, and charged in the expenses of the year. One new baggage car has been built, and ten passenger cars and two express cars have been re-built at the shop.

The town, state, and United States taxes amounted, last year, including $15,312 82 tax on dividends, to $105,465 91, which equals nearly one fourth of the net profits of the road.

The present system of taxation is not only unequal in its operations, but of doubtful expediency. It tends to create a prejudice against railroad companies, as it compels us to increase our rates largely to earn the amount net which we pay for taxes. The taxes would be more cheaply collected if levied in some way more directly from the people, as only forty per cent. of our earnings remains after paying expenses. Those who use the road have to pay the tax, while others are exempt from it; and they cannot expect any further material reduction of rates of fare, so long as this excessive system of taxing the business of the road is continued.

Owing to competition, the business to and from New York, in connection with our road, has fallen off about $94,000 the past year, as compared with the previous year; but this is in part made up by an increase from other sources, which has been about $57,000, although some of the largest business establishments on the line of our road have done less during the past year than for several years past.

Though the prospect of business for the present is not flattering, we may reasonably look for a gradual increase in our receipts the coming year, and for a material increase within a few years. But to insure such increase, a line of steamboats to New York in connection with this road must be maintained, and remunerative rates received; and it may be for the benefit of this company to aid the Steamboat Company in some way, to a reasonable extent, for that purpose.

The rates of fare and freight were reduced last year about ten per cent., and have been further reduced this year at several points. This we have done to meet the wishes of our patrons, as it is our desire to accommodate them as far as a proper regard to the interests of the company will permit. We have also somewhat increased the train accommodations. So far as we understand the sentiments of those who use our road, the traveling public are generally quite well satisfied with the rates of fare and freight now established, and with the train and depot accommodations afforded them. Our depots are generally in good condition, thorough repairs having been made on those which required it, except those at Quincy, South Weymouth, Plymouth, and Middleborough, which are to be reconstructed.

At the request of numerous persons living on the line of the road who desired to attend public worship in the city, Sunday trains have been run between Boston and South Braintree since February last, at hours most convenient for the people to attend church in the city. These trains appear to be satisfactory to the public, and have been well filled. This arrangement seems necessary for the public accommodation, on account of the discontinuance of the Horse Railroad.

The business on the Dighton and Somerset Branch is gradually increasing, and it is hoped that it will eventually become large enough to justify the cost of the road, although so much greater than was anticipated.

The road bed, bridges, track, fencing and rolling stock, are now in as good condition as they were at the commencement of the year. The Pile Bridge across Taunton Great River at Somerset is in good condition, the piles not having been materially affected by the worms. The drawbridge works well, and is so far as we know, very satisfactory to the public.

The track over which the trains with New York passengers pass between Boston and Newport is now in excellent condition, and the trains pass over it as smoothly and with as much comfort to passengers as over any other track in this part of the country.

It may be expected that hereafter the average cost of maintaining the track will be greater than it has been the past year; but the cost of repairing the depots, bridges, and fences has been larger the past year than it ought to average for some years to come. We have built about fifteen miles of new fence the past year, and considerable should be rebuilt this year. Although we have done some gravelling on the old road bed, much still remains to be done.

There was considerable detention of trains last winter near Newport, occasioned by accumulations of snow upon the track during heavy storms. The close board fences which we have since erected at the points where the detentions took place, will, we hope, protect the trains, from such occurrences hereafter.

The cost of the work done the past year and charged to construction account has somewhat exceeded the estimate in our last report, and the excess, when the work is completed, will be about $50,000. We have, the past year, expended about $80,000 less than the estimate proposed to be done during the year, so that work to the extent of about $130,000 remains to be done the coming year.

The passenger depot, including raising the grade to the drawbridge, relaying all the tracks, making the sidewalks for the sides and front of the depot, furniture for the passenger and office rooms, heating apparatus, fixtures and cooking apparatus for restaurant, gas-fixtures, platform at south end of depot, clock tower and clock, &c., &c., will, when completed, cost about $170,000.

In considering the cost, it should be remembered that the depot covers one and one quarter acres of land. Deducting the cost of grading and relaying the tracks, making the sidewalks and outside platform, the restaurant, furniture, and fixtures, it will not much exceed the estimated cost, notwithstanding several improvements have been adopted as the work progressed. It appears to give much satisfaction. Our aim in remodelling and reconstructing it was to give it all the modern improvements and conveniences, having regard to space and light in the main hall, and ladies' and gentlemen's apartments, and that part

of the building where passengers enter and leave the cars.

The repair-shops (including making the land and preparing the foundation, completing the wharf, the new fixtures, power and machinery, enclosing the grounds, the engine-house and turn-table, buildings for emigrants and the express-business in Boston proper) will cost about $25,000 more than the estimate; but the wharf, steam-power of shops, fence, and other additions and improvements which have been made, were not included in the estimate.

It has been necessary hitherto, to run the locomotives across the drawbridge and Fourth street at the end of Dover street Bridge to the engine-house at South Boston, whenever necessary to turn them after hauling trains into the Boston depot. As this occurs almost constantly, and is a very inconvenient and somewhat expensive arrangement, it has been thought best, in order to avoid it, to construct an engine-house and turn-table on South street, where our tracks connect with the tracks of the Boston and Albany Railroad; and the work is now being done, and will soon be completed. The additional room afforded will be needed for the storage of our engines when the old engine-house and shops are disposed of.

The change of the location of the road in Boston, and construction of new passenger, freight, and engine-houses, and new repair shops and accommodations, will cost a large sum; but when the depots and repair shops with their appurtenances are completed, we shall have, probably, as desirable and convenient arrangements (not only for the present, but for a largely increased passenger and freight business, and for building and repairing locomotives and cars) as any road in New England.

When our present works and machinery are transferred to the new repair shops, we shall have real estate in South Boston for sale, which is now taxed by the city at a valuation of about $350,000. We think it will bring in the market at least $300,000 when there is a demand for it.

All controversies relating to land and land damages in Fall River have been settled.

The claims for land and land damages on the Dighton and Somerset Branch have also been settled, with the exception of a few cases in Taunton and Dighton, in which the Company, believing the demands of the claimants unreasonable, have caused proceedings to be commenced before the county commissioners for determination of the same.

The Hanover Branch Road, which is about seven miles in length, and connects with our road at North Abington, has been opened to public travel.

Our arrangements continue satisfactory, as heretofore, with connecting roads, except that we are not adequately paid for the business we do in connection with them; especially in view of the great outlay we have made in depot and train accommodations. We cannot doubt they will see the justice of our claim to some advance on the proportions we now receive.

The grantees of the Plymouth and Vineyard-Sound Railroad Company think the construction of that road would materially benefit the people of that section, and desire to make such an arrangement with us as will enable them to build it. Doubtless its construction would increase our passenger business, especially during the season of pleasure-travel to Nantucket Island and to the camp-meetings at Martha's Vineyard.

The equipment of the road is as follows: 24 passenger and 11 freight locomotives; 59 passenger, 16 baggage, 159 long box, 180 long platform, 9 cattle, 7 short box, 87 short platform and 80 coal and gravel cars. Number of miles run by passenger trains, 591,627; by freight trains, 206,376; by gravel trains, etc., 37,803—total 835,806, an increase over the previous year of 74,752 miles. Number of passengers carried, 1,988,603; do., carried one mile, 38,570,314. Tons of merchandize carried, 279,786; do., carried one mile, 9,447,359. This shows a decrease of 1,612,978 in the mileage of passengers, and 3,070,661 in mileage of freight.

President.—HON. ONSLOW STEARNS.

Directors.—Onslow Stearns, Uriel Crocker, George A. Kettell, Benjamin Finch, Francis B. Hayes, Oliver Ames, Samuel Crocker, John S. Brayton and Minot Tirrell.

Treasurer.—JOHN M. WASHBURN.

Superintendent.—W. H. BULLOCK.

Railways in India.

The railways in India are in the hands of 11 companies, and on the 1st of May, 1868, their mileage was as follows: East Indian, 1,356; Great Indian Peninsula, 874; Madras, 645; Bombay, Baroda and Central India, 306; Scinde, 109; Punjaub, 246; Delhi, 54; Eastern Bengal, 114; Great Southern of India, 168; Calcutta and South Eastern, 29; Oude and Rohilkund, 42. Total, 3,943 miles. The Pall Mall *Gazette* says:

Nearly all the great cotton fields of India are now connected by railroad with shipping ports. The collapse in the Indian cotton trade which followed the termination of hostilities in America, must, to a considerable degree, have injured railway enterprise. During the half year ended at midsummer, India sent us only 729,000 bales of raw cotton; in the corresponding months of 1867, 940,000 bales; and for the same period of 1866 no less than 2,878,000 bales, or more than thrice this half year's supply. Nevertheless, it is officially reported that railways are beginning to tell upon the cultivation of cotton in India in other ways than merely providing a more rapid and less costly mode of conveyance than formerly. Steam factories for cleaning cotton are springing up: machines for half pressing are established in many places, and in others steam presses for packing the bales for shipment have been constructed. Upwards of £75,000,000 has been expended on the Indian Railways; the chief part of that sum was subscribed in England.

☞ At a meeting of the stockholders of the Emmittsburg Railroad, held on the 15th inst., the following gentlemen were chosen directors for the ensuing year: John McClosky, D. G. Adelsberger, Francis Berlando, Joshua Motter and Joshua Biggs. It is the intention of the stockholders and directors to build the road at once, and to have trains on a part of it before the winter sets in.

The Hoosac Tunnel.

We learn that Messrs. Carpenter, Odiorne & Co.'s bid on this work was $4,027 000. The Governor and Council required of them a deposit of $500,000 in United States or State bonds as satisfactory guarantees for the completion of the work. They declined to furnish this, believing that it was unnecessary, and not required by law. They did offer to give a bond in the penal sum of $500,000 with satisfactory sureties; and they have offered to furnish $150 000 in the above named bonds, but their securities were not accepted. The contract was then offered to Messrs. Emery, Urann & Co., their bid being $4,280,000, but they declined to furnish said "securities." The contract is now offered to parties in Canada, their bid being about $4,500,000. We think this is paying a higher price for securities, when they are not required by the law and seem in themselves unreasonable, there being by law 20 per cent. of the monthly earnings, retained by the State.—*Boston Post, 16th.*

☞ The following gentlemen have been elected directors of the Monongahela Valley Railroad Company: Dr. Alex. Patton, Dr. J. S. Van Voorhis, J. S. Prinkle, W. Frye, Martin Briggs, Jacob Hayes, and James Gordon. President, Capt. Thos. W. Briggs, Pittsburg. Vice President, Wm. Price, West Virginia.

☞ Preliminary surveys are being made of a railroad route from Winterport to Rockland by way of Prospect, Stockton, Searsmont, Belfast, Northport, Lincolnville and Camden. It would connect at Rockland with the Knox and Lincoln road now building, and form a link in the shore line route from Bangor to Bath, Brunswick and Portland.

☞ The graduation, masonry and bridging of the Wilmington and Reading Railroad between Wilmington and Birdsboro', which was let to Messrs. W. M. Wiley & Co., will be completed by the 10th of December next. The length of the road is 63¾ miles, and the contract price, exclusive of the bridge over the Schuylkill, $506,610 26.

☞ An error having occurred in the returns of the Pittsburg, Ft. Wayne and Chicago Railway Co., for September, as supplied to us by the company, we republish the statement with the correction.

☞ The work on the Bangor and Piscataquis Railroad is going forward rapidly. Over twenty miles are already graded, and a large number of workmen are now at work between Dover and Milo.

☞ Hartford has voted $500,000 to the stock of the proposed Connecticut Western Railroad, and the same amount to the Connecticut Valley Railroad.

☞ The Maryland and Delaware Railroad is now completed to Hillsboro', Carolina Co., Md., in its progress towards Easton from the Delaware Railroad.

☞ The whole amount of the Market Stock, $40,000, offered by Comptroller Connolly, has been awarded to the Equitable Life Assurance Co., at 106.

☞ The extensive Bessemer Steel Works of Messrs. John A. Griswold & Co., of Troy, N. Y., were destroyed by fire on the morning of the 20th inst. Loss about $100,000. Insurance, $33,000.

Vicksburg and Meridian R. R.

The earnings of this road for the fiscal years ending February 28, 1867, and February 29, 1868, were:

	1867.	1868.
From passengers	$246,947 60	$164,500 77
" freight	235,689 78	272,273 70
" mails	11,685 55	10,738 12
" express	15,018 27	15,018 27
" Incidentals	8,588 70	25,876 16
	$517,929 90	$488,407 02

The expenditures in 1867-'68 were:

Conducting transp.	$105,776 46	
Motive power	148,052 81	
Maintenance of way	277,346 21	
Maintenance of cars	101,061 12	
General salaries	14,558 33	
		646,794 93
Expenses more than earnings		$158,387 91

Included in the above expenditures is the sum of $280,755 for extra labor on track, rebuilding bridges, new rails, ties, chairs and spike, new cars, etc., leaving for operating expenses the sum of $366,039 93, or about 75 per cent. of the gross earnings. The receipts from all sources during the year were $1,094,031 32: and the expenditures, $1,017,832 67—leaving a balance of $76,198 65. The total receipts from all sources from May 10, 1865, to February 29, 1868, were as follows:

From earnings of the road	$1,363,414 06
" special loan	98,804 61
" other sources	79,238 81
Total	$1,541.457 48

And the expenditures were—

For operating road	$1,041,519 98	
Rebuilding road	610,125 19	
Contingent expenses	78,279 17	
		1,729,924 34
Excess of expenditures		$188,466 86

In the fall of 1865 the President was clothed with full authority to visit the bondholders, in Europe as well as in the United States, to obtain from them their consent to a plan of consolidating the liabilities of the company under a new mortgage, and to exchange the old bonds and other obligations into new 7 per cent. coupon bonds. The European bondholders unanimously agreed to this proposition and the American bondholders, with very few exceptions did the same.

The total debt of the company, including interest from Jan. 1, 1861 to Jan. 1, 1867, was at that date estimated at $2,989,500, consisting of first, second and third mortgage bonds and various other debts having no special security. The company on the favorable conclusion of the negotiations with holders of their bonds proceeded at once to create a $3,000,000 mortgage under all the sanctions and safeguards, approved by counsel representing all interests; and in accordance with the provisions of said mortgage, all the outstanding liabilities of the company were to be converted into the bonds secured by said mortgage, in which instrument special care was taken to preserve the grade and priority of all outstanding liens. The bonds to be given in exchange were to represent and stand as the 1st, 2d, 3d and 4th mortgage bonds, and those exchanged for prior mortgage bonds were to be endorsed as entitled to the existing and continuing security of the class to which it belongs. The bonds issued for arrears of interest and unsecured debts were to have no endorsement; and by this device the original virtue of each class was to be preserved, distinguishable by being written in inks of different colors, viz: the "red" endorsements indicating 1st mortgage security, "blue," the 2nd and "black" the 3d. The bonds having no endorsement to belong to the 4th class under the mortgage. The surrendered bonds were to be delivered into the hands of the mortgage trustees and deposited in the Pennsylvania Company for Insurance on Lives, and to be safely kept until the payment of the principal of the debt secured by the new mortgage, and not till then be delivered to the company; and with a view to the speedy and satisfactory exchange of the old bonds and other obligations into the new consolidated bonds the Philadelphia Trustees selected Charles Dutilh, President of said company, as agent for such exchange and custody.

The progress made towards the final exchange of the old for new bonds to March 1, 1868, will be seen in the following statement:

Classes.	Original amount.	Amount converted.	Am't to be converted.
1st mort. bonds	$722,500	$482,000	$240,500
2nd "	850,000	668,000	182,000
3rd "	154,000	108,000	46,000
Total mortgage debt converted or convertible into new mortgage bonds			$1,726,500
Arrears of interest, bills payable, contractors bonds, open accounts, to Jan. 1, 1867 to be funded in 4th bonds			1,263,000
Funded or fundable debt to Jan. 1, 1867.			$2,989,500
Floating debt to March 1, 1868			281,015
Funded and floating debt			$3,270.515

This debt of $3,270,515 will be increased by two considerable amounts; the first resulting from the non-payment of the coupons on the new bonds to the extent they have been issued by the agent of the Trustees; and second arising from the loan by the bondholders of 10 per cent. in cash on the principal and interest of the amount which the company owed them. This loan was made to relieve the company and enable them to place their road in a secure condition for operating. In addition to this the Philadelphia bondholders signed an agreement to surrender the two first coupons on the new 7 per cent. bonds, they being well satisfied of the inability of the company, without any fault of their own, to pay at maturity the coupons past due from January 1, 1867; and that it would not be in the power of the company to pay these coupons before the road was put in thorough repair, and properly equipped for a large and profitable business, nor until there is a restoration of harmony and prosperity in the state and section, not then existing.

After these encouraging demonstrations in Philadelphia, ratified by the signatures of the bondholders to an agreement to aid the company by a loan of money and to suspend the collection of past due coupons, without imposing embarrassing conditions, but leaving the question of settlement to be determined by a committee of the trustees as to time and terms for the surrender of past due coupons and the ten per cent. cash loan, the Board of Managers held a meeting on the 14th of May 1867, and adopted resolutions instructing the President of the Company to proceed to Europe and secure if possible the co-operation of the foreign bondholders with the domestic creditors. "I accordingly" (the President says) "sailed for Liverpool on the 5th of June 1867, taking with me the agreement signed by the Philadelphia bondholders, together with a highly favorable letter from the trustees of the $3,000,000 mortgage. Immediately on reaching London I entered upon the business of my mission. Our bonds were held in large amounts in London, Paris, Amsterdam and Belfast, all of which cities I visited, and found our bondholders more forbearing and generously disposed towards our company than we had any reason to expect. Altogether, the negotiation was a most gratifying success, and speedily concluded. I obtained the signature of every European bondholder for the 10 per cent. cash loan, and also for the surrender of the coupons, to the same agreement that had been signed by our friends in Philadelphia."

The whole of the ten per cent. subscription amounts to nearly $200,000—in which amount is included the cost of five-hundred tons of railroad iron subscribed in lieu of money. Another party paid his subscription in the 2d mortgage bonds of the company at an agreed valuation.

This newly made debt, especially the ten per cent. cash subscription is and always should be held as an obligation of the highest grade and it should be secured beyond any reasonable contingency. By means of it the company were enabled to bring the work of construction to a close, to place the track and rolling stock in excellent and serviceable condition, and since 1st of January last to operate the road at such greatly reduced expenses, as to derive a reasonable profit from the limited amount of business which had been done.

The $3,000,000 funded debt is payable in 1890 and secured by the consolidated mortgage. It consists of 1st, 2d, 3d and 4th mortgage bonds bearing 7 per cent. interest, a portion of which is made payable in January and July of each year, and a portion in April and October. The annual interest will amount to $210,000, and in addition there will be a debt for past due coupons of $420,000, drawing interest to the amount of $29,400 and the interest on the $200,000 cash loan at 8 per cent. will be $16,000, making the total annual interest to be provided for $255,400. This is a heavier amount of interest than can be fully paid the current year, or perhaps for several years to come, out of the receipts of the company. The question, how the difficulty is to be met and overcome, is one of facts and figures, of policy and prospects. To allow the debt to grow larger and larger from year to year by the non-payment of never-ceasing interest, must lead to the certain ruin of the company and to inevitable and heavy loss to those creditors who hold the weakest securities.

The gross receipts of the road for the fiscal year ending February 1867 were $517,929, 90 and for the year ending February 1868 they were $488,407. From present indications the receipts for 1868-'69 may not exceed $425.000. Deducting from this 65 per cent. for expenses the net revenue would be nearly $160,000 applicable to interest. With this amount the interest on the 1st, 2d and 3d bonds and the cash loan could be paid but no more, the amount for these payments requiring $136,855 annually. "Under these circumstances" (the President says) "we believe it would be best for all parties to substitute a 7 per

cent. preferred stock for all the non-endorsed (4th) bonds secured by the $3,000,000 mortgage, and for all other obligations including arrears of interest which has accrued since January 1867." This arrangement would almost insure the punctual payment of interest on the 1st, 2d and 3d bonds and cash loan, and those who received the stock would be no worse off by the substitution. By this plan, all that is left after paying current expenses and the appropriation of $30,000 a year for a sinking fund after 1870, will be applied to the payment of the interest on the mortgage bonds heretofore mentioned and the remainder as dividend to the holders of the preferred stock. The common stock will of course receive no dividends unless there is an excess of receipts after paying 7 per cent. on the preferred stock.

The president dwells largely on the causes of the reduced receipts for 1867–'68, attributing them to the prevalence of the yellow fever along the line of the road, the failure of the cotton crop and the long continued low stage of water in the Mississippi River. With these combined afflictions and adverse circumstances it is not wonderful that the passenger business was $82,446 less than the previous year, nor that the freight business should have been curtailed of its legitimate proportions to an extent beyond computation. In the meantime the road has been greatly improved by putting down 800 tons of new 50 lbs. rail, and by a regular system of ditching and draining the road bed and ballasting those parts where bad soil prevails. The motive power and cars of the company were never in better order for service than at present, and the road has now the capacity and all necessary facilities for accommodating a much larger freight and passenger business than hitherto.

This road has the advantage of good terminial points and numerous flourishing towns and villages on its line. Vicksburg is its western terminus and head quarters, and one of the great cotton marts of the Mississippi Valley. Jackson the State capital is on the line 45 miles East from Vicksburg, and here the road is intersected by the New Orleans, Jackson and Great Northern Railroad. Meridian the Eastern terminus, is a city of marvellous growth and yet in its infancy. It was born of the road in 1861 and has before it a career of prosperity. It is also an important railroad centre, situated on the line of the Mobile and Ohio Railroad and the western terminus of both the Selma and Meridian, and the Northeast and Southwest Alabama Railroads.

Hitherto for want of East and West connections this road has had to rely principally for its receipts on its local business. The connections east, however, are now being rapidly amplified, and first the Selma, Rome and Dalton Railroad which will be connected at Cleveland, Tenn., with the great trunk or Air Line, composed of the Tennessee and Virginia Railroads. This being the shortest route between New York and New Orleans, it will become the main mail route between those cities, and also the preferred line of travel to and from New Orleans, Washington, Baltimore, Philadelphia, New York, Richmond, Petersburg, Norfolk, &c. Not only because it is the shortest route, but because, in a high degree, it combines many attractions and inducements, such as romantic mountain scenery, passing through a mountainous country in Alabama, Tennessee and Virginia, of great mineral and agricultural resources, affording pure water and a health restoring atmosphere. This interchange of travel between the Southwest and East, as well as supplying the wants and interchanging the products of distant regions made practicable by their geographical position and facilities of communication will add immeasurably to the traffic and earnings of all the railroad lines with which this road may connect east of Meridian, and also to the prosperity of this railroad.

The distances in miles from Vicksburg, Jackson and New Orleans to the cities named, *via* the Selma, Rome and Dalton Railroad are as follows:

From	Vicksburg.	Jackson.	N. Orleans.
To Selma, Ala.....	247	202	385
To Dalton, Ga.....	484	439	622
To Cleveland, Tenn.	511	466	649
To Knoxville, "	593	548	731
To Lynchburg, Va.	927	882	1,065
To Petersburg, "	1,050	1,005	1,188
To Richmond, "	1,052	1,007	1,190
To Washington, D.C.	1,105	1,060	1,243
To Norfolk, Va....	1,131	1,086	1,269
To Baltimore, Md..	1,145	1,100	1,283
To Philadelphia, Pa.	1,243	1,198	1,381
To New York City.	1,331	1,286	1,469

The shortest line from the Mississippi River to the Atlantic Ocean is from Vicksburg to Savannah 673 miles. The Montgomery and Selma connection (of 44 miles,) is now the great desideratum for at once securing to this line that valuable business for points east of Selma, and there is now every prospect of its early completion. This line must eventually be the main passenger route from Texas, Louisiana, and a large portion of Mississippi, to the States of Alabama, Florida, Georgia, and South and North Carolina.

Sooner or later the Vicksburg and Meridian Railroad with its eastern connections, will be a constituent portion of the main trunk line stretching from the Atlantic seaports *via* the Southern Pacific Railroad to San Diego and San Francisco on the Pacific, and a grand avenue of the world's travel and traffic. The Northern Louisiana and Texas (late Vicksburg, Shreveport and Texas) Railroad, was previous to the war built and in operation from Vicksburg to Monroe, 75 miles, and from Shreveport to the Texas line, 18 miles, the intermediate sections 115 miles not having been yet perfected. At the Texas line this road connects with the Southern Pacific Railroad already completed to Marshall, Tex., 24 miles. With even this portion of the contemplated through line built, a great increase of travel and trade would be brought to the Vicksburg and Meridian Railroad. By this route Vicksburg would be within 10 hours, and New Orleans within 24 hours of Shreveport; and as a matter of economy both in time and money, this traffic would enure to the benefit of the Vicksburg and Meridian line. The advantage of traffic would be relatively greater than by present routes, and Texas and Louisiana produce reach market at a much less cost than at present.

The distance from New York to Vicksburg being 1,331 miles by the Selma, Rome and Georgia route, and from Vicksburg to San Diego, Cal., being 1,400 will make the distance from San Diego to New York, 2,731, or six days railroad travel. The shortest distances and time on this line from ocean to ocean, will be from Savannah to San Diego, 2,073 miles, or 109 hours. And from other seaports to the same destination the distance will be found by adding 1,400 to the distance between them and Vicksburg, as given in the foregoing table. By the laws of trade, the transportation of merchandize, as well as people, will adopt that route which most fully combines the recommendations of speed, cheapness, safety and comfort, and this will be the line that will most fully meet these requirements. The teas, silks, spices, &c., of Asia destined for Europe will be shipped *via* California, and then by rail over this grand continental and always available line to the Atlantic cities for reshipment to European ports—making the voyage from Canton to New York in about 24 days, and to London in from 35 to 40 days, against 200 days by the usual sea route, which to London, New York, or New Orleans is between 15,000 and 16,000 miles. The reverse trade would also be commensurably large. In view of such reasonable and important results there can be no question that the destiny and interests of the Nation as well as the railroads in the United States are deeply involved in the question of speedily building this southern line to the Pacific Ocean. The limit of the western connections of the line of roads of which the Vicksburg and Meridian Railroad forms a part, should not be short of that ocean.

The company have 19 locomotives, 10 passenger, 5 baggage, 58 flat, 4 caboose and 70 box cars. Trains moved, 203,368 miles. Number of passengers carried, 67,726; do., carried one mile, 2,660,214. Tons of freight transported, 84,600. Earnings per mile run, $2.40. Earnings per mile of road, $3,428 90.

BALANCE SHEET, FEB. 29, 1868.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, October 24, 1868.

Stock Exchange and Money Market.

The Money Market was comparatively well supplied and quite easy up to Tuesday of the current week; when, through the manipulations of certain street speculators, chiefly at the Stock Boards, the available supply was very seriously—though but temporarily—diminished, and the price of call aid was advanced quite suddenly to full seven per cent. to the most unexceptionable borrowers. On Wednesday the pressure, from artificial causes, was most severely felt. Seven per cent. was the minimum rate to the more prominent street houses, several needy parties were compelled to pay the full legal figure and a commission in addition, in gold, to obtain the requisite help. A few of the city banks were charged with having lent themselves to further the movement against ease in Money, and buoyancy in financial and commercial values. The discount market was close and tame. The choicest grades of paper only were in request at 7@7½ per cent. per annum. The U. S. Treasury was augmenting its balances up to and including last Saturday; but has since been disbursing considerably more money than it has been receiving. The city banks this week report a loss of $1,378,229 of legal tender notes, $159,477 of specie, and $173,411 of deposits, with a reduction of $951,447 in the loan averages, and an increase of $25,815 in the circulation. The bank clearances this week have been $541,310,625 and the business, $21,745,212.

The specie reserve of the city banks is now $9,186,620, against $7,319,010 same time last year. The city bank deposits are now $188 880,586, against $173,438,375 week ending Oct. 12, 1867. The legal tender reserve amounts to $58,626,857, against $54,345,832 same time last year. The circulation now stands at $34,213,918, against $24,057,450 same time last year. The loans are now $264,344,135, against $247,553,911 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $105,919,409 a day, against a daily average of $109,659,692 the preceding week, and $124 6 0 000 the week ending with Oct. 1, 1868. The current week's exchanges average about $145,000 000 a day. The city banks, last week, lost $159.447 of specie, $173,411 of deposits, and $1,378,229 of legal tender notes. They reduced their loans, $951,447; and increased their circulation, $25 815.

The New York Gold Exchange Bank reports for the week ending Saturday, the 18 day of October, 1868, the average amount of loans and discounts as $1,437,422; average amount of specie, $405,771; average amount of deposits, $1,322,364.

The Philadelphia Bank movement the past week shows an increase in loans of $27 281; an increase of $39.316 in specie; a decrease in legal tenders of $260,212; a decrease of $365,837 in deposits; and an increase of $3,187 in circulation. The Bank Clearings show a decrease of $3,123,204, and the balances an increase of $114,952.

The outstanding amount of coin certificates on the 1st of Oct., was $20,236,400, against $25,161,620 on the 1st of Sept., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,975,000, and retired $2,187,203 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during September, reached $1,963,300.

The U. S. Sub-Treasury receipts, week ending with Oct. 17, were $15,664,403, including $2,302 204 from customs duties; payments, $11,814,763, including $57,643 of coin interest; balance at the close of the week, $98,815,286, against $94,965,646, at the close of the preceding week, showing an increase of $3,849,641. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,829,775 including $409,000 from customs; and payments, $3,604,593, including $9,100 of coin interest; on Tuesday, receipts, $1,620,305 including $455,000 from customs, and payments, $3,812,543, including $7,600 of coin interest. The balance at the close of business on Tuesday stood at $95,848,230, against $94,162,516, a week previous; and $94,198,577, on Sept. 30, 1868. The aggregate receipts of the office from all sources in September, were $54,298,704; aggregate payments, $47,354,171. The balance on the 1st of October was $94,499,990, or about 7 millions more than on the 1st of September, which amounted to $87,555,452.

National Bank notes to the amount of $111,810 were issued last week by the Treasury Department, making the total issue to 1,673 banks

thus far, amount to $310,243,806, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,317,301, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,926,505. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342 098,200; and for the public deposits, $38,096,350—making a total of $380,194,550. The Treasury Department last week redeemed and destroyed $525,400 of worn and mutilated fractional currency, and issued $654,383 of new. The outstanding amount of fractional currency on the 1st of October, was $32,933,614, against $31,802,218 on the 1st of September; $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been up in a full average, since our last. The excises last week, yielded about 6¼ millions; customs at the port of New York, $2,302,204, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $10,515,530 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $71,500,000.

Gold has been fairly active, during the week, but at a reduced range of prices, the extremes having been 138⅜@136⅛, and the closing figures on Wednesday 136⅜@136½. Government continued its daily sales of $300,000 in coin, all through the week, generally realizing a fraction more than the average of the Gold Exchange prices. But the new mode of selling gold, on Government securities, seems to benefit rather the speculative than the mercantile interest; and it appears that after the only six or seven days' practical trial of the new plan, a memorial has been put in circulation among the Importing and Exporting Houses of this City, addressed to the Secretary of the Treasury, in favor of a change in the system, which, it is believed, will be made after the ten days' sales of $300,000 per day, heretofore advertised, are over, that is by the end of the current week.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,184,768, against $2,632,511 same time last year. The customs demand for Gold last week, averaged $383,701 a day; thus far, this week, it has been equal to $432,000 a day, or equal to a weekly aggregate of $2,592,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $76,098 and from California, $263,501. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $97,997,893, against $101,152,480 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $32,115,596, against $23,855.604 in 1867, showing an increase thus far in 1868, of $8,259,992. The exports of specie, from this port, last week, were $410,313, against $119,982 same week last year; total, since Jan. 1, 1868, $66,840,470, against $43,042,672 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $57,643; since Jan. 1, 1868, $63,765,130, against $43,401,924. The specie exports from San Francisco, from Jan. 1, to Sept. 22, 1868, were $28,245,532, against $30,971,689 same time last year.

Government received $6,514,247 from customs at the port of San Francisco, from Jan. 1, to Sept. 22, against $5,988,898 same time in the preceding year.

Foreign exchange has been quiet, but quoted firm, most of the week, though closing slightly in favor of buyers. Bankers' prime sixty day bills on London closed on Wednesday at 109¼ @109½, and on Paris to 5.20c.@5.16¼; sight bills on London to 109¾@110, and on Paris to 5.14¾c.@5.13. The offering of produce bills has been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,351,454, against $4,355,743, same week last year; total, since Jan. 1, 1868, $132,159,391, against $147,264,935 in 1867.

Government securities were quite brisk and buoyant up to Tuesday. On Tuesday, the public funds were in less active request, and, under the hammering of a few operators, partly in the interest of stock speculators, prices were suddenly beaten down ¾@1¼ per cent. The offerings of bonds were not very large at the reduced figures; and it was inferred that the bears did not feel over confident of the final success of their movements, which received no countenance whatsoever from any of the prominent dealers in the public funds, all of whom unqualifiedly denounced the manipulation as originating in the most discreditable motives, and aiming at the most reprehensible results, as against the public credit. The later dealings on Wednesday showed reviving firmness and buoyancy, despite the activity in money.

U. S. sixes of 1881 closed here on Wednesday at 115¾@116; U. S. Five-twenties of 1862, 113⅜@113½; U.S. Five twenties of 1864 at 111½ @111¾; U. S. Five-twenties of 1865 at 111¼@ 111½; U. S. Five-twenties of 1865, consolidated, 110⅛@110⅜; U. S. Five-twenties of 1867, 110¼ @110½; U. S. Five-twenties of 1868, 110⅝@ 110⅞; U. S. Ten-forties at 105⅞@106; U. S. Six per cent. currency bonds, 98¾@99⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 7.	Oct. 14.	Oct. 21.
Consols	94½	94⅞	94¾
U.S. 5-20's of 1862	74	74½	72⅞
Erie	31¾	31¾	31¼
Ill. Central	95½	95¼	96½

Railway and miscellaneous share property has been more actively dealt in, opening at rapidly advancing prices, but under the extreme pressure in the money line on Tuesday and Wednesday, closing at much reduced and irregular figures.

The produce markets have been less active, since our last, though prices of the leading articles have favored buyers. Middling upland cotton closed heavily on Wednesday at 25@25¼ cents per lb. The stock of cotton now here is estimated at about 17,500 bales. The receipts at the port this week, have averaged about 4,000 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 185,000 bales, against 96,500 bales same time last year; exports, same time 48,500 bales, against 29,000 bales same time last year; stock on hand at latest dates, 110,000 bales, against 107,500 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods, since Jan. 1, have been 7,484 pkgs., against 6,604 pkgs., same time last year. At the Live Stock market, this week, Beeves have been in less demand at from 9@16½c. per lb.; week's receipts, 7,283. Veal calves have been in good request at from 8½@13c. per lb.; receipts, 1,847. Sheep and lambs less active and cheaper, at from 4@6c., and 5½@7½c. per lb., respectively; receipts, 47,815. Swine fairly active but quoted weak at 8¾ @9¾c. per lb., all live weight; receipts, 29,155. Foreign goods have been in moderate request. The total imports of foreign dry goods, last week, were $1,577,323, and the total amount marketed $1,466,138. The value of foreign merchandise imported last week, was $3,794,136—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,371.459, against $5,281,277 same week last year; from Jan. 1, 1868, $205,318,573, against $215,971,965 same time in 1867. The freight market has been less active, and heavy. For Liverpool we quote flour at 2s. by sail, and 2s. 3d.@2s. 1d. by steamer, per bbl.; grain at 6½d. by sail, and 7@7¼d. by steamer, per bushel; cotton at ¼@$\frac{5}{16}$d. by sail, and ⅜@½d. by steamer, per lb.; and heavy goods 20s.@30s. by sail, and 25s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 576.

The New York exports, exclusive of specie, for the week ending Oct. 20, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,355,743	$3,351,454
Prev. reported	142,909,242	128,807,937
Since January 1	$147,264,985	$132,159,391

The imports for the week ending October 17, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,451,270	$1,577,323
Gen. merchandise	3,830,007	3,794,136
Total for the week	$5,281,277	$5,371,459
Previously reported	198,228,013	197,685,206
Since January 1	$203,509,290	$203,056,665

The balance in the Sub-Treasury on Wednesday was $96,170,151.

☞ THE CENTRAL PACIFIC RAILROAD IS NOW BEING pushed forward with unprecedented energy, 250 miles having been added during the current year, and a large portion of the remainder is graded. The way business exceeds the present facilities of the company, and the earnings already average more THAN A QUARTER OF A MILLION IN GOLD PER MONTH. A limited amount of the Company's six per cent. First Mortgage Bonds (principal and interest in coin) will be disposed of at 103 and accrued interest in currency. Coupons payable July and January, in New York City. For sale by banks, bankers, agents for the loan, and by

FISK & HATCH,
Bankers and Dealers in Government Securities.
No. 5 Nassau street.

☞ PRINCIPAL AND INTEREST IN GOLD.—The First Mortgage fifty-year seven per cent. Sinking Fund Coupon Bonds of the Rockford, Rock Island, and St. Louis Railroad Company, principal and interest payable in GOLD COIN, *free of Government tax*, are for sale at the office of the Company, No. 12 Wall street, at 97½ per cent., and accrued interest in currency.

Pamphlets giving fuller information, may be had at the office.

Government and other securities received in exchange at market rates.

H. H. BOODY, Treasurer.

Union Pacific Railroad.

On Monday, 26th inst., the Union Pacific Railroad Company will have cars running over 860 miles of their road. Government bonds have been issued for 780 miles, and the President has signed the necessary order for making out and delivering those for the next 20 miles. The commissioners have already accepted 800 miles of road, and the necessary order has been signed fo the examination of the next 20 mile section. Cornelius Wendell has been appointed Commissioner vice Mr. White removed. The Board now consists of Frank Blair, Gen. Buford and Cornelius Wendell.

Great Western Railway of Canada.

From the accounts of the half-year ended July 31 last, the board have decided upon recommending a dividend at the rate of 2 per cent. per annum, free of income tax, reserving £2.000 for the renewal of ferry steamers and carrying forward to the current half-year the sum of £1,129 5*s*. This rate is just half that paid for the corresponding period last year.

☞ The new Suspension Bridge at Niagara Falls, commenced over a year ago, will be completed about the end of November. The bridge extends from a point just below the American Falls to a point on the Canadian side just below the Clifton House. The span is 1,264 feet and four inches, and the two cables are 1,900 feet long. In each cable there are seven wire ropes, each two and a half inches in diameter. The span is said to be longer than that of any other suspension bridge in the world.

☞ The Cincinnati, Hamilton and Dayton Railroad Company have declared a dividend of five per cent., in scrip, redeemable in first mortgage bonds of the Dayton and Michigan Railroad Company at par, and payable at the American Exchange National Bank, on or after the 26th inst. Scripholders can convert the same into bonds by applying to Lynde L. Jones, No. 137 Broadway, New York.

☞ The earnings of the Atlantic and Great Western Railway from the 1st April, 1868, (the commencement of the receiver's fiscal year,) to 31st August, 1868, were $1,859,902 15; for the same period last year, $2,117,944 58—decrease, $258,042 43.

☞ The Cleveland, Painesville and Ashtabula R. R. Co., have changed their name to the "Lake Shore Railway Company." Their transfer agents, the Farmers' Loan and Trust Company, are now issuing certificates of the new company.

Journal of Railroad Law.

WHEN A RAILROAD COMPANY IS LIABLE FOR DEATH CAUSED BY THE BREAKING DOWN OF A BRIDGE, AND RESPONSIBLE FOR INJURIES TO ITS EMPLOYEES.—TEST OF A STRONG BRIDGE.

The facts in the recent case of Faulkner, administrator, *vs.* The Erie Railway Co., (49 Barb, 324,) are as follows: The plaintiff recovered $5,000 damages on the trial of this action at the Tioga Circuit, in August, 1866. John C. Faulkner, the intestate, was an oilman and brakeman in the employ of the defendants, and while running on the defendants' road, was killed by the breaking down of a bridge of the defendants' over the Conhocton River, and the consequent fall of the car on which he was riding. The action is brought by his representatives, to recover damages for his death; and it is alleged that such death was caused by the negligence of the defendants in the care and maintenance of such bridge. The bridge was built in November, 1855, and broke down in May, 1865, from the effects of dry rot in some of its timbers. On the day before it broke it was examined by Gurmsey, who has charge of repairs on that division, and by Pratt, the division superintendent. They gave it a careful examination, applied the usual tests, watched the effect of a freight train passing over it while there, and pronounced it safe and sound. Evidence was given of the manner in which this bridge was built, and of the length of time bridges might safely stand without being rebuilt. There was no evidence of incompetency or want of skill on the part of Gurmsey or Pratt, or that the bridge was known to be defective before its fall. Evidence was given tending to show that a different mode of constructing this bridge would have made it stronger, but it was not shown to be a defective or unsafe bridge, in its original manner of construction.

The Judge submitted to the jury two propositions, to which the defendant excepted:

1st. If the bridge broke down in consequence of any defect in its construction which could have been avoided by the exercise of ordinary care and skill, the plaintiffs are entitled to recover.

2d. If the bridge broke down in consequence of having been used, without being rebuilt, longer than it was generally understood by competent persons having the care of railroad bridges, to be safe to use such bridges without rebuilding them, the plaintiffs are entitled to recover. This was an appeal from an order of the special term, denying a new trial, and from the judgment entered against the defendants on such order.

The opinion of the Court was delivered by Boardman, J.—There are certain legal propositions which the authorities cited by counsel sustain:

I. Ordinarily, the defendant is not liable for injuries to one of its employees occasioned by the negligence of another employee engaged in the same general business. Such employees on entering the service take upon themselves as an incident to the hiring, the ordinary risks and dangers arising therein, which includes the negligence or carelessness of their fellow servants. (Farwell *vs.* Bost. and Worc. R. R., 4 Metc., 49. Priestly *vs.* Fowler, 3 Mees. & Wells. 1.)

In addition to the general rule, these cases establish that no distinction arises from the different grades or ranks of the employees, nor from their being engaged in different kinds of work, provided the services tend to accomplish the same general purpose.

II. The defendant is, however, responsible for injuries to employees arising from its personal neglect, or from the want of ordinary care and precaution on the part of the master, in the selection of employees, appliances and machinery. (Ryan *vs.* Fowler, 24 N.Y. Rep., 410. Keegan *vs.* West. R. R., 8 N. Y. Rep., 175.)

I am satisfied by these cases, and by the law as therein laid down, that there was no negligence on the part of the defendant creating a liability for the damages suffered by the plaintiffs' intestate. This bridge was well built, of good sound materials, upon a plan in common use. The evidence as to its strength and capacity is abundant. There was, therefore, no original defect in its construction, constituting want of ordinary care, or negligence on the part of the defendants. This is true, or else the plaintiff is involved in the inconsistency of insisting upon a recovery on the ground that the bridge had stood so long under constant use, that the defendant was guilty of negligence in not rebuilding it. Both positions cannot be true. It could not have been so defective as to be dangerous, and yet stand so long as to become dangerous upon the presumption that it ought to be rebuilt by reason of its age. Besides, its destruction was in no sense due to any defect in its original construction, but to a process of natural decay, called dry rot. There is evidence showing Gurmsey, who inspected this bridge the day before its destruction, had had charge of bridges since 1848, and was one of the best men on the road; that Pratt, the division superintendent, had been in the employ of the defendant since 1850, as track master and superintendent. No question as to the competency or fitness of these men for their respective duties, appears to have been raised upon the trial. The defendant is not, therefore, liable by reason of employing incompetent, unskilful or improper persons. The defendant is not a guarantor of competency or fitness in its employees. It must affirmatively be made to appear that proper care was not employed in the selection of these agents, and that by the exercise of proper care these agents would have been rejected as incompetent. Nor is the defendant responsible for the insufficiency of this bridge, in the absence of notice, unless the company was ignorant of its condition through its negligence or want of proper care. It is not claimed that the company had any notice which could charge it with knowledge, except the length of time the bridge had been standing. That was not an unusual time. Other bridges have been standing much longer. Every bridge must be judged by its exposure, its length of span, its materials, its means of protection. While this is an important element, the other considerations are equally important. All taken together, upon an examination, must have weight upon the necessity of a rebuilding of the bridge. Here, too, the skill and competency of the bridge builder is brought into action. His error of judgment is not the negligence of the company. The decision should be based upon a skilful examination by competent persons. The time cannot be fixed and limited by the verdict of a jury. Each case must be judged of by itself. The bridge had every appearance of being sound and safe; it was examined and tested and watched, under the weight of a train of cars on the day before the accident happened, by the repairer of bridges and the superintendent of that division, and was deemed entirely sound and safe. I do not see what more could have been legally required of the company in the exercise of proper care than was done in this case. If this was negligence in the defendants, then a latent defect in a steam boiler, a rotten plank in a ship, a flaw in an iron rail, an unknown weakness in a factory door or wall, would charge the master with all the damages suffered by his employees in consequence. In the case of common carriers, the liability would be as broad in case of employees as passengers, for injuries resulting from accidents like the one in question. On the contrary, I am convinced they must have notice of such defects, or else have neglected to use the ordinary care and skill which would have given knowledge. I am confirmed and supported in the conclusion to which I have come, by the opinion of Mr. Justice Marvin, in the case of Lucy A. Warner, adx. *vs.* The Erie Railway Co., (Mss.) in an action for damages, in causing the death of the plaintiff's husband by the falling of the same bridge, and on the same occasion. The evidence, so far as it appears, was substantially the same, and the judge by a very satisfactory process of reasoning, reaches the conclusion, that the complaint should be dismissed.

I think the defendants' motion for a non-suit should have been granted; that the judgment and order appealed from should be reversed, and a new trial granted, costs to abide the event.

Concord and Claremont Railroad.

A correspondent of the Boston *Journal*, writing from Concord, October 14, 1868, says it is stated that Concord's appropriation of $50,000 will secure, in connection with the funds heretofore voted by various places, the speedy extension of the Concord and Claremont Railroad from its present terminus at Bradford, to the Connecticut River, and then adds:

This will be one of the most important of the railroad enterprises now being agitated by the people of New Hampshire. When Concord and Claremont are connected with iron bands, only two links will be required to form what is said would be the most direct railroad chain from Portland to Chicago and the great West. One of those links would be the short distance from Claremont to Cavendish, Vt., on the Rutland line, and the other eastward from Concord, through Pittsfield to Rochester, to meet the railroad which will soon connect that place with Portland. The Vermont people say that after the Claremont extension is finished they will connect that route with Cavendish, if citizens of this State will take care of the Concord and Rochester section. The advantages which would accrue to this Commonwealth from a grand trunk line from Portland through central New Hampshire to the West cannot be estimated. Immediate steps will be taken by Concord toward securing this great railroad channel. Corresponding action will also be taken by Pittsfield and the other interested towns between this city and Rochester.

☞ Work is progressing on the machinery for the new rolling mill of the Baltimore and Ohio Railroad Company at Cumberland, Md. It is intended to have it all ready by next summer, and the construction of the buildings will be commenced in the spring.

Boston and Albany Railroad.

A special meeting of the stockholders of this company was held in Boston on the 15th inst., to take some action on the act authorizing "Railroad Corporations to subscribe to the capital stock of Steamship Corporations, duly chartered by the laws of this Commonwealth." There was a large attendance, over which Mr. Chester W. Chapin, President of the road, presided. The Chairman explained the object of the meeting, which was to consider an act of the Legislature of June last, which required action within six months. Application was made to that (the Boston and Albany) Board to aid in some manner the American Steamship Company. They seemed to prefer subscription on their stock. A committee was appointed at an early day by the Board, who had considerable correspondence with the company on that subject, and finally intimated to them that they did not deem it expedient for the railroad to become subscribers to their stock, but they hinted that a loan might be made which would accomplish the object they desired, viz: the prevention of the sale of their vessels. They then made a proposition to the Board for a loan of $500,000 upon bonds, which would mature within thirteen months, and bear interest at the rate of 7 8-10 per cent. The Board, however, come to the conclusion that the question involved such consequences that they resolved to lay it before the stockholders, and this meeting was called accordingly.

Mr. Peter T. Homer thought great care should be taken in dealing with the subject. It was not profitable for railroads in the present state of things to attempt ocean navigation, and with the great demands made upon the road now, would demand all the spare capital. He therefore moved that the question should be indefinitely postponed.

A stockholder seconded Mr. Homer's motion.

Mr. William M. Wells was in favor of a loan of half a million dollars, provided that the company would build the new vessels on the Clyde, so that the Board might have a sufficient mortgage.

Judge Warren, as a trustee of stock, representing large interests, had come there to vote against the proposition, and should accordingly vote for the indefinite postponement. It would be a most dangerous precedent, and if this $500.000 should be lost it would take nearly five hundred years to make the loss good from the earnings of the road.

Mr. Josiah Quincy, as a shareholder, wished the corporation to go on as it was at present, and that stockholders should still have their ten per cent. guaranteed them, and as he considered it would be for the interests of Boston, and would be a perfectly secure investment, he should vote for the proposition.

Mr. Francis Lowell opposed the loan, as did also Col. Seaver.

Mr. Brigham thought the question one of great importance, and one that the meeting could not fully consider. He therefore moved that the matter be referred to a committee of seven—four stockholders and three directors, to investigate the whole subject, and to report at an adjourned meeting of the corporation.

Mr. Homer was of opinion that the present meeting could investigate the matter as well as a committee of seven. He hoped those present would be able to judge upon the question as well as any committee, and hoped it would not be referred.

After a few remarks from Mr. Pickering, who opposed the loan, and Mr. Charles M. Ellis, who thought railroad companies might as well take up the business of selling quack medicines or shoe pegging as to undertake navigation, the sense of the meeting was taken upon the question. Some five or six shareholders only voted that the subject be referred to a committee, and the motion was declared lost. The question of indefinite postponement was then put, when it was carried by an overwhelming majority.

The meeting then adjourned.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of September, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$476,525 01	$405,129 19
" passengers	258,638 96	239,743 63
" express matter	10,257 00	7,987 50
" mail	7,825 00	7,825 00
" rent of railway	7,083 34	7,083 34
" miscellaneous	1,000 00	1,268 16
Total	$761,329 31	$669,036 82
Expenses	428,968 38	383,945 13
Net earnings	$332,360 93	$285,091 69

This shows an increase in earnings of $92,292 49; with an increase in expenses of $45,023 25—making the increase in net earnings, $47,269 24.

The earnings and expenses, from January 1 to September 30, compare as follows:

	1868.	1867.
Earnings	$5,768,702 28	$5,193,000 45
Expenses	3,605,758 27	3,596,944 77
Net earnings	$2,162,944 01	$1,596,055 68

This shows an increase in earnings of $575,701 83; with an increase in expenses of $8,813 50—making the increase in net earnings, $566,888 33.

Commerce of New York.

The foreign imports at New York for the month of September, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n	$13,149,846	$14,152,546
Do. for warehousing	6,676,707	6,804,640
Free goods	854,987	1,421,652
Specie and bullion	345,669	906,558
Total entered at port	$21,027,209	$23,285,396
Withdrawn fr. wareh'use	9,928,471	10,935,659

The foreign imports at New York for the nine months from January 1st, were:

	1867.	1868.
Entered for consumpt'n	$102,707,255	$99.276,088
Do. for warehousing	91,314,804	85,381,396
Free goods	8,442,128	8,298,432
Specie and bullion	2,499,215	5,918,721
Total entered at port	$204,963,402	$198,874.637
Withdrawn fr. wareh'se	87,466,308	79,364,327

The revenue from customs at New York, were:

	1867.	1868.
In Sept	$11,712,164 78	$12,916,782 29
Prev. 8 months	81,483,422 29	76,684,265 33
Total 9 months	$93,195,587 07	$89,601,047 62

The exports from New York to foreign ports in the month of September, were:

	1867.	1868.
Domestic produce	$11,102,100	$11,316,492
Foreign free goods	9,498	80,593
Do. dutiable	890,851	803,255
Specie and bullion	2,201,958	1,954,723
Total exports	$14,204,407	$14,155,063
Do. exclusive of specie	12,002,449	12,200,340

The exports from New York to foreign ports for nine months from January 1st, were:

	1867.	1868.
Domestic produce	$128,032,152	$113,707,570
Foreign free goods	341,000	541,009
Do. dutiable	6,202,151	5,715,541
Specie and bullion	42,032,108	66,333,870
Total exports	$176,607,411	$186,297,990

Boston, Hartford and Erie Railroad.

At a meeting of the Executive Council held in Boston on the 14th inst., the Governor communicated to the members his views upon acts passed by the Legislature of 1867 granting aid to construct this road. He refers to the favorable report of the Commissioners, Messrs. George Tyler Bigelow, Emory Washburn and S. Ashburner, and states the method which he has adopted in his investigation of the subject, in order to feel assured that the aid voted by the State should not be misapplied. The Governor has given the whole subject a long and patient investigation, and proposed, in concluding his remarks, the following order, which was adopted by the Council:

Ordered, That upon the due cancellation of the bonds taken up by the Boston, Hartford and Erie Railroad Company, which were secured by the underlying mortgages referred to in chapter 284, section 2, of the acts of 1867, or the stamping of them in a form and manner to be approved by the Governor, so as effectually to prevent their being negotiated hereafter—such cancellation or stamping to be done under the direction of the Commissioners—and upon the execution of a bond with personal sureties to the satisfaction of the Governor and Council in the penal sum of $1,000,000, with condition as provided in the same section above referred to, and upon the execution of the agreement mentioned in section 3 of the same statute, and the delivery of the Berdell mortgage bonds therein provided for, scrip of the Commonwealth shall be issued and delivered to the Treasurer of that Company to the amount of $100,000, to be expressed in the currency of Great Britain.

Bridging the Connecticut River.

Messrs. A. D. Briggs & Co., of Springfield, Mass., have made a contract with the Shore Line R. R. Co. to build the drawbridge across the Connecticut River at Lyme. The bridge is to consist of five spans of 175 feet each, three of which will be east of the draw and two west. This leaves about 175 feet at the west end not included in the contract, the character of the bridge over that portion not yet having been decided upon. It is now contemplated to either have a pile bridge over this portion or build out a solid dock. The length of the draw is to be 275 feet, and allowing 35 feet for the central pier leaves 120 feet clear. The piers are to be made of cast iron cylinders, each cylinder to be driven over a cluster of twelve piles, and the interstice filled with concrete. The draw is to be of iron, and the rest of the bridge will be constructed on the Howe plan. The cost of the whole structure will be about $200,000. The work is to completed June 15, 1869, and the contractors hope to get down the three eastern piers this fall.

☞ The citizens of Barre, Rutland and Holden have had a route for a new railroad surveyed the past summer. The point of departure was near Sterling Junction, on the Northern (N. H.) Railroad, and the terminus near Smithville, 19¼ miles from Sterling Junction.

☞ The Taunton Locomotive Works have just completed a fine new locomotive for the Boston and Providence Railroad. It is called the "Gov. Clifford."

☞ The Lehigh Coal and Navigation Company have voted, 34,000 to 500, to accept the lease or contract proposed to be made with the Nesquehoning Valley Railroad Company.

Chicago and St. Paul Railroad.

Negotiations, which have been for some time in progress, have at length been consummated, whereby the Chicago and St. Paul Railroad Company have transferred their land grant, road, assets, &c., to a new company, consisting of the President and leading directors and stockholders of the Chicago and Northwestern and Milwaukee and St. Paul Railroad Companies.

The transfer was made upon very liberal terms by Mr. Edmund Rice, who retains a leading official position in the new company. His untiring efforts so long prosecuted in the face of every obstacle to build the road are at last, we are glad to say, to be rewarded with success, though the success of the enterprise has been purchased only by the most generous sacrifices on his own part.

The new company have taken hold of the enterprise in earnest. They have subscribed to the stock of the company two millions of dollars, divided among twenty of the heaviest capitalists connected with the above companies. They propose to resume the construction of the road this Fall, and to push it to completion within two years, on condition, however, that the various towns on the river interested in the line shall subscribe certain amounts, some of them already pledged, toward the cost of construction. St. Paul is regarded as under an implied pledge to issue the bonds of the city to the amount of $109,000 in aid of this important enterprise. There can hardly be a doubt that with such an assured prospect of an early completion of the road as is now afforded, the various towns and cities on its line will subscribe liberally in its aid. A direct communication between Winona and the Milwaukee and Chicago lines is already approaching completion, and Winona has subscribed $100,000 toward the construction of a railroad bridge at that point. The building of the hundred miles of road between St. Paul and Winona will thus supply the only link necessary to complete an airline connection between St. Paul and Chicago. The importance to St. Paul of so short and direct a communication with Chicago can hardly be over-estimated. The whole system of railroads centering at this point will receive the benefit of it, and in their turn will pour through this channel reciprocal benefits into Chicago.

With the now certain completion at no distant day of the Northern Pacific Railroad, the Chicago and St. Paul Road will form an important section of the great northern highway between Lake Michigan and the Pacific, and make St. Paul one of the most important gateways of the vast commerce that is to flow between the oceans. We trust that our citizens may neglect no means to stimulate the progress of this important work.—*St. Paul Press.*

Sheboygan and Fond du Lac Railroad.

This road has during the past season received a new impetus. Parties are now controlling and operating is who are fully awake to the importance of securing the carrying trade of the Sheboygan County, and a fair share of Fond du Lac, Green Lake and the counties northwest to the Upper Mississippi. Contractors are engaged in grading through the ridge a few miles east of Fond du Lac, and the trains now run to Calvary station, about eleven miles from the point last named. Fond du Lac County gives $150,000 to complete the road to Ripon. About 500 operatives are employed on the line between the present western terminus and Fond du Lac. Mr. S. M. Barrett, the President of the company, is superintending the construction of the road in person, while Mr. Harrison Barrett, of Sheboygan, is the General Manager and Superintendent of the road. The most rigid economy is practiced. Cars, platform, freight and passenger, are manufactured at the company's shops at Sheboygan. The track is well ballasted, smooth and even. Bridges are manufactured at the eastern terminus and transported out on the line as occasion requires. Mr. D. C. Daggett, is Master Machinist, and Mr. J. A. Martin, Master Mechanic. The completion of the Flint and Pere Marquette Railway to Ludington, a point on the eastern shore nearly opposite Sheboygan, will materially shorten the lines of travel by operating in connection with the Sheyboygan road, and afford transportation facilities for the productions of this region, far superior to any in existence now.—*Cor. Milwaukee Wisconsin.*

☞ The work of laying the rails on the Columbia and Port Deposit Railroad, on the route to Octorora Creek, the intended terminus, has been commenced.

☞ The contract for grading the Vineland Railroad from Delaware Bay to the crossing of the West Jersey Railroad, in Bridgeton, has recently been re-let. It is expected that the work will be commenced immediately. Surveys are also to be made for the purpose of letting the road from Vineland to Winslow.

ONE OF THE

BEST INVESTMENTS.

THE

First Mortgage Bonds

OF THE

UNION PACIFIC

RAILROAD COMPANY.

850 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

OCT. 6, 1868.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

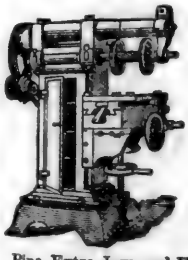
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

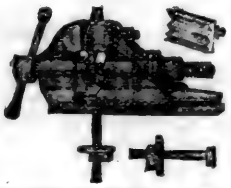
OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,



for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

PROPOSALS.

NOTICE TO RAILROAD CONTRACTORS.

OFFICE NEW YORK AND OSWEGO MIDLAND RAILROAD COMPANY,
ONEIDA, N. Y., September 14, 1868.

SEALED PROPOSALS will be received at the Office of the Company in Oneida, N. Y., until the 30th day of October, 1868, at noon, for the GRADING, MASONRY and BRIDGING of that portion of the New York and Oswego Midland Railroad, extending from Sidney Plains to the village of Walton, in Delaware County, a distance of about 22 miles. Also, for that portion of the line from Westfield Flats to Centreville, in Sullivan County, a distance of about 25 miles.

Proposals will also be received at the same time and place, for the Grading, Masonry and Bridging of the Delhi Branch, extending from the Main Line at Walton to Delhi, in Delaware County, a distance of about 16 miles.

The company will entertain separate proposals for Bridging only, both on the Main Line and Branch.

Plans, Profiles and Specifications will be ready for examination at the office of the Resident Engineer, in the village of Walton, for that portion of the line in Delaware County, including the Delhi Branch, on and after the 20th day of October next, and also at the office of the Resident Engineer in Middletown, Orange County, for that portion of the line in Sullivan County, at the same date.

Contractors who may desire to examine the work will receive all necessary information at the respective offices of the Resident Engineers above named.

☞ *All orders will receive prompt attention. Samples sent on application.*
PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.
MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN,* and it is impossible for any accident to occur from the misplacement of switches.
The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.
AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*
I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.
I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

New York Saturday, October 31, 1868.

Interest on North Carolina State Bonds.

The Public Treasurer of North Carolina gives notice that holders may receive payment of their interest falling due October 1, 1868, at the National Bank of the Republic, New York, or at the Treasury Department in Raleigh. The interest authorized to be paid is as follows: 1. Interest due October 1, 1868, and afterward, on bonds dated prior to May 20, 1861; 2. Interest due October 1, 1868, and afterward, on bonds dated since May 20, 1865, whether issued under authority of the late provisional or present permanent government. Interest becoming due on 1st of July, 1868, and prior to that date, on bonds dated before May 20, 1861, and since May 20, 1865, will not be paid in money, but will be funded into new six per cent. coupon bonds, dated October 1, 1868, and running thirty years, either at the Department in Raleigh, or at the office of Messrs. Sutter & Co., New York. Mutilated or scratched bonds may be exchanged for any of the aforesaid October 1, 1868, bonds; but this does not apply to those coupon bonds which have been registered on the books of the Treasury Department, duly witnessed by the Public Treasurer, unless regularly transferred to the bearer or holder. Past due bonds, with interest until October 1, 1868, may be exchanged for new bonds of the same (October 1, 1868,) date. Certificates for balances due holders on such exchanges will be given, exchangeable for bonds as aforesaid. The privileges of the exchanges above mentioned will expire on the 1st of October, 1869.

☞ SEVEN PER CENT. INTEREST IN GOLD.—The First Mortgage Seven per Cent. Sinking Fund Bonds of the Rockford, Rock Island and St. Louis Railroad Company, pay both Principal and Interest in GOLD COIN, FREE OF GOVERNMENT TAX.

Each Bond is for $1000 or $200 Sterling, and is convertible into stock at the option of the holder. The coupons are payable Feb. 1st and Aug. 1st, in New York or London, at the option of the holder.

The Road runs from Rockford in Northern Illinois to St. Louis, a distance including tracks to Coal Mines, &c., of about 400 miles, and traverses the finest district of Illinois.

The Bonds have 50 years to run, and are a lien of $21,000 per mile upon the Company's railroad franchises, its coal lands—of which it has 20,000 acres containing A HUNDRED MILLION TONS OF COAL—its rolling stock, and property of every sort.

A Subscription of $8,800,000, at par, to the Capital Stock of the Company, furnishes a large part of the means required to construct and equip the road.

Nearly half the entire length of the road is graded and substantially ready for the iron; the rails are now arriving upon the line. The first division, giving an outlet to the coal, will be in operation in 60 days, and track-laying will from this time be prosecuted with the utmost energy till the last rail is in position. The Company intend to have the road in readiness for the Autumn business of 1869.

The Bonds are for sale at 97½ and accrued interest in currency and may be obtained through bankers and brokers throughout the country, or at the office of the Company, 12 WALL STREET, New York.

The Trustees for the Bondholders is the UNION TRUST COMPANY of New York.

Pamphlets giving full information sent on application.

H. H. BOODY, Treasurer.

Pacific Railroad.

The editor of the *American Journal of Mining*, who returned a short time since from the Pacific overland, where he had been on an inspecting tour as United States Mining Commissioner, gives a very encouraging account of the Pacific Railroad. He traveled over both roads, and found both excellent. Of the Union Pacific (at this end of the line), he says:

It strikes the traveler instantly as one of the smoothest roads in the country. This is probably due to three things. The ties are more numerous than those of most railways; the rails are united by the new fish-plate, instead of being loosely held by the old-fashioned chair, and the road-bed, even where it has not yet been ballasted, is (at least in the summer season) very firm. The durability of pine ties is a matter of some uncertainty; but judging from the experience of the mines of Nevada, where pine is used for timbering, they will last a long time.

Mr. Raymond, the gentleman alluded to, has two qualifications that entitle his opinion to weight; he is exceedingly clear-headed and he is honest. There have been many *quasi* grumblings at the way these companies are supposed to be doing their work, but the best and most disinterested men seem to give it their approval.—*N. Y. Times.*

Important Insurance Decision.

The New York Court of Appeals, the highest judicial tribunal in the State, has decided that suicide does not vitiate a life insurance policy. The American Mutual Life Insurance Company refused to pay the widow of Marcus W. Gibson the sum for which his life had been insured because he committed suicide, but the court reaffirmed the decision of the lower courts that the policy must be paid. The company attempted to prove that Gibson was an atheist or infidel, and therefore that the suicide was intentional, the deceased not having the fear of God before him; but the court ruled out this as irrelevant, and held that in an action to recover for an insurance upon the life of the deceased, it is incompetent to inquire into his religious faith with a view of influencing the question whether, in such case, death was occasioned by an intent of self-destruction or by accident.

☞ The County Court of Spencer, Ky., has voted to order a subscription of $250,000 to the Louisville, Harrodsburg and Virginia Railroad.

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$2,945,016 19	$3 573,031 47
" freight	6,649,589 81	8,266,809 40
" express	346,016 37	464,405 57
" mails	124,485 27	172,605 90
" miscellaneous.	96,627 81	137,994 12
	$10,161,735 45	$12,614,846 46
Expenses, viz:		
Repairs of track	$1,340,911 99	$1,478,189 42

Net earnings	$3,057,742 25	$4,741,199 86

From which amount there has been paid:

Interest on bonds	$1,334,439 51	
Dividend on Chicago and Milwaukee Railway stock (not owned by this Co.)	8,438 85	
Sinking fund on bonds	53,120 00	
Rent of Chicago, Iowa and Nebraska R. R.	562,990 65	
Rent of Cedar Rapids and Mo. River R. R.	419,948 34	
		2,378,837 35
Surplus of net earnings		$2,362,362 51
Add surplus May 31, 1867		468,224 46
Total		$2,830,586 97
From which the Board of Directors on the 13th day of May last, declared ten per cent. dividend on both the preferred and common stocks, payable in their respective stocks, which amounted to		2,810,110 00
Leaving to the credit of income account May 31, 1868		$29,476 97

The condition of the company on the 31st of May, 1868, inclusive of the dividends recently declared on the preferred and common stocks, was as follows:

Common stock	$14,555,675 61
Preferred stock	16,356,287 42
Bonded debt	15,976,000 00
Chicago and Milwaukee Railway Co. bonds	1,725,400 00
Beloit and Madison Railroad Co. bonds	372,000 00
Balance of sundry accounts	226,264 47
Balance to credit of income acc'nt	20,476 97
	$49,232,104 47
Accounted for as follows:	
Old Construction Account.—Cost of Chicago and Northwestern and Galena and Chicago Union R. R. Cos., as consolidated, and the cost of the Chicago and Milwaukee and Beloit and Madison R.R. Cos., and investments in steamboats	$39,811,092 62
New Construction Account.—Amount expended and charged to this account since consolidation in 1864	2,777,203 97
New Equipment Account.—Amount expended for new equipment since consolidation in 1864	4,958,899 50
Sundry bonds and stocks on hand and loans to other companies as per list in general balance sheet.	629,179 76
Materials and wood on hand	1,055,728 62
	$49,232,104 47

The increase of common stock during the year was $1,823,180—issued for ten per cent. dividend on common stock.

The increase of preferred stock during the was $1,567,162, viz: Issued for ten per cent. dividend on preferred stock, $1,486,930; for stock of the Chicago and Milwaukee Railway Co., $78,400; for stock of the Beloit and Madison Railroad Co., $1,832.

The amount of consolidated sinking fund bonds issued during the year was $382,000. Issued in exchange for the following described bonds which have been canceled: Flagg trust real estate 8 per cent. bonds, $200,000; preferred sinking fund bonds of C. & N. W. R'y Co., $500; Funded coupon bonds of C. & N. W. R'y Co., $1,000; general first mortgage bonds of C. & N. W. R'y Co., $4,500; seven per cent. equipment bonds of C. & N. W. R'y Co., $32,000; second mortgage bonds of G. & C. U. R. R. Co., $144,000.

The funded debt of the company shows a decrease of $275,000; which deduction is shown in the decreased amount of ten per cent. equipment bonds of this company, of which bonds $275,000 matured on the 1st of May last, and were paid, retired and canceled as of that date.

The interest payable on the funded debt of $1,725,400, of the Chicago and Milwaukee Railway Company, and the interest payable on the funded debt of $372,000, of the Beloit and Madison Railroad Company, for which this company is liable, has, for the last two years, been paid, and included in the amounts of interest paid by this company and so accounted for in the annual reports. It has been thought desirable to bring the respective amounts of the debts of these two companies, directly upon the books of this company, and this has been done in the present report, as appears in the general balance sheet annexed hereto.

No increase of debt, or of charges for annual interest arises from this transfer of accounts.

This company now owns all but $153,400, of the entire capital stock of $2,250,000 of the Chicago and Milwaukee Railway Company, and parties holding this small balance will doubtless soon merge the same in the preferred stock of this company.

The Beloit and Madison Railroad although not consolidated with the roads of this company is held under perpetual lease, and all but $10,200 of its stock is owned by this company. The balance of this stock and the small amount of outstanding shares of the Chicago and Milwaukee Railway Company before referred to, will require an issue of out $161,600 of preferred stock to provide for their complete absorption by this company.

The aggregate of stocks and bonds as shown in this report, represents the entire cost of this company's works and franchises, including 800 miles of railroad owned by this company, of which thirty miles have double track; its total equipment of engines and cars covering the whole line of 1,153 miles of railroad owned and leased; its permanent outlays and improvements upon the same; its steamboat property, land grants, and large and valuable real estate in the city of Chicago.

In the month of October last, this company entered into an agreement with Messrs. D. N. Barney and his associates, for the purchase of their interests in the Winona and St. Peter Railroad, extending from Winona, on the Mississippi River, 105 miles westward into the State of Minnesota; and also for the purchase of their interests in the La Crosse, Trempealeau and Prescott Railroad, which was then being constructed from a point opposite the city of Winona, on the east side of the Mississippi River, in the State of Wisconsin, to a junction with the Milwaukee and St. Paul Railway, about three miles east of La Crosse, a distance of twenty-seven miles.

The Winona and St. Peter Railroad Company is a corporation in the State of Minnesota, having its own organization, capital and operations separate from those of this company, and they are not embraced in this report. The earnings of the Winona road which will be greatly augmented by its proposed extension to the Minnesota River, lead to the confident belief that it will not only be self-sustaining, but profitable; and prove to be a valuable and important auxiliary to the business of our Western and Northwestern lines.

Its extension to the rich country of the Minnesota River Valley is contemplated by the Winona and St. Peter Company from means to be provided by that company.

The La Crosse, Trempealeau and Prescott Railroad Company has sold its first mortgage bonds to the amount of $800,000 (guaranteed by this company) for the completion of its railroad, and the work has been prosecuted under the supervision of this company in accordance with the general plan of Messrs. Barney and his associates at the time of its purchase.

At about the time of the Winona and St. Peter and the Trempealeau Railroad purchase, this company made arrangements with the St. Paul and Chicago, and the St. Paul and Pacific Railroad Companies, by which the business of their railroads when constructed should be secured to the lines of transportation which at that time should be operated or controlled in the interest of this company, and in consideration of these arrangements, this company loaned the sum of $68,500, on the security of the stocks of said companies, (to be re paid with interest) to aid the St. Paul and Chicago Railway Company in the construction of the first division of its road.

The position and influence of these important lines in the development and control of the valuable and fast increasing traffic of the most populous and productive portions of Eastern and Central Minnesota, and of the country tributary to the valleys of the Upper Mississippi and Minnesota Rivers, and in opening up most direct and natural railway connections by way of Winona, over the La Crosse, Trempealeau and Prescott Railway to La Crosse Junction, cannot be estimated by present results, but when fully completed they will reach and command new sources of business of the greatest value to the interests of this company. At La Crosse Junction a good and sufficient outlet will be afforded by the use of existing lines to both Milwaukee and Chicago,

through amicable and mutually advantageous relations which have been established between this company and the Milwaukee and Saint Paul Railway Company.

Since the opening of the Iowa line to the Missouri River, in April, 1867, the growth of business on that portion of the road has rapidly increased in every element of local and through traffic; nor is this increase mainly due to the movement of construction materials for the Union Pacific Railroad and its branches, for as large as that transportation has been, it has been done at reduced rates under special arrangements, now about expiring, which were entered into by this company to encourage and expedite that great national work at an early stage of its progress, and which have afforded but small remuneration for profits to this company.

The greater compensation to accrue for this forbearance in rates is to be found in the new business thrown upon our lines by the activity and energy which are stimulated by the extension of the Union Pacific Road, and everywhere pervade the State of Iowa and the Valley of the Missouri River. While new lines from the East to Omaha are in progress, and will be pushed forward as additional connections with the Union Pacific Road, there can be no doubt that by the time of their completion Omaha and San Francisco will have been united by rail, and the traffic which is to sustain this continental thorough are—as it shall be distributed to all connecting lines at Omaha—will be more than an equivalent to our line for any profits which may now result from transportation of materials for the construction of that road.

Besides this, new lines of railway are being constructed far down the Valley of the Missouri River, from Council Bluffs to St. Joseph, and others have been extended and are already in operation, connecting our lines northward with Sioux City, which will supply a traffic not hitherto reached by railway communication, and which will greatly contribute to the prosperity and business of the Iowa lines.

The large amount of floating debt which, at the date of the last annual report, was impending over the business of the year just closed, has been fully discharged as it matured from the earnings of the road; and the company, relieved from those obligations, enters upon the present fiscal year unembarrassed in its finances, and with the encouraging prospect that this great property, under judicious and economical management, will realize such results as will enhance its value, attract capital for permanent and profitable investment, and give to its stockholders fair returns on both classes of stock.

The lines of road owned and leased by this company are as follows: Chicago to Clinton, Iowa, 138.1 miles; Clinton to Missouri River, (opposite Omaha,) perpetually leased, 352.9 miles—total, 491 miles. Junction to Freeport, 91 miles; Elgin to Richmond, 33 miles; Belvidere to Madison, 67.6 miles; Kenosha to Rockford, 72.4 miles; Chicago to Milwaukee, 85 miles; Chicago to Fort Howard, 242.2; Escanaba to Cleveland Mine, 65.3; Branches and Extension to mines, 5.9 miles. Total length of main lines, 1,153.4 miles. Total length of lines owned by the company 800.5 miles. The lengths of the different divisions is as follows: Wisconsin Division, 314.6 miles; Galena Division, 261 miles; Iowa Division, 354 miles; Madison Division, 67.6 miles; Peninsular Division, 721.2 miles; Milwaukee Division, 85 miles—total main lines, as above, 1,153.4 miles. Length of double track (Chicago to Junction) 30 miles. Length of side tracks, 166.3. Total miles of iron, 1,349.7.

The company have 248 locomotives; 118 first class and 21 second class passenger cars; 137 caboose and way cars; 107 baggage, mail and express cars; 4 boarding cars; 522 iron ore cars; 3,563 box, 901 platform, 807 cattle, and 58 coal cars.

The number of passengers carried during the year was 1,711,567. Number of passengers carried one mile, 88,807,502. Average distance each passenger was carried, 51.8 miles. Tons of freight transported, 1,982,429. Percentage of expenses to earnings, 62.42.

The gross earnings and operating expenses of the road are distributed among the several divisions as follows:

Wisconsin Division.—The gross earnings of this division were $3,156,059 79, being a decrease of $119,463 26 from the previous year. The operating expenses, including taxes, were $2,009,173 98, being 63.66 per cent. of its gross earnings, or 1.24 per cent. above the general average for the whole road.

Galena Division.—The gross earnings of this division for the year were $4,293,657 81. The operating expenses were $2,482,706 43, being 57.82 per cent. of the gross earnings. These earnings show an increase over the previous year of $560,364 45. The operating expenses of this division are 4.60 per cent. less than the general average.

Iowa Division.—The gross earnings of this division were $3,415,695 87, showing an increase over the previous year of $1,808,582 55. The operating expenses were $2,360,961 78, being 69.12 per cent. of the gross earnings, or 6.70 per cent. above the general average.

Madison Division.—The gross earnings of this division were $226,797 91, being an increase of $26,674 04. The operating expenses were $153,375 12, being 67.62 per cent. of the gross earnings.

Peninsular Division.—The gross earnings of this line were $445,023 48. The operating expenses were $278,837, being 62.65 per cent. of the gross earnings. The earnings were $162,499 84 greater than in the previous year. The anticipations of the projectors of this line have been more than realized in the development of its business, which consists mainly in the transportation of iron ore from the mines to the port of Escanaba. The quantity of ore transported over the line has increased from 38,987 tons in 1865-'66 when the road was opened, to 236,185 tons in 1867-'68; and the revenue has risen during the same time from $99,456 47 to $445,023 48. It is expected that the business will very materially increase during the present year.

Milwaukee Division.—The gross earnings of this line were $1,077,617 60, being an increase over the previous year of $14,453 39. The operating expenses were $588,592 29, being 54.62 per cent. of the earnings, or 7.80 per cent. less than the general average.

General Balance Sheet, May 31, 1868.

Old Construction:		
Cost of road and property in accordance with terms of consolidation, to May 31, 1867		$35,272,814 39
Add amount charged during the year for claims against old companies		12,991 28
For stock issued for stock of the Beloit and Madison R. R. Co		1,832 00
		$35,287,637 62
Add cost of stock of Chicago and Milwaukee Railway Co., to May 31, 1868		2,096,600 00
Add bonds of C. & M. R. W. Co., now outstanding, guaranteed by this company		1,725,400 00
Add bonds of B. & M. R. R. Co., now outstanding guaranteed by this company		372,000 00
Add stock of Green Bay Transit Co., & Michigan Transportation Co., & loans to said companies, representing the steamboats on Green Bay and Lake Superior		329,456 00
		$39,811,092 62
New Construction:		
Balance to debit of this account May 31, 1867	$1,770,356 29	
Add amounts charg'd during the year	894,793 96	
Discount on securities sold	65,808 88	
Interest on unfunded debt	46,244 84	
		2,777,203 97
New Equipment:		
Balance to debit of this account, May 31, 1867	$4,828,399 50	
Add for new locomotives and cars purchased and built during the year	130,500 00	
		4,958,899 50
Securities on hand		629,179 16
Materials on hand		1,055,728 62
		$49,282,104 47
Common Stock:		
Amount issued to May 31, 1867		$13,232,495 61
Amount of 10 per cent. dividend on common stock, payable June 29, 1868, in common stock		1,323,180 00
		$14,555,675 61
Preferred Stock:		
Amount issued to May 31, 1867	$14,789,125 42	
Issued since for st'k of the C. & M. R. W. Co.	78,400 00	
Issued since for st'k of the B. & M. R. R. Co	1,832 00	
Amount of 10 per cent. dividend on pref. stock, payable June, 29, '68, in pref. stock	1,486,930 00	
		16,356,287 42
Funded debt (for full description see Bond List, pp. 1065, 1066 & 1067)		18,073,400 00
Unfunded debt	$1,785,356 86	
Less operating assets	$1,099,951 88	
Cash	409,140 51	
	1,509,092 89	
		226,264 47
Balance to credit of income acc'nt May 31, 1868		20,476 97
		$49,282,104 47

President.—Henry Keep.

Directors.—Henry Keep, H. H. Baxter, John M. Burke, Geo. S. Scott, F. P. James, Samuel Sloan, Benjamin Nathan, James H. Benedict, John Bloodgood, W. S. Gurnee, Russell Sage, M. L. Sykes, Jr., New York; Perry H. Smith, John L. Dunlap, John B. Turner, William H. Ferry, Chicago; Alexander Mitchell, Milwaukee.

Vice President.—Perry H. Smith.

2d Vice President.—M. L. Sykes, Jr.

Secretary.—James R. Young.

Treasurer.—Albert L. Pritchard.

Gen'l Sup't.—Geo. L. Dunlap.

Trade and Commerce of San Francisco.—The Pacific Railroad.

Advices from San Francisco to the 6th inst., state that the fall trade, then at its zenith, was being characterized by a fair degree of activity. The quantity of goods leaving the city by every available mode of transportation was said to be large, indicating for both its inland and coastwise trade a healthful condition.

Owing to the carrying capacities of the Central Pacific Railroad being largely employed in the forwarding of the company's own freights, consisting of construction material and supplies for working forces, merchandise destined for points east of the Sierra has been greatly delayed, compeling recourse once more to wagon transportation over the mountains, and forcing the passage of goods again over the Placerville route, before nearly abandoned. Indeed, it is now becoming a question whether this railroad when wholly given up to the public service, will be able to meet the heavy requirements likely to be made upon it, as the vast regions it is destined to supply come to fill up with population. Being permanently built and more direct than any other practicable route between San Francisco and the Great Utah Basin, it will no doubt be preferred to every other, always commanding all the traffic it will be able to accommodate. But whether, with the best management, it will be able to meet the calls certain to be made upon it in the early future may be gravely questioned, rendering the construction of the contemplated Feather River road not only probable, but, in a measure, necessary.

Already the Central Pacific road has done much towards facilitating and cheapening the transportation of goods to Southern Idaho, Utah and Nevada, only branch roads requiring to be built at various points along it to still further enhance these advantages.

The expressing business has increased nearly one-third on account of the additional facilities and reduced rates inaugurated by vigorous opposition. The Pacific Union Express is rapidly augmenting its business and extending it to every part of the Union and Europe.

The following statement shows the arrivals at San Francisco from domestic, Atlantic and foreign ports during the past nine months, as compared with like periods in the four preceding years:

	From dom. Atl. ports.		From for. ports.	
Year.	Vess.	Tons.	Vess.	Tons.
1864	90	93,684	341	247,267
1865	65	68,735	347	228,080
1866	60	93,252	342	242,188
1867	96	108,849	328	251,649
1868	92	98,020	346	820,058

The foregoing tables include the steamers plying between this port and Panama, San Juan, C. A., Northern Mexico, British Columbia, Honolulu, China and Japan. Appended will be found a return for our foreign trade by steamer for the first nine months of the years 1867 and 1868, showing a very gratifying augmentation of 57,102 tons.

From	Tons. 1867.	Tons. 1868.
Panama	77,547	125,030
San Juan, C. A	16,826	5,402
Northern Mexico	11,258	15,254
British Columbia	6,503	6,784
Honolulu	....	7,465
China and Japan	12,030	21,381
Totals	124,164	181,266

As the above tables include the steamers plying between this port and Panama, Mexico, British Columbia, China, and Honolulu, the course of our import trade can be with more accuracy traced in arrivals other than steamers from the following ports and countries, as from them we receive a very large portion of our supplies, and during the past nine months, as compared with a like period in 1867, the arrivals have been as follows:

	1867. Vess.	1867. Tons.	1868. Vess.	1868. Tons.
Domestic Atlantic Ports	96	108,849	92	98,020
Great Britain	85	24,949	56	41,280
France	10	4,952	11	5,419
Hamburg	4	2,020	10	8,457
Hawaiian Islands	28	9,286	24	14,223
China	25	28,367	23	35,358
Manila	7	4,650	3	1,858
Malaga	2	673	2	652
Rio de Janeiro	5	2,004	3	2,614
Japan	8	6,018	4	3,943
Batavia	4	1,632	1	300
Totals	224	193,400	229	207,119

The number of vessels on the way to this port, as far as we are informed, compares as follows with the same period for the previous year:

From	1867.	1868.
Domestic Atlantic ports	46	55
Foreign ports	38	45
Total cargoes advised on the way	84	100

This shows that, with the tonnage already at hand, and that to arrive, we shall be fully supplied with facilities for exporting our abundant crops.

Our exports for the first nine months of the current year exhibit an increase of only $201,227 over a like term in 1867, but they are greater than the returns for the first nine months of 1866 by four a quarter millions, and for the same period in 1865 by six and a quarter millions. We append the following tabular statement which will show our exact export relations with other countries:

To	1867.	1868.
New York, etc	$5,000,690	$5,715,830
Great Britain	5,914,924	4,646,608
Mexico	1,485,359	1,286,830
South America	562,252	404,280
Hawaiian Islands	479,063	573,816
China	842,778	868,202
British Columbia	728,584	763,299
Japan	584,390	291,746
Australia, etc	45,746	957,306
Other countries	505,009	842,195
Totals	$16,148,795	$16,350,022

The value of shipments to New York, etc., as given in the above table, represents both those by sailing vessels and steamers *via* the Isthmus. By separating them we have the following comparison:

	1867.	1868.
Per steamer *via* Panama	$2,040,695	$3,230,781
Per steamer *via* San Juan del Sur	18,596	....
Per sail *via* Cape Horn	2,941,399	1,485,049
Totals	$5,000,690	$5,715,830

Our steam trade *via* Panama has been augmented by over a million of dollars. By sail, round the Horn, we note a decrease of about half a million.

Our treasure export during the first nine months of the years 1867 and 1868, has been as follows:

	1867.	1868.
To New York	$17,572,641 16	$18,824,609 74
To England	4,658,660 43	3,726,341 21
To France	1,108,116 53	549,988 28
To China	7,146,327 74	3,979,009 65
To Panama	281,127 40	475,000 00
To other countries	961,070 15	589,459 46
	$31,726,948 41	$28,144,408 34

The above tables do not include the amounts sent East by the Sub-Treasurer, amounting to $7,500,000. Our large grain bills for the crop of 1867–'8 have supplied the place of treasure shipments and enabled us to profit by the retention of coin for the prosecution of home industries.

The combined exports of treasure and merchandise for the first nine months of 1868, as compared with a like period in the preceding year, are represented by the following:

	1867.	1868.
Treasure exports	$31,726,943	$28,144,408
Merchandise	16,148,795	16,350,022
Totals	$47,875,738	$44,494,430

The above return of combined exports proclaims a decrease of $3,381,308; but as our decrease in treasure export was $3,582,535, we make net gain of $201,207 in merchandise exports.

The receipts of treasure from all sources through regular public channels, during the past nine months, as compared with the same period of 1867, have been as follows:

	1867.	1868.
From California Northern Mines	$18,673,774	$18,562,236
From California Southern Mines	3,288,358	3,456,720
From Nevada	13,500,000	12,000,000
From Coastwise Ports Oregon, etc.	4,242,036	3,338,426
Imports, Foreign, British Columbia, etc	2,880,430	2,138,861
Totals	$42,584,593	$39,436,243

The decrease in the above treasure receipts from our mines, and coastwise and foreign receipts for the first nine months of 1868, is $3,088,350 less than for the same period of last year; but it must also be borne in mind that our shipments have been $8,000,000 less, showing that we are actual gainers to the amount of half a million. However, a very large per centage comes to this city in private hands, and does not enter into this account. Large amounts of bullion credited to Nevada are really received from Idaho and other outlying mineral regions.

The disbursements for army purposes on this coast for the first nine months of 1867 and 1868 have been as follows:

	Quartermaster's Department.	Paymaster's Department.	Commissary Department.
1868	$4,685,759 40	$2,245,000 00	$751,169 28
1867	4,511,914 94	1,956,142 85	1,118,708 00

The increased expenditures of the Quartermaster's Department, in the first nine months of 1868, over those of the same period in 1867, amount to $173,844. Considerable bodies of troops have been sent to this coast to replace those whose terms of service had expired: and the cost of transportation to their various interior stations has been very great, particularly to Arizona, Utah and Idaho. On the other hand we note a very decided falling off in the expenditures of the Commissary Department to the amount of $367,640 less in the first nine months of 1868 than for a like period of 1867.

The total coinage for the first nine months of this year compares with that for the like periods in 1866 and 1867 as follows:

	1866.	1867.	1868.
January	$315,000	$124,000	$97,000
February	919,500	1,022,000	540,000
March	1,360,000	978,585	575,000
April	1,113,000	1,895,000	710,000
May	2,165,000	2,505,000	714,000
June	1,120,000	1,420,000	922,000
July	1,004,000	1,152,000	2,355,000
August	1,747,000	2,380,000	1,465,000
September	1,916,000	1,989,000	2,455,000
Totals	$11,659,500	$13,465,585	$9,933,000

The decrease in coinage since last year is attributable to the diminished demand, rather than to any deficiency in bullion. The greater portion of our treasure shipments are now made in gold bars, instead of coin. The principal shipper of coin has been the Sub-Treasurer, who has sent to New York, since January 1, 1868, the sum of $7,500,000, being $2,000,000 more than was shipped by

that officer in all of 1867. An important feature is the wonderful increase in immigration, the first nine months of the present year having added 80,418 people to our population by sea alone. Probably the augmentation from other sources will foot up 5,000 more, making an aggregate of 85,000 souls. This addition exercises considerable effect upon finances and general trade. They have not yet had time to become producers, and are, therefore, only consumers; but will do much to develope our inexhaustible resources next year.

Progress of the Central Pacific Railroad.

The line of the Central Pacific Railroad continues to be the scene of remarkable activity. From Sacramento to a point on the Plains nearly or quite 500 miles eastward, the route is lively with the passage of freight, construction and supply cars, locomotives, lumber and store trains, teams and laborers. The company is employing about 10,000 workmen and over 3,000 teams. Its army of railroad builders, and the smaller army employed in getting out lumber and stone on contract, or acting as sutlers and providers, have built up numerous temporary towns which give recent solitudes and desert tracts the air of old "settlements." The numerous workshops, factories, mills, depots and trading posts created by its necessities have diversified the industry of an extensive region and planted the germs of permanent improvement.

The transit of the regular passenger and freight trains twice a day is but a slight incident in the immense activity of movement, business and labor along the whole line. It is not too much to say that the building of the Central Pacific has distributed a population of 15,000 or 20,000 through a region before chiefly uninhabited, and has created fifteen or twenty towns that promise to be permanent, besides numerous camps and villages which serve a temporary purpose. The woods of the Sierra Nevada ring for a hundred miles with the strokes of axemen and the click of quarrymen and stone-cutters. At one point alone (Truckee) twenty-five or thirty saw mills are in operation getting out lumber for ties, buts, boarding, frames and roofing. The Truckee River is clogged with logs in places floating on the way to be sawed. On Donner Lake recently could be seen a boom of 500 logs which would make nearly 500,000 feet of sawed lumber; and the bare granite cliffs about the lake constantly resound with the stroke of the woodmen's axes, the shouts of the ox-drivers hauling logs, the groan and crash of falling trees, the whistle and the rumble of passing trains.

Lumber of every description is piled along the road waiting for cars to convey it where it is needed to extend the track, to make snow-sheds, or to build stations, depots, stores and dwellings. Seventy locomotives and several hundred cars of various kinds are continually passing to and fro on different portions of the route, engaged in the transportation of material, supplies and laborers. Every day 500 tons of material for the extension of the track are passed over the Sierra, surmounting an altitude of 7,030 feet and pushing on to the front, a distance of from 300 to 400 miles east of Sacramento. Exertion is redoubled as winter approaches to get as much grade finished and as much material forwarded as possible before the heavy snows set in; also to complete the roofing and siding of the snow-sheds framed during the present season. When the snow does come, unless the winter is an unusually mild one, the sound of the woodman's axe will cease, the buzzing saw mills will be hushed, the bustle of the fresh pine towns will be stilled, and the chief work in the snowbelt of the Sierra will be to keep the track open and pass the trains.

All the stir and labor now witnessed are directed to pushing the iron road as far as possible towards the head of Salt Lake before winter. On Monday last the passenger cars began running to Winnemucca, 324 miles east of Sacramento. The track is laid about 24 miles further, say nearly to Emigration Canon, and the grading is completed for at least 50 miles further; while one army of graders is making road bed still another 50 miles beyond. The distance from Sacramento to the north end of Salt Lake is 651 miles. Track is laid for 348 miles of this distance, and is being extended at the average rate of about 2¼ miles per day. The time at which the track will reach the lake is now only a question of motive power and weather. The grading may all be completed in three months, for another force, under contract with the Mormons, is grading 100 miles this side of the lake. With the road bed completed before the ground freezes, track can be laid through the winter as fast as the material can be forwarded.

About 500 tons of material—ties, rails, spikes, bolts, chairs, &c.—are required for two miles of track, and to transport this across the summit of the Sierra, over a heavy ascending grade, requires about 50 cars and 10 locomotives daily. The company needs more motive power for this and its other business, and has ordered 15 locomotives to be shipped from New York by way of the Isthmus immediately. Iron is coming fast enough already, and the tamarack groves of the Sierra furnish the ties. The transporting power of the company is so largely devoted to pushing its road material ahead that it is obliged to refuse a great deal of custom freight, much to the inconvenience of traders in the mountains and in Washoe. Everything must bend at present to the construction of the railway. The company is playing for a big stake, in which the farmers, manufacturers and merchants of California are equally interested—the ownership of the entire route to Salt Lake, and the control of the trade of Utah, with its population of nearly two hundred thousand, increasing at the rate of ten per cent. per annum.

The Union Pacific Company is working from the eastern side for the same objective, and has pushed a grading force beyond the three hundred mile limit fixed by Congress; but the Central folks are not afraid of being passed, and have made arrangements which they are confident will enable them to reach the north end of the lake first, if they do not even get beyond it. They deny the report that the Union Pacific had telegraphed an offer of the free use of so much of their grade as the Central could first iron, and of payment for so much of the Central grade as the Union should be able to iron. The two companies are not grading in parallel lines near the lake, as supposed by some, but have left gaps in the one main line in their anxiety to press forward either way, and are bound to connect at some point as required by law. There is now little difference between the distance which each company has to build to reach the same point north of the lake, and only about five hundred miles in all remain to be constructed of the one thousand seven hundred and twenty-five originally to be built between Sacramento and Omaha.

The work of grading across the Nevada and Utah Plains eastward is not difficult. The country is an elevated plateau, broken into a series of valleys by successive ridges, rising above the general level from a few hundred to several thousand feet. These ridges are passed through easily by following mainly the course of streams, and the intervales or small "plains" offer a level surface that needs only a little smoothing to be ready for the ties. Down the eastern slope of the Sierra Nevada and far towards Humboldt Lake the road usually follows the bed of the Truckee. Leaving this bright, clear stream, the journey becomes less interesting, and treeless hills, red or black with volcanic rock, are succeeded by desert tracts.

The most barren and forbidding portions of the route to Winnemucca are, however, chiefly passed in the night, when the alkaline dust is less apt to rise, or if it rises, does so in smaller in quantities. The appearance of large camps of laborers, and of villages just built of spice-scented pine boards, intermixed with tents, is in sharp contrast to the barren solitudes of the plains and desert. Construction trains frequently passing, and the numerous groups of Chinese laborers that stop to gaze as the passenger car halts or goes by, increase the strange discrepancies of the scene, which is altogether wild and peculiar. It is difficult to realize that over this same ground once passed so slowly, laboriously and dangerously the ox trains of the pioneer emigrants, and only when this is realized are the full value of the Pacific Railroad and the enterprise and energy of its builders heartily appreciated.—*San Francisco Bulletin.*

The Darien Ship Canal.

A meeting of gentlemen interested in the construction of a canal across the Isthmus of Darien was held in this city on the 20th inst. The meeting was organized by the appointment of Mr. Peter Cooper as chairman, and Hon. F. A. Conkling as secretary. Hon. Wm. H. Seward, Secretary of State of the United States, and Hon. Wm. M. Evarts, Attorney General, were present, and took active part in the proceedings. Many important facts were laid before the meeting. Estimates from the highest sources places the cost of the canal at $100,000,000. Messrs. William T. Coleman, Marshall O. Roberts, C. K. Garrison, Wm. B. Duncan and Richard Schell were appointed commissioners to obtain subscriptions to the capital stock of the company. Charts of the surveys of the proposed route, by Frederick M. Kelley and other eminent engineers, were exhibited, which demonstrated the feasibility of the undertaking, and entire confidence was expressed in its ultimate success. Mr. Seward, in addressing the meeting, said:

Commerce can no longer afford to use the circuitous and perilous navigation around the Capes. It must and will have shorter channels of transport, and of these there can be but two—the one across the Isthmus of Suez, the other across the Isthmus of Darien. A canal across the Isthmus of Suez already approaches its completion. If that channel is to secure the patronage of universal commerce, it will be fully enlarged and completely adapted to the interests of modern commerce. In that case the commerce of even the Atlantic American coast, from the St. Lawrence to Cape Horn, will be turned eastward across the Atlantic, and through the Mediterranean and the Red Seas and the Indian Ocean to India and China. It would be a reproach to American enterprise and statesmanship to suppose that we are thus to become tributaries to ancient and effete Egypt, when by piercing the Isthmus of Darien we can bring the trade of even the Mediterranean and of the European Atlantic coasts through a channel of our own, so palpably indicated by nature that all the world has accepted it as feasible and necessary.

☞ The following gentlemen have been elect- directors of the Vermont and Canada Railroad Company: Worthington C. Smith, John Porter, Edward Blake, Samuel Atherton, John W. Newton, Jed. P. Clarke, and B. P. Cheney. Hon. W. C. Smith was re-elected President and John W. Newton Clerk and Treasurer.

☞ George W. Beach has been appointed Superintendent of the Nangatuck Railroad.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, October 31, 1868.

Stock Exchange and Money Market.

The week has been a very severe and trying one, for borrowers either on call or in a permanent form. The banks have sustained a further loss of deposits and legal tender, and have not been in a position to afford much assistance even to the needy portion of their regular customers. The negotiations of the Erie railway company, embracing some ten millions of convertible bonds marketed, more than half of which amount has already been exchanged for the common stock of the company, have tended to lessen the available supply of funds, in the open market. The speculative operators for lower values at the Stock and Gold Boards, as also at the various other prominent business centres, have persisted in their manipulations of the market, through the aid or connivance of a few of the city banks. There has been an increased drain of currency for use at the West and South, chiefly at the South, for produce forwarding purposes. All these circumstances have combined to make accommodation difficult to procure, unless at usurious rates. The leading Government houses have had their wants which have been on a reduced scale, pretty uniformly provided for at 7 per cent. in currency. The Stock firms have very generally had to pay full 7 per cent. in gold, and some of them even higher figures, for the requisite help, which has been mainly derived from private sources. On Tuesday of the current week, the market developed its worst features. The government houses were not in need of much aid. What little help they required was given to them, on the basis of 7 per cent. in currency. Most other borrowers had to pay extraordinarily high figures for accommodation, few of them having been supplied at anything less than seven per cent. in gold. The discount market was uncomfortably close. Even regular bank customers found some difficulty in placing their paper at less than 8 per cent. The governing rates in the open market were from 8 to 10 per cent. per annum, on all paper that could be disposed of with any degree of promptness. Many of the produce houses, having loans maturing this week, complained of the extreme stringency which rendered it almost impossible to obtain a renewal of the necessary aid on anything like reasonable terms. They were consequently obliged to throw part of their produce burdens on the market at the best attainable prices, to the serious depression of ruling values. On Wednesday there was a little relaxation in the call loan market, resulting from the action of some of the city banks, in exchanging their three per cent. certificates at the Sub Treasury for legal tender notes, and in using the proceeds to aid their street customers in bridging over the pinch. The National Bank of Commerce led the way in this commendable movement, by making use of this portion of its reserves, in the way just mentioned, to the extent of a 1½ millions. The U. S. Assistant Treasurer, Mr. Van Dyck, greatly facilitated the operation, and thus assisted in affording much needed relief to the market, which closed with some promise of a more comfortable working through the immediate future. On Wednesday, it was stated that Secretary McCulloch had decided that none of the exchanged three per cent. certificates are re-issuable, as the original issue was authorized solely for the purpose of retiring the then outstanding and maturing compound interest notes. The city banks this week report a loss of $2,827,739 of deposits, and $1,915,423 in the legal tender reserve, with a gain of $366,963 in the specie average. The loans were reduced $1,065,002, and the circulation was cut down $19,980.

The specie reserve of the city banks is now $9,553,583, against $6,161,164 same time last year. The city bank deposits are now $186,052,847, against $173,064,128 week ending Oct. 19, 1867. The legal tender reserve amounts to $56,711,434, against $56,381,943 same time last year. The circulation now stands at $34,198,938, against $33,950,080 same time last year. The loans are now $263,579,133, against $245,810,718 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $141,262,407 a day, against a daily average of $105,919,400 the preceding week, and $109,659,692 the week ending with Oct. 8, 1868. The current week's exchanges average about $135,933,045 a day. The city banks, last week, gained $366,963 of specie, while they lost $2,827,739 of deposits, and $1,915,423 of legal tender notes. They reduced their loans, $1,065,002; and increased their circulation, $19,980.

The New York Gold Exchange Bank reports for the week ending Saturday, the 24th day of October, 1868, the average amount of loans and discounts as $1,594,035; average amount of specie, $593,318; average amount of deposits, $1,495,314.

The outstanding amount of coin certificates on the 1st of Oct., was $20,236,400, against $25,161,620 on the 1st of Sept., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $525,000, and retired $2,104,068 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during September, reached $1,963,300.

The U. S. Sub-Treasury receipts, week ending with Oct. 24, were $10,880,466, including $2,210 068 from customs duties; payments, $13,823,804, including $46,417 of coin interest; balance at the close of the week, $95,869,947, against $98,815,286, at the close of the preceding week, showing a decrease of $2,945,339. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,847,069 including $252,641 from customs; and payments, $2,915,516, including $11,400 of coin interest; on Tuesday, receipts, $1,233,178 including $323,626 from customs, and payments, $2,331,340, including $8,700 of coin interest. The balance at the close of business on Tuesday stood at $93,703,339, against $95,848,230, a week previous; and $94,162,516, on Oct. 7, 1868. The aggregate receipts of the office from all sources in September, were $54,298,704; aggregate payments, $47,354,171. The balance on the 1st of October was $94,499,990, or about 7 millions more than on the 1st of September, which amounted to $87,555,452.

National Bank notes to the amount of $69,980 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,313,786, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,397,601, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,936,185. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342 096,540; and for the public deposits, $38,152,350—making a total of $380,248,890. The Treasury Department last week redeemed and destroyed $409,500 of worn and mutilated fractional currency, and issued $472,354 of new. The outstanding amount of fractional currency on the 1st of October, was $32,933,614, against $31.802,218 on the 1st of September; $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues yielded less satisfactorily last week, in both forms of customs and excises. The excises, last week, yielded about 5 millions; customs at the port of New York, $2,210,068, and at the outports about $750,000 (in coin) more, making the grand total income for the week equal to about $8,996,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $77.000,000.

The Gold Market has been quite depressed, since our last, and much lower figures have been made at the Gold Board. The extremes of the week have been 133½@135½, and the closing quotations on Wednesday were 134¼@134⅜, showing a decline of over two per cent., as the result of the week's dealings, which have been on a somewhat restricted scale. The Sub Treasury closed its first series of public sales on Saturday the 24th inst. It commenced a second series on Tuesday, the 27th inst. The sale of $300,000 on Tuesday was at 134 71/100. The $300,000 awarded on Wednesday, the 28th inst., was at 134 91/100 to 134 28/100. There was more of an export call for gold on the closing days of the week, under review, owing to a sharp advance in foreign exchange; and the Cunard steamer of Wednesday took out $188,700 in specie.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,184,768, against $2,632,511 same time last year. The customs demand for Gold last week, averaged $368,344 a day; thus far, this week, it has been equal to $288,123 a day, or equal to a weekly aggregate of $1,728,738. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $76,098 and from California, $226,992. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $100,288,205, against $102,906,480 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $32,348,588, against $24,452,576 in 1867, showing an increase thus far in 1868, of $7,890,012. The exports of specie, from this port, last week, were $29,424. against $214,696 same week last year; total, since Jan. 1, 1868, $66,870,194, against $43,257,368 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $46,417; since Jan. 1, 1868, $63,811,547, against $43,431,724. The specie exports from San Francisco, from Jan. 1, to Sept. 30, 1868, were $28,245,582, against $30,971,689 same time last year.

Government received $6,514,247 from customs at the port of San Francisco, from Jan. 1, to Sept. 30, against $5,988,898 same time in the preceding year.

Foreign Exchange improved decidedly, especially on Monday and Tuesday forenoon when the best sales of the week were made, on a more active demand; but it closed a a fraction off the highest figures, on a dull market. Bankers' prime sixty day bills on London closed on Wednesday at 109⅝@110, and on Paris to 5.18¾c.@5.13¾; sight bills on London to 110⅛@110½, and on Paris to 5.12½c.@5.11¼. The offering of produce bills has been quite liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,339,694, against $4,946,163, same week last year; total, since Jan. 1, 1868, $135,499,085, against $152,211,148 in 1867.

Government securities yielded ½@1½ per cent, during the severity of the Money pressure; but were not offered freely at the reduced figures. Toward the close, they were quite freely sought after, and prices, rallied about ½ per cent, chiefly on the later issues of the Five Twenties, which were in most favor with all classes of buyers.

U. S. sixes of 1881 closed here on Wednesday at 115@115¼; U. S. Five-twenties of 1862, 113@113⅛; U. S. Five twenties of 1864 at 110¾@111; U. S. Five-twenties of 1865 at 111@111⅛; U. S. Five-twenties of 1865, consolidated, 109⅞@110⅛; U. S. Five-twenties of 1867, 110⅛@110⅜; U. S. Five-twenties of 1868, 110½@110⅝; U. S. Ten-forties at 105⅝@105¾; U. S. Six per cent. currency bonds, 99⅛@100.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 14.	Oct. 21.	Oct. 28.
Consols	94⅞	94¾	94¾
U. S. 5-20's of 1862	74½	72⅞	73⅜
Erie	31¾	31¼	28½
Ill. Central	95¼	96½	97¼

Railway and miscellaneous share property declined very seriously in price early in the week, under a determined pressure to realize, leading to very extensive transactions. Toward the close, the market exhibited more firmness, on a more confident purchasing demand.

Domestic produce has been less active as a rule, though prices of the leading articles have been quoted lower. Middling upland cotton closed heavily on Wednesday at 25½ cents per lb. The stock of cotton now here is estimated at about 22,000 bales. The receipts at the port this week, have averaged about 3,800 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 241,000 bales, against 143,000 bales same time last year; exports, same time 78,500 bales, against 32,500 bales same time last year; stock on hand at latest dates, 125,000 bales, against 112,500 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240.282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 18,871 pkgs., against 10,128 pkgs., same time last year. At the Live Stock market, this week, Beeves have been quiet heavy at from 9@16¼c. per lb.; week's receipts, 7,404. Veal calves have been in fair request at from 8½@13½c. per lb.; receipts, 1,653. Sheep and lambs in moderate demand, at from 3½@6c., and 6@7¾c. per lb., respectively; receipts, 43,087. Swine less active at 8¼@9c. per lb., all live weight; receipts, 32,940. At the auction sale of Scranton Coal, to-day 50,000 tons were disposed of at materially advanced prices, ranging from $5.75@$9.20 per ton of 2,240 lbs., deliverable at Elizabethport, N. J. There has been a fair, though not notably active movement, in the principal kinds of foreign goods at generally well supported prices. The total imports of foreign dry goods, last week, were $1,459,083, and the total amount marketed $1,451,540. The value of foreign merchandise imported last week, was $3 540,023—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,999.106, against $4,355,743 same week last year; from Jan. 1, 1868, $213,117,515, against $218,589,819 same time in 1867. The freight market has been fairly active, closing buoyantly. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. by steamer, per bbl.; grain at 7¼d. by sail, and 8@8¼d. by steamer, per bushel; cotton at ¼@5/16d. by sail, and ⅜@½d. by steamer, per lb.; and heavy goods 20s.@30s. by

sail, and 25s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 535.

The New York exports, exclusive of specie, for the week ending Oct. 27, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,946,153	$3,339,694
Prev. reported	147,264,985	132,159,391
Since January 1	$152,211,148	$135,499,085

The imports for the week ending October 24, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,252,259	$1,459,088
Gen. merchandise	1,465,595	3,540,023
Total for the week	$2,717,854	$3,999,106
Previously reported	203,509,290	203,056,665
Since January 1	$206,227,144	$208,055,771

The balance in the Sub-Treasury on Wednesday was $92,116,307.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Buffalo, N. Y. and Erie 1st mort., 91½; Central Railroad of New Jersey, 120½; do., 1st mort., 102; Dubuque and Sioux City, 100; do., pref., 95; do., 1st mort., 91; Galena and Chicago 1st mort., 101; Chicago and Milwaukee 1st mort. 96; Hannibal and St. Joseph, pref., 88; Brooklyn 6s, W. L., 96½; Wells Fargo Exp. Co., 29½; Merchants' Union Exp., 22½; Adams' Express, 50⅛; ; U. S. Exp., 49; Mariposa Mining Co., 7; do., pref., 20½; Pennsylvania Coal, 220; Brunswick City Land, 12; Western Union Telegraph, 86⅛; Ocean Bank, 111; Bank of America, 145; Hanover Bank, 115; Tenth National Bank, 100; Bank of Commerce, 125; Fourth National Bank, 106; Central National Bank, 110; Phœnix Bank, 108⅛; Buchanan Farm oil, 48; Consolidated Gregory Gold, 4.75; Davidson Copper, 0.60; Grass Valley, 0.41; La Crosse Gold, 0.21; National, oil, 3.50; Owyhee Mining, 18.00; Quartz Hill Gold, 1.00; Smith and Parmalee, 5.25; United States Oil, 2 25; Wallkill Lead, 0.12.

Philadelphia.—Sunbury and Erie 7s, 98½; Phila. and Erie 7s, 80; Bald Eagle Valley 1st mort., 80; Belvidere Delaware 2d mort., 84; West Penna. R. R. 6s, 80; Camden and Atlantic R. R., 15; Tioga R. R., 45⅛; Oil Creek and Allegheny, 40¼; West Phila. R. R., 65; Allegheny County 5s, 75½; Keystone Zinc, 1.31; Butler Coal, 7; Fulton Coal, 6½; Clinton Coal, ¾; St. Nicholas Coal, 1; New Creek, ½; Shamokin Coal, 7½; N. Y. and Middle Coal Fields, 5⅝; Green Mt., 7; Big Mt., 6½; Feeder Dam Oil, ⅝; Ocean Oil, 0.56; Kensington Bank, 120; Farmers' and Mechanics Bank, 307⅛; Mechanics' Bank, 33½. The latest quotations are: City 6s, 101@101½; do., free of tax, 102⅜@102⅞; State 5s, reg., 100@101¼; do., coupon, 95@98; do., 6s, W. ☞ THE CENTRAL PACIFIC RAILROAD IS NOW BEING pushed forward with unprecedented energy, 250 miles having been added during the current year, and a large portion of the remainder is graded. The way business exceeds the present facilities of the company, and the earnings already average more THAN A QUARTER OF A MILLION IN GOLD PER MONTH. A limited amount of the Company's six per cent. First Mortgage Bonds (principal and interest in coin) will be disposed of at 103 and accrued interest in currency. Coupons payable July and January, in New York City. For sale by banks, bankers, agents for the loan, and by

FISK & HATCH,

Bankers and Dealers in Government Securities.

No. 5 Nassau street.

☞ SEVEN PER CENT. IN GOLD. FIRST MORTGAGE 20 YEARS' 7 PER CENT. BONDS OF THE CALIFORNIA PACIFIC RAILROAD COMPANY, Principal and Interest payable in GOLD COIN at the National Park Bank of the City of New York. Coupons due first of January and July.

The entire line of road constructed, and to be constructed is, from Vallejo to Sacramento, 60 miles, (forming the only direct connection between the Union Pacific and Central Pacific Railroads with the waters of the Bay of San Francisco,) and from Davis' Junction to Marysville, 45 miles, making a total of 105 miles. The road is finished to within seven miles of Sacramento, and will be in operation to that city next month. The Marysville Branch, 45 miles, is in process of construction, the grading nearly completed, with one-third of the iron on hand, and the balance purchased and on the way, and will be laid, and the whole road completed early the coming Spring.

The road is fully equipped with first class rolling stock.

The earnings for the month of September on 46½ miles then in operation was $17,500, gold, exclusive of all construction traffic.

The total amount of bonds authorized to be issued is $2,250,000. or less than $22,000 per mile. The net receipts now are more than double the interest on the whole issue of bonds, and when the road is completed it is estimated they will reach $125,000, gold, per month. These bonds are secured by a first mortgage on the entire property of the company, including the lands at Vallejo, which are very valuable.

We offer a limited amount of these bonds at par and accrued interest in currency.

Government and other securities receive in exchange at market rates.

TURNER BROTHERS, Bankers, No. 14 Nassau street.

Journal of Railroad Law.

WHEN A RAILROAD COMPANY IS LIABLE FOR THE DEATH OF A PERSON CROSSING ITS TRACK — WHEN A JURY IS BOUND TO BELIEVE A WITNESS.

The facts in the late case of Siebert *vs.* The Erie Railway Company, [49 Barb., 583,] are briefly as follows: The action was brought to recover damages for a personal injury sustained by the plaintiff, as claimed, by being run against and knocked down by the defendants' locomotive, through the negligence of the defendants' servants, while the plaintiff was crossing the railroad track, in the city of Buffalo. The defendants set up, in their answer, as a defense, that the carelessness and negligence of the plaintiff contributed to, and caused, the accident.

The opinion of the court was delivered by E. DARWIN SMITH, J.—Upon the merits, I am not satisfied with the verdict. I think it not warranted by the evidence. There is no pretense, or ground for pretense, that there was any negligence on the part of the defendants which could sustain the action, except in the omission of the engineer or person in charge of the defendants' locomotive to ring the bell, or sound the whistle at the crossing of Alabama street. When the plaintiff rested, it appears from the evidence of the plaintiff himself that he had heard no bell or whistle before he was struck by the engine; and another witness, at a short distance from the plaintiff when he was struck, also testified that he heard no bell. This is the slightest possible evidence, scarcely sufficient, uncontradicted, to take the case to the jury. At such a point, when trains were going out and running in, and bells ringing almost constantly, the ringing of a bell or sounding of a whistle would not be likely to attract any particular attention; and probably there were one hundred persons in Buffalo within sound of the bell, if rung, or within hearing of the whistle, if it sounded, who might give the same testimony with equal truth.

The testimony on the defense, upon this point, of the engineer, on the contrary, that the whistle was blown and the bell rung, is positive and unqualified. He testified that he saw the flagman at the intersection of the road, and blew the whistle twice to attract his attention, and getting no motion from him to go on, he whistled again twice, and reversed the engine to stop; that the flagman then gave him the motion to come ahead; that he then did so, ringing the bell all of the time with his left hand; that the bell was rung all the way from where the witness started, and that the witness struck the plaintiff about 150 feet east of Alabama street. Another witness testified that he was at work in Kasson's shop, on the south side of the track, at the time of the accident, and close by the place where the plaintiff was struck; that he heard the bell ringing, looked out of the window which was open, saw the engine pass, and heard some one cry out, "bring an axe to cut my arm off;" that the witness ran out and saw the plaintiff opposite Kasson's office, and about 150 feet east of Alabama street; that the witness was expecting the one hundredth regiment that evening, and heard the bell ring, and went to the window to see. This was from ten to fifteen minutes past six, P. M., by city time. This witness further testified, that he was standing when at work, about twenty feet from the defendants' track, and saw no other engine about there when he heard the bell ring. He saw the locomotive pass the window. That the engine went some one hundred and fifty feet from where the plaintiff was, before it stopped. The witness picked up the plaintiff some one hundred and fifty feet east of Alabama street.

The testimony of these two witnesses is clear, positive and circumstantial; they could not be mistaken. There testimony is true, or they commit willful and corrupt perjury. I think the jury, so far as anything to the contrary appears in this case, were bound to give credit to their testimony. It was not contradicted; it was really no contradiction for the plaintiff to say he did not hear the whistle or bell. They were not impeached or in any way discredited. The positive testimony of an unimpeached, uncontradicted, witness cannot be discredited, or disregarded arbitrarily or capriciously by courts or jury. (Lomer *vs.* Meeker, 25 N. J. Rep. 363.)

If juries are premitted to discredit or disregard such testimony, there is no safety in the administration of justice, and parties might just as well let the result of a litigation abide the cast of a die, or a game of chance. It belongs to a jury, I admit, in considering the weight of evidence, to pass upon the credit due to the respective witnesses; but this does not imply that they may, without reasonable or justifiable ground, disbelieve any witness. They have no right to discredit an unimpeached, uncontradicted witness, who testifies fairly, and gives clear, rational, consistant and relevant testimony.

For judicial purposes, all witnesses stand upon a par, and must be believed in their testimony, unless discredited by the inconsistancy, incredibility or improbabilities of their statements, on cross-examination, or otherwise contradicted by other witnesses, or impeached in respect to their general character for integrity or truth. Nothing of that kind was done or attempted in this case, and for aught that appears in this case, the two witnesses, Giles Hosmer and George Mercer, appear and stand as fair and credible, in all respects, as witnesses, as any man in Buffalo.

The testimony, besides, tends to show that the plaintiff was struck by the engine in attempting to cross the defendants' track about 150 feet east of Alabama street. If so, he was where he had no right to be, and, as the judge instructed the jury, would not in such case be entitled to recover.

Upon the whole, I think, there should be a new trial; but as it is upon the ground that the jury have found against the defendants upon the evidence, it must be upon the payment of costs by the defendants of the former trial, and the costs of the appeal to abide the event of the action. New trial granted.

☞ The Fredericton *Reporter* says that the first locomotive and tender for the Fredericton Branch Railway has arrived safely at Fredericton, and will shortly be running at that end of the line, where the work is being pressed forward with very commendable vigor.

☞ Application will be made at the next meeting of the Quebec Legislature for an act to revive, continue, and amend the charter of the Drummond and Arthabaska Counties Railway.

Memphis and Little Rock Railroad.

We are informed that recent negotiations of Mr. R. C. Brinkley, president of the Memphis and Little Rock railroad have resulted advantageously to the interest of the road. What is known as the "Peabody claim" has been finally disposed of, thus relieving the enterprise of a great financial weight, and rendering valuable assets available. The president has also, we learn, received a sufficient amount of iron rail to lay the track from Madison west to Forrest City. This iron is now in New Orleans. The necessary funds for this extension of track and the building of the St. Francis river bridge have been secured, and the work is to be pushed by the company.—*Memphis Appeal.*

Coal and Iron Statistics of Great Britain.

The Mineral Stat stics of Great Britain, collected by Mr. Robert Hunt, for the year 1867, have just been published. From these we learn that the quantity of Coal produced in the United Kingdom amounted to 104,500,480 tons, valued at £26,125,145. Of this quantity, England produced 78,785,987 tons; Wales, 11,463,550 tons; Scotland, 14,125,943 tons; and Ireland, 125,000. Of this coal, 9,761,827 tons were exported, leaving upwards of 95,000,000 tons for home consumption, the larger quantity of which was consumed in the manufacture of iron. The quantity of Iron Ore produced in the United Kingdom during the period under review amounted to 10,021,058 tons, valued at £3,210,098. The locality of this production was as follows: England, 8,169,244; Wales, 545,298 tons; Scotland, 1,264,500 tons; Ireland, 42,016 tons. The following is a general summary of the metals raised, and value of the same, in the United Kingdom in 1867:

	Tons.	Value.
Coal	104,500,480	£26,125,145
Iron ore	10,021,058	3,210,098
Tin ore	13,649	694,734
Copper ore	158,544	699,693
Lead ore	93,432	1,158,066
Zinc ore	13,489	41,340
Iron Pyrites	116,889	67,453
Gold quartz	3,241	5,321
Arsenic*	2,255	4,112
Gossans, &c	5,482	5,808
Nickel	2	14
Wolfram	10	62
Manganese	808	3,233
Barytes	11,107	7,827
Coprolites	37,000	70,300
Salt	1,394,939	836,963
Clays (*fine* and *fire*)	1,179,300	589,650
Earthy minerals not returned (estim'd)		650,000
Value of the minerals produced		£34,169,719

* In part estimated.

The amount and value of the metals obtained from the above ores was as follows:

	Tons.	Value.
Pig iron	4,761,023	£11,902,557
Tin	8,700	799,203
Copper	10,233	831,761
Lead	68,437	1,337,509
Zinc	3,750	79,693
Silver	804,024 ozs.	215,400
Gold	1,520	5,900
Other metals (estimated)		15,000
Total		£15,187,013
Value of metals produced from the mines of the United Kingdom		£15,187,013
Value of coal		26,125,145
Other minerals not smelted—salt and clay		2,167,934
Total		£43,480,092

The following is a summary of the coal produce of the United Kingdom for the year 1867:

	Tons.
Durham and Northumberland	24,867,444
Cumberland	1,512,514
Yorkshire	9,843,585
Derbyshire	4,550,550
Notinghamshire	1,575,300
Leicestershire	1,150,000
Warwickshire	880,850
Staffordshire and Worcestershire	12,526,554
Lancashire	12,841,500
Cheshire	935,000
Shropshire	1,558,500
Gloucestershire and Somersetshire	1,975,000
Monmouthshire	4,569,500
South Wales	9,092,300
North Wales	2,371,250
Scotland	14,125,943
Ireland	125,000
Total produce of the United Kingdom	104,500,480

The Iron Ore produced by the United Kingdom was as follows:

Counties.	Tons.	Value.
Cornwall	6,427	£2,004
Devonshire	10,213	3,179
Somersetshire	36,875	17,953
Gloucestershire	156,169	70,271
Monmouthshire	341,057	86,041
Wiltshire	82,856	33 034
Northamptonshire	416,765	104,191
Lincolnshire	192,213	48,053
Shropshire	250,000	62,500
Warwickshire	15,500	3,875
Staffordshire—North	794.500	212,238
" South	525,000	136,450
Derbyshire	350,000	87,500
Northumberl'nd & Durham	115,700	31,770

The Darien Ship Canal.

Among the important enterprises, recently brought to public notice, requiring faith, boldness, and the expenditure of large sums of money, one of the most conspicuous is the Darien Ship Canal.

The advantages of a ship canal across the Isthmus, giving to this country and the world a short cut to the Pacific States and Territories of the Union, the northwestern tier of South American republics, China and Japan, are too apparent to need pointing out. It would be foreign to our purpose to make guesses about the cost of the work or pronounce upon its value as an investment. Our dealings are solely with the facts of the scheme so far as developed. We learn from a statement of Secretary Seward at a meeting of gentlemen in this city the other night, that the "executive Government of the United States has adopted the enterprise," has "provided for a full, satisfactory and final survey preparatory to the construction" of the canal, and is now "negotiating with the republic of Colombia for its consent" to the undertaking. These preliminary steps have been and will be taken, not on the sole responsibility of the Government, as the Secretary explains, but on the strength of assurances that the $100,000,000 estimated as the cost of the canal will be forthcoming when wanted from private sources. The Secretary diplomatically refrains, in his remarks, from indicating the probable terms upon which the concession will be made by the republic of Colombia. Upon this interesting and important point some light may be shed by the United States diplomatic correspondence for 1867, just published.

Referring to p. 824, vol. 2 of that work, we find a decree passed by the Colombian Congress in 1867, fixing the basis for the concession of the privilege of making a canal across the Isthmus. The conditions there set down may be modified somewhat by negotiation, but it is not improbable that the main features will be preserved. Of these the most material are as follows: The duration of the privilege shall be 99 years, reckoning from the day on which the canal may be opened to public service in whole or in part. Fourteen years shall be the maximum time given from the date of the concession, for the completion of the work. The canal shall have breadth and depth sufficient for steam or sailing vessels of the highest tonnage now used, the "Great Eastern" alone excepted. The ports at each end of the canal shall be free and open to the commerce of all nations, and no duties on imports shall be collected except on merchandise intended for consumption in the republic of Colombia. The ports and the waters of the canal from sea to sea are declared neutral; and the passage of war vessels, whose manifest purpose is to take part in hostilities, is forbidden. Passports will not be required of passengers except in case of war or internal commotion in the republic of Colombia. The grantees have the exclusive right to fix the tariff of rates; provided that they shall not exceed 75 cents per ton in ballast, $2 on each ton of cargo, $10 for each person, and one-half of one per cent. on gold, silver or platinum, coined as money or in bars, and on precious stones. The prices shall be equal on individuals, vessels, merchandise and property of all nations. Ships and merchandise belonging to or in the service of the republic of Colombia shall pass through the canal free of charges. The grantees shall have for the uses of the canal a strip of land along its outer bounds, not exceeding 30 metres wide on each side, but land owners along the line shall have the free right of easy access to the canal and its ports. The grantees shall pay to the Government of Colombia for the first 25 years 6 per cent., and for the remaining 74 years 8 per cent. of the clear annual profit of the enterprise; and this percentage shall be guaranteed to be not less than $600 000 a year. The Government of Colombia and the grantees must reciprocally bind themselves to arrange with the Governments of England, Prussia, Holland, France and the United States of America for an absolute guarantee of the neutrality of the canal by those powers, and the sovereignty of the republic of Colombia over the territory through which the canal may pass. Such are the fundamental conditions of the basis upon which Mr. Seward is endeavoring to perfect the scheme of the canal.

As the decisive survey has yet to be made, it would be premature to discuss the claims of the different routes proposed. The Isthmus varies in width from 47½ to 114 miles, and has been explored in nearly all its parts with a view to the construction of a ship canal. The new surveyors who are to go out there will find their labors rendered comparatively easy by reference to the reports of Messrs. Gisborne, Strain, Prevost, Trautwine, Porter, Lane, Kennish, and later still, of Lieutenants Craven and Michler, who have investigated the problem under the authority of the United States.—*Journal of Commerce.*

☞ The Vineland Railroad Company, Vineland, N. J., will receive proposals until November 9th, for grading, bridging, etc., the Vineland Railroad from Vineland to Winslow. C. K. Landis, Esq., is President of the company.

☞ A meeting of all the locomotive builders in New England, Pennsylvania and New Jersey is to be held at the Metropolitan Hotel, New York, on the 5th of November.

☞ The New Haven, Middletown and Willimantic Railroad Company has been organized by the election of David Lyman, president; and O. Vincent Coffin secretary and treasurer.

☞ Sanford Fleming, chief engineer of the Intercolonial Railway has arrived in Ottawa with the plans of the different sections for the use of the Privy Council.

Boston, Hartford and Erie Railroad.

We give below the principal portion of the communication of the Governor of Massachusetts to the Executive Council, referred to in our last issue, on the strength of which they concurred with him in directing the issue of the first instalment of State aid to this company. The Governor says:

On the 31st of July the commissioners made an extended report upon the whole subject, and in conclusion expressed the opinion that, if the means and resources of the company should be honestly and judiciously used, and with a reasonable degree of energy, enterprise and economy, the road might be thereby constructed and moderately equipped, and they accordingly recommended the allowance, by the Governor and Council, of a loan of scrip for the work already done and equipments purchased. This report, with the documents which accompany it, were transmitted to the Attorney General, with the request that he would report upon the various matters in which his concurrent action was required.

It was quite obvious to my mind that it was the design of the Legislature to secure the separate and responsible judgment of the Governor and

Council upon each of the particulars named in the act as necessary to be shown. It also became early apparent that the principal questions concerning which doubts would exist, were, whether the requirements of the statute concerning the payment and cancellation of the mortgage debts secured by the underlying mortgages on that part of the road situate this side of Southbridge and Willimantic were complied with, and whether the company has satisfactorily shown that they would be able, without further aid from this Commonwealth, to complete their line from Boston to Fishkill before May 27, 1872. The attention of the Committee of the Council was called to the considerable discrepancy which was found to exist in the various statements of the bonds now outstanding, which are secured by the underlying mortgages above referred to. This discrepancy has been largely relieved by subsequent explanations; and the recommendation of the Committee of the Council that a bond with personal sureties should be required in the penal sum of one million of dollars to protect the franchise and property described in the Berdell mortgage from the uncancelled bonds, obviates the objections intimated in this report of the Attorney General, and dispenses with the necessity of the precise ascertainment of the number of bonds now outstanding, which indeed appears impracticable. The Committee of the Council became satisfied the company will be able to complete their line of road to Fishkill within the time specified by the act, without further aid from this commonwealth.

Wishing, however, rigidly to test the conclusion to which the Committee of the Council had come upon this latter subject, I addressed to the commissioners a supplementary communication, which expressed the doubts that still remained in my mind, and the want of full information, which, as it seemed to me, still existed upon certain facts bearing upon the question. By their reply the validity of the acceptances of the Erie Railroad did not appear to be established, and I was not quite able to concur with the opinion of the commissioners that it would seem a fair estimate to offset the accruing interest money, which the company would apparently be obliged to pay, against the earnings of the road. Up to this time it had been assumed that the full time allowed by the act for the completion of the road to Fishkill might be occupied in doing the work. It was obvious that an amount of about $3,000 000 would become due for interest before that time. By the last exhibit of the commissioners, the sums to be paid by the company exceeded their pecuniary resources, now within their control. There were also certain other matters of detail concerning which I desired further information. I therefore presented certain inquiries to the officers of the company. By their replies, it appeared that it is the purpose of the company to complete their line of road to Fishkill during the next year; and, upon personal conference with Mr. Ashburner, one of the commissioners, and himself a civil engineer of large experience in this kind of work, I am satisfied that this may be done. This early completion of the road will greatly diminish the amount of interest to be paid. The opinion of Mr. Evarts was submitted to the Attorney General, and he deems it satisfactory to establish the liability of the Erie Railroad Company for the bonds which they have received.

Upon the whole case, as thus presented, the question then remains, what rule is to be adopted as a guide by which to determine whether the company will be able to complete their line of road to Fishkill without further aid from the Commonwealth? Are they to be required to demonstrate mathematically an actual present ability, from means now within their control, to meet the necessary disbursements? Or, do they meet the requirement of the statute by making it appear to the satisfaction of the reason and conscience that in all human probability they will be able to accomplish the work? Accepting the latter as the true rule, bearing in mind the valuation which the public have now for several months continuously put upon the shares of the company, and believing that this indicates the existence of a borrowing capacity on the part of the company yet remaining, which is equal to the difference between the required disbursements and their present actual means, I am prepared to submit for your decision the subjoined order.

☞ Track laying on the St. Paul and Superior Railroad is making progress at the rate of one mile a day, and has already reached Rice Creek, twenty miles from St. Paul. By the end of next week, if the weather is favorable, the road will reach Forest Lake, and possibly Wyoming, a further distance of ten miles.

BY J. B. CANNON & CO., AUCTS.

LARGE AND VALUABLE BUILDING

For Manufacturing Purposes

In SOUTH BALTIMORE, at Auction.

We shall sell at the Exchange Sales Rooms, Second st. in the City of Baltimore, on Thursday, Nov. 12th, at one o'clock, P. M., the lot and improvements of the BALTIMORE FILE COMPANY, situated near the Baltimore Gas Works, in South Baltimore, bounded on three sides by open streets, and fronting about 222 feet on Ohio Avenue, over which passes the LOCUST POINT Branch of the Baltimore and Ohio Railroad Co., and most admirably located and adapted for manufacturing purposes.

There is upon this lot a Brick Building, nearly new, 240 feet long by 40 feet wide, of one high story, with a wing 75 feet long, and two stories high, recently erected with great care by the Baltimore File Company. The entire building is of 14 inch walls, on heavy stone foundations, and covered with a superior slate roof, making it one of the most substantial buildings in this vicinity. Adjoining the main building is a substantial brick Engine and Boiler House.

ALSO

At same time will be sold

One Splendid New Steam Engine,

100 HORSE POWER, built by Woodruff & Beach, of Hartford, Conn., with all the modern improvements, and a TUBULAR BOILER of the capacity of

200 HORSES, built in Baltimore. With these will be sold SHAFTING, COUNTER SHAFTING, BELTING, &c.

The property must be sold to close the concerns of the company, and an unusual opportunity is thus offered for any large manufacturing establishment to locate advantageously.

Terms ½ cash, balance in 4 and 8 months, with interest. Title indisputable. Possession given within ten days after sale.

For further information apply to Messrs. KEYSER, TROXALL & CO., HAYWARD, BARTLETT & CO., or WARD BROS., Baltimore, Md.

J. B. CANNON & CO.,
Auctioneers, Baltimore, Md.

Body 11÷8. Corner Posts, Bottom and Sides of Iron. 33in. wheels. Gauge 4 ft. 8½ inches. Can be delivered in ten days.

WILLIAMS, PAGE & CO.,
91 Water st., Boston.

ONE OF THE

BEST INVESTMENTS.

THE First Mortgage Bonds OF THE UNION PACIFIC RAILROAD COMPANY.

850 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO Treasurer, New York.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

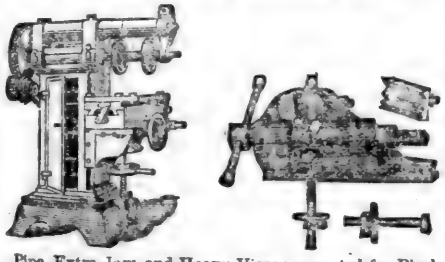
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

Patent Punched Hollow Steel Railroad Axles.

Our attention has been called to the Hollow Steel Axles patented by Messrs. DEAKIN & JOHNSON, advertised on another page. The patentees claim that these are the only axles which can be relied upon as being in every respect perfectly sound. The mode of manufacture, which has been fully explained to us by Messrs. LENG & OGDEN, the Agents for the United States, certainly appears to us to insure perfection in every single axle. In the first place the steel is carefully manufactured specially for the purpose, and afterwards such of it selected as is deemed suitable. A solid ingot of proper size is then taken, and by the aid of a taper punch a hole is made through it, not by taking out the metal, but by compressing it; and in this part of the manufacture consists its great superiority over all others—for in the operation the quality of the steel is fully tested; if the ingot contains any of the many flaws to which all steel is liable, and which would render any axle made therefrom unsafe, the flaw will certainly be discovered, and as a consequence the ingot be consigned to the scrap heap, instead of being worked up as under any other plan, and producing an unsound axle whose defects might not be discovered until they had caused an appalling accident.

The ingots which have thus passed the ordeal of the punching process and been proved sound, are carried to the next stage of re-manufacture. A mandril or arbor is inserted in the hole made by the punch, and the ingot is drawn down under a trip or drop hammer. At this stage of the manufacture, in consequence of the pressure of the mandril, each single blow has a double effect, one on the external and another on the internal surface; the axle is then finished as to external and internal size, in a pair of rolls, and then follows a very important feature in the manufacture of these axles, the journals are swayed down so as to give as much or even greater strength in them than in other parts of the axle. This is claimed to be a very important advantage over every other description of axles now in use, their journals being the weakest, instead of what they ought to be, the strongest point.

The patentees also claim that while giving an axle of enormous strength, they also reduce the weight from those of ordinary manufacture 20 to 25 per cent., effecting an immense saving in motive power, and a great reduction of wear of the permanent way.

We understand these axles can be furnished cheaper than any good solid steel axle now in the market. This fact alone we consider a very strong recommendation.

Some of the patent axles, we are informed, are about to be delivered to the Erie Railway Company, and we earnestly call the attention of all railroad men to this new and improved article, which is not only of such great importance to them, but also to the public, for their adoption would be a source of vast economy to the companies, as well as a means of greater safety to the traveling public.

☞ A contract has been made with Patrick McEvoy of Lancaster, Penn., for building a railroad to connect the Sunbury and Erie railroad at Driftwood and the Allegheny and Valley Railroad at Mahony. This road is understood to be a feeder to and branch of the Pennsylvania Railroad, and will be nearly a hundred miles in length.

Memphis and Charleston Railroad.

The earnings of this road for the fiscal years ending June 30, 1867 and 1868, have been as follows:

	$1,661,612 43	$1,174,914 13
Expenses, viz:		
Conducting transp...	$334,095 09	$282,685 62
Motive power.....	338,848 52	258,278 28
Maintenance of way..	329,497 00	206,610 07
Maintenance of cars .	111,984 36	82,533 89
	$1,114,424 97	$830,107 86
Net earnings.....	$547,187 46	$344,806 27

Compared with the previous year, the gross earnings of 1867–'68 show a decrease of $486,698 39; with a decrease in expenses of $284,317 11—making the decrease of net earnings, $202,381 19.

The following statement from the report of the chief engineer shows the expenditures during the year connected with the maintenance of way, the repairs of depot buildings, platforms, etc., and with the supply of wood and water:

	Am't exp'd during. 1866–'67.	Am't exp'd during. 1867–'68.
Chairs, castings, spikes and switches....	$14,439 76	$6,525 31
Incidentals	2,486 16	1,156 31
Superintendence.....	7,674 67	6,906 66
Cross-ties	65,605 10	54,322 87
Iron rails.....	2,990 69	122 01
Labor on track.....	188,320 30	106,833 13
Rep'rs of division houses	1,821 42	739 37
Repairs of bridges and trestles.....	37,963 62	22,485 36
Repairs of road and hand cars.....	2,940 24	2,356 27
Tools and repairs of tools	5,255 04	5,162 78
Total mainten'ce of way.	$329,497 00	$206,610 07
Rep'rs of depot buildi'gs	11,696 62	5,871 90
Exp. of water stations..	17,347 48	11,469 83
Wood for locomotives...	105,405 82	77,762 06
Total.....	$463,946 92	$301,713 86

This shows a saving of expenses under these headings of $162,233 06, of which $135,891 32 is in the items of labor on track, repairs of bridges, cross-ties and wood for locomotives.

The proportion of expenses of maintenance of way to the total expenses of running the road in 1867–'68 was 25 per cent.; in 1866–'67 it was 29.5: and in 1865–'66, 32.5.

The large amount of permanent work done upon the road between the 15th of September, 1865, when the company received possession of of the road from the military authorities, and the commencement of the present year, has enabled the road masters to greatly improve the road-bed, bridges and track during the year, even with the large decrease in expenses above shown. There have been furnished and laid, during the year, 104,379 cross-ties, the whole expense of which is included in the maintenance of way expenses. 3,167 new rails have been used to replace 8.4 miles of laminated rails. The cost of laying these rails has been charged to maintenance of way. There have been laid during the year 27,668 Tredegar rolled chairs, 24 inches long, making 62½ miles, making, with the 8½ miles previously laid, 71 miles of track laid with the improved joint. The depots, division and tool houses, etc., have been kept in good order and generally improved. The bridges and trestles on the entire road have been greatly improved; 3,389 lineal feet of pile bridge have been constructed, and 1,650 feet of trestle renewed. New side tracks have been put in at several points, and much of the road ballasted with sand, gravel and rock.

The expenditures of the year above the legitimate working expenses have been charged to construction, and are embraced in the following table:

Attorneys' fees, &c.	$1,829 70
Bridges and trestles	36,900 70
Depot buildings	5,385 59
Division houses	1,172 18
Engineering and contingencies	1,333 33
Fencing	137 56
Freight cars	129,361 33
Grading and masonry	3,601 75
Iron rails, &c	155,233 10
Locomotives	2,595 95
Machine shops and engine houses	1,356 35
Machinery for shops	1,600 00
Right of way	3,646 73
Real estate	17,492 57
Track-laying	12,111 40
Wood and water stations	1,573 28
	$375,421 52

Many of the expenditures shown in the above statement are for rebuilding the road and bridges, the original cost of which was charged to construction; but in 1866 the amount of $1,087,166 79 was charged off from construction to profit and loss. This sum did not represent the first cost, but the value of the structures when destroyed. The bridges were all of wood, and originally cost from $20 to $40 per foot. The estimate of their value was based upon their age. Some of them were only estimated at half their cost. The new structures, built altogether, or mostly of iron, cost from $50 to $100 per foot. This accounts for the increase to construction account over and above the amount originally charged to the same, and at the same time has caused a corresponding increase in the value of the company's property.

The following exhibit shows the total cost of the road and equipment, from its commencement to June 30th, 1867, after charging off, as was done July 1st, 1866, to profit and loss, the damage attributable to the war, amounting to $1,087,166 79. It also shows the amount expended to the present time, viz: $7,661,608 12.

	To July 1, 1867.	To July 1, 1868.
Attorneys' fees, &c.	$14,442 17	$16,271 87
Ballasting	6,232 51	6,232 51

Machine shops and engine houses	117,998 90	119,355 25
Machinery for shops	53,638 94	55,238 94
Passenger and baggage cars	121,062 72	121,062 72
Right of way	52,744 97	56,391 70
Road and hand cars	22,061 52	22,061 52
Real estate	64,419 32	81,911 89
Track-laying	248,536 91	260,648 31
Contingent expenses	26,493 59	26,493 59
Wood & water stat'ns	74,990 57	76,563 85
Commissions	24,653 81	24,653 81
Disconnt on company bonds	199,696 26	199,696 26
Stationery & printing	2,290 18	2,290 18
Florence branch	153,727 17	153,727 17
	$7,286,186 60	$7,661,608 12

The value of the road and equipment, on the 1st of July, 1865, after the above deduction was made, stood at $5,971,401 60, showing an increase of construction account, to the present time, $1,690,206 52, being $603,039 73 in excess of the amount charged off; but the new work being of a much better and more expensive character than the old, the whole property of the company is increased in value more than the increase in cost above shown. At the above cost of $7,661,608 12, the company own 290 miles of first class railroad, including equipment capable of doing a business of $2,500,000 per year, with machine shops, machinery, warehouses, &c., also, large bodies of valuable real estate at Memphis, Huntsville and other points on the road, and the stocks, bonds, securities and other personal property, over and above the property incidental to the operating of the road, to a large amount.

The Superintendent, in his report, attributes the decrease of revenue in a great measure to the short crop of cotton, the impoverished condition of the country through which the line of road is located, the reduction made in local rates, both freight and passenger, and to the epidemic which prevailed at Memphis last fall and summer, which almost suspended business for four months. During these four months the entire receipts were only $387,564 51, while the expenses were $373,446 11, leaving the net profits for one-third of the year only $14,180 40. The remaining two-thirds of the year yielded a net profit of $330,687 87. But for the causes named the net profit would have been nearly as much as in the previous year, or say $506,031 80.

The expenses for the last eight months were $456,661 75, or $57,082 72 per month. It is believed that this low rate of expenses may be obtained in the future; and, taking into account the increased crops of cotton and cereals of every kind to be moved, the receipts must greatly improve during the next year, and that the net receipts in future will be sufficient to pay interest on all the bonds, and a semi-annual dividend of six per cent. to the stockholders, which will require $575,007 30, viz: Interest on 1st mortgage bonds, $90,510; do., on 2d mortgage, $70,000; do., on State of Tennessee bonds, $95,731 80—and two semi-annual dividends of three per cent. each, $318,765 50. The President in his report says:

Your balance sheet from the general books of your company, gives a comprehensive statement of all your operations, and an examination of it will give you the information necessary to a full knowledge of your company's affairs, and it is believed will exhibit a very satisfactory condition of your financial position. The abstract attached to and forming a part of your treasurer's report, gives the receipts and disbursements of the road for the fiscal year in a condensed form, that will enable you at a glance to comprehend the operations of the Treasury Department.

Your floating debt has been reduced during the year, $595,384 40; and your funded debt increased, $762,000, viz:

Increased issue of second mort. bonds	$763,000
Less first mortgage bonds redeemed	1,000
	$762,000

Your entire funded debt is now $3,888,530, and your floating debt is nominally $326,552 72. But a large amount to this is the balance standing to the credit of old dividends, pay-rolls, unpaid coupons, amounts to credit of individuals, that are settled and cancelled monthly, and will rarely ever be less than now. Hence you have only to provide for your

Bills payable	$111,228 55
And probably one-half of your pay-rolls and unpaid coupons	42,889 16
And one-half of your unpaid dividends	17,676 89
Taxes due to United States Internal Revenue Department	11,192 30
Making in all	$182,986 90
Against this you have cash on hand	$67,508 04
And in hands of Winslow, Lanier & Co., N. Y., to pay coupon int.	40,353 51
Due from U. S. Governm't.	17,637 77
Due by agents	8,679 44
Making a total equivalent to cash of	$134,378 76

Most of your bills payable do not mature until next fall and winter, consequently your finances are easy. Besides this, you have $464,000 of coupon bonds of other roads that will finally be good, or most of them. Your dues from railroad companies, individuals, bills receivable, and other sources not enumerated above, will be ample to meet all liabilities to individuals, railroads, &c., not specifically provided for, and leave a large balance over. These and balances standing to the credit of unpaid coupons, unpaid dividends and pay rolls, have been accumulating for over ten years, and many of them will never be called for, the evidence of liability having been destroyed during the war. They will finally have to be charged off to profit and loss.

Your road and its rolling stock being in fine condition and your finances easy, with fine prospects of crop and business this fall, you may reasonably hope that your worst troubles are passed, and look to the future with brighter anticipations than at any time during the past year.

YOUR CONNECTIONS.

I cannot close this report without alluding to the importance of your future railroad connections. The most important of which is the one that will give you a direct connection from some favorable point in North Alabama to Atlanta, and

thence to Charleston and Savannah. I have recently had correspondence with Judge King, of Georgia, and Mr. G. H. Hazelhurst, both prominent railroad men of that State, who say the railroad fires are again beginning to burn in Georgia, and they are anxiously looking to the building of the Atlanta and Decatur Railroad, *and ask*, "Can you do anything for it West of Sand Mountain?" The time is probably near at hand when, with proper co-operation, this road can be speedily built. As to its importance as a connection for your line, (as well as to republish his views regarding other important connections for your road,) I cannot more forcibly impress upon you the necessity, than to quote what my immediate predecessor said in his last Annual Report, and urge you to take action in the premises at the earliest practicable moment.

"From Decatur, Alabama, to Atlanta, a practicable line of road can be built within one hundred and fifty miles, at not above the average cost of your road. This would give you practically an air-line road from Memphis to Charleston and Savannah, on the shortest line that a railroad can be built between the city of Charleston and the Mississippi River, not exceeding six hundred and fifty miles, and to Savannah not exceeding six hundred and thirty-five miles. The completion of this link of road would secure to you a line which could forever successfully compete with all competitors, built or to be built, for the great through business from New York and all the manufacturing districts in New England, and for all imported or manufactured goods to be consumed in the Mississippi Valley at, or South of, Memphis, as it is the shortest rail, with the cheapest water connection that can ever be made between the points named.

"It would also secure to you almost the entire trade from St. Louis, the great granary of the West, to supply with Western produce the whole of the States of Georgia and South Carolina. You would have the cheapest water transportation known from St. Louis to Memphis, time only two days, and at a cost of not over twenty cents for one hundred pounds. The distance from Memphis to Atlanta would be only three hundred and forty miles, or at least one hundred and twenty miles nearer than any other all rail route from Atlanta to the Mississippi River—Atlanta being the distributing point for Georgia and South Carolina. These advantages must secure you this vast trade, almost without a competitor. By running a day and night through freight train, the time from St. Louis to Atlanta would be reduced to not over four days, and the cost of freight to about one-half or two-thirds of its present cost. If this road was finished, it would reduce time on freight between New York and Memphis to from five to five and a half days. These results, in both time and cost, would certainly secure a very heavy business to the line, and your cars would go and come fully loaded, both East and West, at remunerating rates, and you would be secure against all competition.

"Since your last annual meeting, and in conformity to a resolution of your body, I have corresponded, and had personal interviews, with all the roads in Georgia and South Carolina, that are equally interested in the completion of this road, and I found them not only willing but anxious to co-operate with you in its building, and your board cannot recommend too strongly, as soon as the political status of the Southern States is sufficiently settled to justify it, that you go vigorously to work, in connection with the roads above named, and complete this road as rapidly as possible. When this is done, no road in the United States will be more secure from competition, or have a better prospect of a large and profitable business, than yours.

"The next most important connection for your road to look for a large and permanent increase of business, is that of the completion of the line from Decatur to Montgomery. This line would bring you in direct contact with the extensive coal and iron fields of Central Alabama, within seventy-five miles of the central portion of your road, which would certainly give you a very large tonnage, both for coal and iron, for local consumption along the line of your road. It would also enable you to secure an immense lumber trade from the pine forests on Sand Mountain, within twenty-five to thirty miles of your road, the lumber from which is so much needed, and is in so much demand in the Tennessee Valley.

"The opening up of a direct line of railway to this vast field of mineral wealth, at no distant day destined to be the Birmingham of America, will open up new sources of wealth and employment, that will draw to it millions of capital, and an immense population of industrious and enterprising citizens for its development, that must create a large demand for Western produce to support them, from which source you will derive a large and profitable business by way of Memphis, as well as by the Tennessee River. You should not hesitate, at the proper time, to aid and assist in a material way the building of this road, as it will be one of your most productive connections for the increase of your business on a permanent basis."

DECATUR TO MONTGOMERY.

This connection gives you a direct line to Montgomery, the capital of Alabama, and to Pensacola, the best harbor upon the Gulf of Mexico, passing, in its course, within eighty miles of your road, through the most extensive iron and coal fields in the United States, and would bring you an immense business from this mineral region for local consumption on your line. You should not hesitate, at such time as your finances will admit, to aid this line in every way that you can. You already have a large interest in the South and North Alabama road, a part of this line, which will in time be a valuable investment to you, as well as an important feeder in business.

MEMPHIS AND LITTLE ROCK.

This road penetrates the West from your western terminus, and will bring a large trade to Memphis, to be distributed to the various lines of road concentrating at that point. It is now so far advanced that some arrangement should be made to complete it; and it has been rumored that some of the Northern lines are bidding for its control, in order to secure the through business from that remote Western region penetrated by this road. It has been proposed to us to join the Memphis and Louisville line, in giving them such aid as will secure their early completion, and assure to each line a fair and equitable distribution of its business, without discrimination. I regard it so closely connected with you, that it will almost be equal to an extension of your line, should you secure an equal voice in its management, which, by all means, should not be allowed to pass out of your hands, if possible to obtain it.

WINCHESTER AND HUNTSVILLE.

This connection is a short one, only requiring eighteen miles of road to complete it from Huntsville to Rock Spring. It will bring you in direct intercourse with Lincoln, Marshall, and other wealthy counties in Tennessee, and give you a large local trade to pass over your main line. You have $300,000 of Tennessee State aid that can be used for this connection, and I cannot hesitate to recommend that you make arrangements to secure it as soon as you get satisfactory legislation from the State of Tennessee for its consolidation with the Winchester and Alabama Railroad, upon satisfactory terms. This line will finally be completed through to Cincinnati, and give you an important Northern connection.

There have been added to the equipment of the road during the year 102 box, 43 platform, 10 stock and 1 baggage car. The company now have 55 locomotives, 22 first class and 12 second class passenger cars, 4 postal and mail cars, 7 baggage, 1 pay, 1 street, 350 box, 156 platform, 14 stock, 1 wrecking, and 79 road and hand cars. Miles run by trains, 751,942. Passengers carried, 127,016. Bales of cotton transported, 95,288.

CONDENSED BALANCE SHEET.

Capital stock	$5,312,725 00
State of Tennessee bonds	1,595,530 00

President.—M. J. WICKS.

Directors.—By the stockholders, Sam Tate, George P. Beirne, James J. Donegan, Joseph C. Bradley, Samuel D. Weakley, R. C. Brinkley, P. Miller, M. J. Wicks, Wm. Dickson. By the City of Charleston, James H. Taylor, E. Willis. By the State of Tennessee, John C. Humphreys, F. S. Richards, W. J. Smith.

Gen'l Superintendent.—W. J. ROSS.

Chief Engineer.—M. B. PRITCHARD.

Master of Machinery.—M. BURKE.

☞ SEVEN PER CENT. IN GOLD. FIRST MORTGAGE 20 YEARS' 7 PER CENT. BONDS OF THE CALIFORNIA PACIFIC RAILROAD COMPANY, Principal and Interest payable in GOLD COIN at the National Park Bank of the City of New York. Coupons due first of January and July.

The entire line of road constructed, and to be constructed is, from Vallejo to Sacramento, 60 miles, (forming the only direct connection between the Union Pacific and Central Pacific Railroads with the waters of the Bay of San Francisco,) and from Davis' Junction to Marysville, 45 miles, making a total of 105 miles. The road is finished to within seven miles of Sacramento, and will be in operation to that city next month. The Marysville Branch, 45 miles, is in process of construction, the grading nearly completed, with one-third of the iron on hand, and the balance purchased and on the way, and will be laid, and the whole road completed early the coming Spring.

The road is fully equipped with first class rolling stock.

The earnings for the month of September on 46½ miles then in operation was $17,500, gold, exclusive of all construction traffic.

The total amount of bonds authorized to be issued is $2,250,000, or less than $22,000 per mile. The net receipts now are more than double the interest on the whole issue of bonds, and when the road is completed it is estimated they will reach $125,000, gold, per month. These bonds are secured by a first mortgage on the entire property of the company, including the lands at Vallejo, which are very valuable.

We offer a limited amount of these bonds at par and accrued interest in currency.

Government and other securities receive in exchange at market rates.

TURNER BROTHERS, Bankers, No. 14 Nassau street.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JUNE 30, 1868.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain, have been		£646,797
Deduct—The ordinary working expenses (being at the rate of 65.93 per cent., against 70.53 of the corresponding half of last year)	£426,477	
The renewals of the permanent way and works in the half-year debited to revenue	36,020	
Amounts paid on account for loss by fires at Sarnia and Toronto	4,110	
		466,607
Leaving an available net balance earned in the half-year of		£180,190
Deduct—Loss on American currency		18,882
		£161,308
Or an increase over the corresponding half-year of 68,780*l.*		
But from this balance of		£161,308
must be deducted the renewal suspense debit from last half-year, of		31,383
		£129,925
And the amount of postal revenue due for the half-year to the postal and military bondholders		17,829
Leaving the balance of		£112,096
Applicable for the following payments, viz.—		
Interest, &c., paid on lands		1,578
Ditto on mortgage to Bank of Upper Canada		4,428
Ditto on loans, bankers' balances, promissory notes, European exchange, &c.		4,440
Ditto on British American Land Company's debentures		616
Ditto on Montreal Seminary debent'res		616
Ditto on Island Pond debentures		2,700
Half-yearly instalment on Portland Sinking Fund		2,311
Atlantic and St. Lawrence lease (in full)		31,691
Detroit line lease (in full)		11,250
Montreal and Champlain		10,807
Buffalo and Lake Huron		22,045
Equipment bond interest		10,779
Balance carried to next half-year's acc't.		8,834
		£112,095

Comparing the results of the half-year with the corresponding period of 1867, there is an increase in the gross receipts of 37,676*l.*, and a decrease in the ordinary working expenses of 3,215*l.*, in renewals of 18,953*l.*, and in the amount of the damages paid on account of the Toronto and Sarnia fires, of 6,164*l.* The rate of ordinary working expenses for the past half-year being as above stated 65.93 against 70.53 per cent. in 1867. The charges for renewals, adding 31,383*l.* placed to "suspense account" last December, which has now been wiped off, amount to 67,403*l.* The loss on American currency shows a decrease of 2,672*l.*, being 18,882*l.* against 21,554*l.*: so that the net revenue balance, after deducting this loss on the conversion of the American "greenbacks," amounts to 161,308*l.* sterling, against 92,528*l.* in the corresponding period of 1867.

The average receipts from passengers in the half-year was 6s. 8¼d. per head, against 6s. 8d. in 1867; and the average receipt per ton of freight was 16s. 6d. against 15s. 8d. in the corresponding period of last year.

The debit to the capital account for the half-year amounts only to 4,083*l.*, but as the capital account is in debit to revenue, this sum, unless new capital is raised, will have to be written off against the balance of 8,834*l.* The charges hitherto made against capital for extra weight of rails and ballasting are now included under the head of renewals, and brought against revenue. The importance of completing the works of ballasting and improvement as soon as possible can hardly be overrated.

With regard to the loss on American currency—viz., 18,882*l.*—it may be stated that the price of gold fluctuated during the half-year between 133¼ and 143¾. The total loss on American currency since 1862 has amounted to 370,203*l.*

A statement is here given showing the net earnings from 1861 to June of the present year, and also the half-yearly and total expenditure in renewals, and the half-yearly and total loss in American currency. Out of a total profit of 1,823,500*l.*, averaging 243,142*l.* per annum, there has been paid in cash on leased lines 874,000*l.*, and for interest and other claims 624,500*l.*, and since 1862 on the first, second, and third preference bonds and stocks 325,000*l.*

The figures of this table exhibit in a short compass both the progress and the real nature of the special difficulties which have beset the Grand Trunk since 1862. The direct loss on American currency has been no less than 370,203*l.*, or equal to say three years' full dividend on the first preference bonds, and besides this direct and positive loss there have been, as a consequence of the American war, indirect losses by increased wages and cost of materials, perhaps, as large as the loss on the "greenbacks" themselves, after deducting any increased receipts from higher rates for freight. The expenditure on renewals, apart from ordinary maintenance charged against revenue, has been 781,037*l.*, with the effect, of course, of greatly improving the road.

Of the twenty-five engines lately ordered from Messrs. Neilson & Co. of Glasgow, twenty-one have, at the dates of the last letters received from Montreal, arrived in Canada. The remaining four are on the way. Seventeen of the engines are now ready for work on the line, and the whole of them, it is expected, will be ready for the anticipated heavy autumn traffic. The reports received of these engines are very satisfactory. A loan to effect the purchase of them has been arranged with the company's bankers on favorable terms, the lenders having been willing to accept a hypothecation of the engines by way of collateral security.

Every effort that the directors have made to bring about an amicable settlement of the differences of account with the Buffalo has hitherto failed. The Buffalo board will neither agree upon nor allow an impartial officer of the Board of Trade to settle a deed of arbitration. Recent further negotiation through Messrs. Creak and Ritter has ended in nothing, as while the president of the company signed a memorandum of settlement of all matters, as Mr. Creak suggested, the representative of the Buffalo has refused to do the same. In the meantime, the amount stated in the accompanying accounts, as being the proportion due to that company, must be taken as rendered without prejudice.

The directors have much satisfaction in announcing that negotiations have again been reopened for the renewal of the Reciprocity Treaty. Every effort has been made, and with considerable success, during the cessation of this treaty, to open up new channels for the traffic formerly consigned to the States. The newly developed traffic with the maritime provinces is gradually extending. For example, during the past half-year the increase in the Halifax traffic is $28,256, and in the St. John traffic $26,604. The stoppage of trade with the United States has augmented largely the loss upon the Buffalo section, which, if independent, would hardly have paid its working expenses.

The bonds issued by the city of Portland twenty years ago in aid of the construction of the Atlantic and St. Lawrence, amounting in the aggregate to $1,500,000, begin to fall due in December next. The amount then maturing is $200,000, of which sum it is expected there will be about one half provided by the sinking fund attached to the loan; the other half will have to be provided by the Grand Trunk. The balance of the above debt—viz., $1,300,000—falls due at various periods between December next and January 1871. As the sinking funds will, in the aggregate, only be capable of providing about one-half the whole amount, it follows that the remainder will have to be found by the Grand Trunk. To meet this payment of say $750,000, it will be necessary to issue new bonds, either in American currency or in sterling. The latter mode would of course be preferable in consequence of the high rate of premium now paid for gold in the United States. The bonds, wherever they are issued, will be protected by a sinking fund—they form part of the working expenses of the Grand Trunk—and the only mortgage that takes precedence of them is one for $1,500,000. The bonds bear 6 per cent. interest per annum, payable half-yearly.

The directors, as owners (themselves and their immediate connections) of more than one fifth of the total capital of the undertaking, feel entitled to urge, most seriously, upon their co-partners that recent divisions have done much to weaken and disorganize the executive management, and to paralyse efforts to restore the property. The directors have done all that was possible to meet unexampled difficulties, and they believe that their policy and proceedings will be found, after the full inquiry which they court, in every way worthy of approval. They have preserved the property by successfully resisting its forfeiture in Canada. They have carried the company through the period of the American war and the Fenian raids, and they now see the Intercolonial secured, a renewa of the Reciprocity Treaty under negotiation, and the traffic and net profit in these more quiet times resuming the rate of development which distinguished both up to 1866, when the Fnian troubles commenced and the Reciprocity Treaty as repealed.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS, FOR THE HALF YEAR ENDING JULY 31, 1868.

The receipts on capital account during the half-year amounted to £321 4s. 2d., and the total receipts to the 31st July, 1868, to £5,260,829 4s. 9d. The aggregate expenditure to the same date amounted to £5,382,594 8s. 10d., leaving a balance to the debit of capital account of £121,764 19s. 1d. The outlay on capital account during the half-year has been £20,788 11s. 11d. This expenditure includes a proportion of the cost of rebuilding in stone the bridge over 20-mile creek at Jordan; sundry additions to stations; cost of raising the level of the track at Prairie Siding, (a station between Chatham Baptiste creek), as a protection against floods; payment on account of building a new warehouse at Detroit for the better concentration of the freight business; proportion of the cost of rebuilding in brickwork the passenger station at Paris, originally of wood; cost of five new locomotive engines; and ten new composite cars for the accommodation of emigrant traffic and mixed trains on the branch lines. The receipts and expenditure on revenue account were as follows:

Gross receipts		£356,649
Working expenses iacluding renewals		208,462
		£148,187
From which there has to be deducted—		
Interest on bonds, loan, &c.	£52,270	
Loss on conversion of American funds	54,749	
Loss on working Erie and Niagara railway	529	
Ditto, Galt and Guelph railway	476	
Detroit fire claims, final charge	4,110	
Amount set aside for renewal of ferry steamers	2,000	
		114,134
Net profit on half year's operations		34,053
Add surplus from last half year		2,725
Available for dividend		£36,778

From this amount the directors recommend a dividend at the rate of 2 per cent. per annum, free of income-tax, which will absorb £35,649 11s. 6d., and leave a surplus of £1,129 5s. to be carried to the credit of next half year.

The renewal fund for the ferry steamers now amounts with interest to £7,125.

The loss on conversion of American funds for the half year amounts to £54,748 12s. 5d., as compared with £52,820 10s. for the corresponding half year of 1867.

The average rate of conversions made during the half year was 139⅞, the average price of gold for the same period having been 140½. The unconverted American funds on hand at 31st July, 1868, amounted to $153,146 24.

The following table exhibits the receipts and expenses for six corresponding half years:

RECEIPTS.

Half year ending	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
July, 1863	111,671	180,772	625	293,068
July, 1864	125,282	119,081	577	314,940
July, 1865	139,821	144,028	716	284,565
July, 1866	172,731	165,577	854	343,162
July, 1867	165,367	199,221	1,116	365,704
July, 1868	155,082	209,619	948	356,649

EXPENSES.

	Including renewals. £	Per cent. of gross receipts.
July, 1863	171,262	58.44
July, 1864	171,452	58.44
July, 1865	158,804	55.81
July, 1866	175,747	51.21
July, 1867	182,768	49.98
July, 1868	208,462	58.45

The total traffic receipts show a decrease of £8,887 2s. 6d. as compared with the corresponding period of 1867.

This decrease arises as follows:

Decrease in local passenger traffic		£3,785
" foreign traffic		5,297
" local freight traffic		7,424
" mails and sundries		3,708
		£20,214
Increase in foreign freight traffic	£8,222	
" emigrant traffic	2,505	
		11,327
Total decrease		£8,887

The decrease in the receipts is owing to the diminished rates adopted by the parallel routes for through passengers and freight, and to the total interruption of the traffic on three separate occasions during several days, by snow storms and floods, over our own and connecting lines, at the commencement of the half year.

The low rates and fares which competition has forced upon the company for through traffic have had a material effect upon the per centage of working expenses; this, including renewals, has amounted to 58.45 per cent. as compared with 49.98 for the corresponding half year. If the tariff of through rates and fares in force at the corresponding period had been maintained during the past half year the receipts for this traffic would have been augmented by upwards of $100,000, without incurring any increase in the working expenses.

The increase in the amount of working expenses is £25,693 4s. 9d. compared with the corresponding period. This increase has been a matter of serious concern to the Directors, and has engaged the attention of a deputation of the board which visited Canada during the summer upon the business of the company. It is chiefly attributed to the extraordinary severity of last winter and the damage to the rolling stock and roadway by the intense frost, which exceeded all previous experience. The reports of the engineer and the mechanical superintendent hereto annexed, refer to this expenditure, and also to the increased cost of fuel.

The General Manager also specially reports, that making proper allowance for diminished earnings, increased mileage, and extra cost involved by the causes above referred to, he has reason to believe that the ordinary working expenses of the half year would not have exceeded those of the corresponding period.

It will be seen in the mechanical superintendent's report that two new and powerful freight locomotives have, during the half year, been constructed at the cost of revenue and set to work, to replace the same number of an inferior class of passenger engines, and that satisfactory progress has been made in the renewal of others of the same secondary description, by the substitution of new ones of a greatly improved construction; and the board have every reason to be satisfied with the general efficient condition of the plant and rolling stock.

Future prospects from the improved condition of the dominion are encouraging, and from the recent abundant harvest an increased traffic for the current half year may reasonably be looked for. It is satisfactory to learn from later advices, that the increased rates the deputation advocated when in Canada, have to some extent been carried into effect.

The gross earnings of the Detroit and Milwaukee railroad for the half year ending June 30th, 1868, were £153,204 14s. 5d., and the working expenses, including taxes and insurance amounted to £98,150 2s., leaving a net revenue of £55,054 12s. 5d.

It is satisfactory to be able to state that in consequence of arrangements made by the deputation of the board to relieve the finances of the Detroit and Milwaukee Company if its increasing prosperity does not meet with any unforeseen reverses, there is every reason to expect that company will be able, at an early period, to commence liquidating the claims for interest so long overdue to this company. Signed on behalf of the board of Directors.

THOMAS DAKIN, President.

London, October 5, 1868.

Erie Railway Extension.

The Buffalo *Commercial Advertiser*, of October 28th, publishes the following in reference to the proposed extension of this road from Buffalo to Niagara Falls, and the laying of a third rail the entire length of their track:

Parties in the interest of the Erie Railway Company are surveying a line of railway between their track in this city and Niagara Falls, and we understand that the work of building the line is to be commenced immediately, the probability being that it will be open for business early next summer. The new track will begin at a point near the Cattle Yards, and take a direct line to Niagara Falls, avoiding Black Rock, but touching Tonawanda. The route, as surveyed, is, we are informed, considerably shorter than the present line of the New York Central Railway to the Falls. Trains on the new route will depart from the Erie depot on Exchange street. This is a very important piece of work, not only for the Erie Company, but for the Great Western Railway of Canada and for this city. It will give the Erie another route to Chicago, independent of its connection with the Lake Shore Line. It will give the Great Western another route to New York and the East, independent of its connection with the New York Central. It will give this city the advantage of another route to the Falls, and will inevitably bring a great addition to our railway traffic in business which has hitherto gone by the way of Suspension Bridge and by Dunkirk. We have known for some time that the company were preparing to send the bulk of their through business by way of this city instead of by Dunkirk as formerly. The great repair and construction shops, also, we are informed, which are located at Dunkirk, will soon be removed to Buffalo. Several hundred mechanics have already been transferred from the shops in the former place to the shops in this city.

The Erie Railway Company have a still more important project in view, and one which, we have reason to believe, is to be consummated at an early day. This is nothing less than the laying of a third rail the entire length of their track between New York and Buffalo. This immense undertaking has passed beyond the point of consideration, we are informed—the work has been resolved on, and the iron contracted for. The object, of course, is to secure for the Erie Railway an unbroken narrow guage route from New York to Chicago, both by the Buffalo and South Shore route and by the Canada and North Shore route. The recent issue by the Erie Company of ten millions of dollars of convertible bonds, we believe, was to meet the expense involved in this third rail enterprise.

The next important job which the Company have resolved upon, we learn, is the construction of a magnificent new passenger depot in this city on the site of their present buildings at the corner of Exchange and Michigan streets. The Company have long needed better accommodations for their rapidly increasing passenger traffic in this city. The building of the Niagara Falls branch, and the third rail addition, forbid a longer delay on the needed improvement. It is probable that the new passenger depot will be begun very soon, so as to have it ready for occupation by the time the Niagara Falls branch is completed.

Nesquehoning Valley Railroad.

The Bethlehem (Penn.) *Times* says the Lehigh and Susqehanna Railroad Company have determined to build immediately the Nesquehoning Valley Railroad. This road is intended to make direct communication between Mauch Chunk and a point on the Catawissa Railroad, distant about thirty miles from Mauch Chunk. When this road is completed, the Lehigh and Susquehanna Company will have a short and direct route between Easton and Williamsport and points north and west. The work upon the new road has not yet been contracted for, although proposals will soon be received at the office of the company.

Mont Cenis Tunnel.

During the second fortnight of Sept. the progress made was 54.45 metres; 25.10 were driven at the Bardonneche end, and 29.35 metres at the Modane end, making a total advancement of 106 85 metres during the month. The position up to the 30th Sept. was:

	Metres.
Length driven at Bardonneche	5,211 10
Length driven at Modane	3,631 50
Total length of tunnel driven	8,842 60
Length remaining to be driven	3,377 40
Total length of tunnel	12,220 00

☞ Robert Fowler, Johns Hopkins, Gallaway Chestin, Jacob A. Miller, G. Scott Kennedy, E. M. Mealy and P. B. Small, have been re-elected directors of the Washington County Railroad Company.

☞ A survey has recently been made for a railroad from Litchfield, Ct., by way of Mine Hill and the Shepaug River, to intersect with the Housatonic, Providence, Hartford and Fishkill Railroad at Hawleyville.

☞ In Hawleyville, Ct., work has begun in good earnest on the Boston, Hartford and Erie road. Messrs. Redfield & Whitney have contracted to do the stone-work on the road in the vicinity of Danbury for about $100,000.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 7, 1868.

Stock Exchange and Money Market.

The money pressure has been very severe all through the week. The city banks have been losing strength, partly through remittances in response to calls from the South and Southwest for currency. In their last weekly exhibit, they reported a falling off of over five millions in their legal tender reserve, and of over four millions in their deposit line. They were compelled to cut down their loans fully 1¼ millions, though they were enabled to return an increase of over a million in their specie; the latter resulting mainly from the coin interest disbursements of the Sub-Treasury. Though the banks have been exchanged their three per cent. certificates at the Sub-Treasury for legal tender notes, and though they have resolved to make use of their reserve of these certificates for Clearing House purposes, with a view to gaining power to afford some relief to the loan and discount market, they have not been in a position to make anything like free advances, even to their regular customers, either from the street or in the discount line. The banks now hold but 51½ millions of greenbacks, as against a trifle over 74 millions, week ending Aug. 8, showing a decrease in about three months of 22½ millions. This time a year ago, their legal tender reserve was nearly 57½ millions, or some six millions more than at the present time. Their deposit are now down to about 182 millions, against 231¾ millions on the 8th of last August, shewing a falling off of 49¾ millions, or little short of four millions a week. They now hold but 10⅝ millions of specie; on the 8th of August, they controlled 24¾ millions of specie. Their loan averages, on the other hand, are about 262⅜ millions, or only about 17 millions short of the aggregate thirteen weeks ago. The U. S. Sub-Treasury has reduced its cash reserves from 94½ millions on the 1st of October, to 83¼ millions on the morning of the 4th inst. The supply of money available through private channels has likewise been recently diminished materially. Call loans were quoted very stringent, closing at full 7 per cent. and a fractional commission, even on Government collaterals, and ⅛@¼ per cent. a day on the general run of Stock and Gold Board applications. In the discount line, there has been scarcely any business transacted. The best grades of business paper has been quoted at from 8@10 per cent. per annum. The Broadway Bank, as the depository of city monies, called in its loans on Saturday, preparatory to disbursing some three millions on city account, on interest and other obligations due on or about Nov. 1. Preparations for the payment of November interest and dividends have had not a little to do with the making of an unusually close market for money. These disbursements must be all completed in a short time, and in the ordinary course of things, should tend to restore the market to an easy working condition.

The specie reserve of the city banks is now $10,620,526, against $8,974,535 same time last year. The city bank deposits are now $181,948,547, against $178,209,724 week ending Oct. 26, 1867. The legal tender reserve amounts to $51,590,948, against $57,396,967 same time last year. The circulation now stands at $34,253,210, against $34,037,076 same time last year. The loans are now $262,365,869, against $247,227,488 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $134,908,757 a day, against a daily average of $141,262,407 the preceding week, and $105,919,400 the week ending with Oct. 15, 1868. The current week's exchanges average about $143,101,530 a day. The city banks, last week, gained $1,066,943 of specie, while they lost $4,104,300 of deposits, and $5,120,486 of legal tender notes. They reduced their loans, $1,213,264; and increased their circulation, $59,272.

The U. S. Sub-Treasury receipts, week ending with Oct. 31, were $13,613,777, including $1,995,996 from customs duties; payments $17,484,109, including $5,258,000 of coin interest; balance at the close of the week, $91,484,109, against $95,869,947, at the close of the preceding week, showing a decrease of $3,870,382. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,061,311 including $218,772 from customs; and payments, $9,306,172, including $2,870,000 of coin interest; on Tuesday, receipts $1,472,712 including $302,453 from customs, and payments, $3,011,154, including $1,150,000 of coin interest. The balance at the close of business on Tuesday stood

at $83,216,312, against $93,703,339, a week previous; and $95,848,230, on Oct. 14, 1868. The aggregate receipts of the office from all sources in October, were $56,749,293; aggregate payments, $59,249,680. The balance on the 1st of November was $91,999,615, or about 2½ millions more than on the 1st of October, which amounted to $94,499,990.

The New York Gold Exchange Bank reports for the week ending Saturday, the 31st day of October, 1868, the average amount of loans and discounts as $1,870,759; average amount of specie, $498,077; average amount of deposits, $1,605,206.

The outstanding amount of coin certificates on the 1st of Oct., was $20,236,400, against $25,161,620 on the 1st of Sept., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,809,000, and retired $1,900,996 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during October, reached $5,208,560.

National Bank notes to the amount of $53,490 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,367,276, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,478,601, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,888,675. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,205,700; and for the public deposits, $38,112,258—making a total of $380,317,958. The Treasury Department last week redeemed and destroyed $365,500 of worn and mutilated fractional currency, and issued $544,673 of new. The outstanding amount of fractional currency on the 1st of October, was $32,933,614.

Government revenues have been on a reduced scale since our last. The excises, last week, yielded about 3½ millions; customs at the port of New York, $1,995,996, and at the outports about $650,000 (in coin) more, making the grand total income for the week equal to abou. $7,072,100 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $81,000,000.

Gold has declined from 134⅝ as the highest rate to 132⅞ as the lowest price of the week, on a more liberal offering and a less active call. The latest quotation on, Wednesday was 133⅛@133¼. The exports last week, were a little over a million thus far, this week, they have been less than half a million. Government has disbursed, through the local office, between nine and ten millions, on account of the November coin interest on the funded debt of the nation. Its aggregate disbursements, in the coin-interest form a part from the November claims, in October, were only $341,449.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,432,858, against $2,632,511 same time last year. The customs demand for Gold last week, averaged $332,666 a day; thus far, this week, it has been equal to $275,612 a day, or equal to a weekly aggregate of $1,653,672. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $239,903 and from California, $229,204. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $102,287,433, against $104,679,446 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $32,571,792, against $24,969,433 in 1867, showing an increase thus far in 1868, of $7,602,359. The exports of specie, from this port, last week, were $1,072,472, against $519,064 same week last year; total, since Jan. 1, 1868, $67,942,601, against $43,837,332 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $5,258,000; since Jan. 1, 1868, $69,069,547, against $51,816,681.

Government received $10,448,223 from customs at this port, in October, against $9,082,986 in October of last year.

Foreign Exchange has been quoted a trifle higher, on a moderate offering of bills. The demand, however, has been light as a rule. Bankers' prime sixty day bills on London closed on Wednesday at 109¾@110, and on Paris to 5.18¾c. @5.13¾; sight bills on London to 110⅛@110⅜, and on Paris to 5.12½c.@5.11¼. The offering of produce bills has been up to a fair average this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,121,997, against $4,597,023, same week last year; total, since Jan. 1, 1868, $138,621,082, against $156,808,171 in 1867.

Government securities have fluctuated more than usual, under the conditions and influences of the Money Market. Business in them has been on a restricted scale, and the closing dealings on Wednesday were at about the lowest figures of the week, the market having been decidedly heavy and irregular, the Money pinch operating very sharply against ruling values.

U. S. sixes of 1881 closed here on Wednesday at 115¼@115½; U. S. Five-twenties of 1862, (ex Nov. coupons) 108¾@108⅛; U. S. Five twenties of 1864 at 107⅜@107⅝; U. S. Five-twenties of 1865 at 107⅝@107¼; U.S. Five-twenties of 1865, consolidated, 110@110¼; U. S. Five-twenties of 1867, 109⅞@110; U. S. Five-twenties of 1868. 110¼@110½; U. S. Ten-forties at 105¾@106; U. S. Six per cent. currency bonds, 98@98½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 21.	Oct. 28.	Nov. 4.
Consols	94¾	94¾	94⅜
U.S. 5-20's of 1862	72⅞	73⅜	74⅞
Erie	31¼	28½	28
Ill. Central	96½	97¼	97¼

Despite the extraordinary stringency in Money, and the efforts of the *bear* operators to depress values, the railway and miscellaneous stock market has held its own remarkably well, on quite a brisk business, closing with considerable firmness on Wednesday.

There has been a lighter movement in domestic produce since our last, and there have been wider fluctuations in prices, the tendency at the close having been mainly in favor of purchasers. Middling upland cotton closed heavily on Wednesday at 25¼@25½ cents per lb. The stock of cotton now here is estimated at about 22,000 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 305,000 bales, against 176,000 bales same time last year; exports, same time 102,000 bales, against 51,000 bales same time last year; stock on hand at latest dates, 139,000 bales, against 118,500 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 18,871 pkgs., against 10,128 pkgs., same time last year. At the Live Stock market, this week, Beeves have been moderately dealt in at from 8@16c. per lb.; week's receipts, 6,064. Veal calves have been slow of sale generally at from 6@13c. per lb.; receipts, 1,574. Sheep and lambs in restricted demand, at 3½@6¼c., and 4½@6½c. respectively; per lb., receipts, 38,404. Swine dull and lower, closing 7⅛@8c. per lb., all live weight; receipts, 35,084.

The dealings in foreign merchandise have been on a moderate scale at irregular prices. The total imports of foreign dry goods, last week, were $1,073,811, and the total amount marketed $1,003,194. The value of foreign merchandise imported last week, was $2,537,852—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,611,663, against $3,497,014 same week last year; from Jan. 1, 1868, $217,729,178, against $222,086,333 same time in 1867. Freight have been moderately active, at somewhat irregular figures. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. by steamer, per bbl.; grain at 7@7¼d. by sail, and 7½d. by steamer, per bushel; cotton at ¼@$\frac{5}{16}$d. by sail, and ⅜@½d. by steamer, per lb.; and heavy goods 20s.@30s. by sail, and 25s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 576.

The New York exports, exclusive of specie, for the week ending Nov. 3, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,597,023	$3,121,997
Prev. reported	152,211,148	135,499,085
Since January 1	$156,808,171	$138,621,082

The imports for the week ending October 31, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,013,957	$1,073,811
Gen. merchandise	2,483,057	2,537,852
Total for the week	$3,497,014	$3,611,663
Previously reported	206,227,144	208,055,771
Since January 1	$209,724,158	$211,666,434

The balance in the Sub-Treasury on Wednesday was $82,832,211 34.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 18@18; George's Creek Coal, 58@70; Santa Clara, 1.50@3.00; Atlantic Coal, 2.70@2.90.

☞ Six Per Cent. Gold Interest, Principal also Repayable in Coin.—First Mortgage Bonds, based upon the valuable franchises, grants, railroad, equipment, &c., of the Central Pacific Railroad Company, now nearly completed, and forming one of the most assured and productive lines of traffic in the world. The way traffic alone is large and remunerative, independently of the immense through business soon to follow.

A portion of this loan is offered to investors at 103 per cent., and accrued interest, in currency. The bonds have semi-annual gold coupons attached, payable January and July, in New York city.

Information, &c., to be had of

FISK & HATCH,

Bankers, &c., 5 Nassau street, N. Y.

Norway Iron Co.

The Wheeling *Intelligencer* says that the Norway Iron Manufacturing Company have undertaken a contract to furnish the wrought iron work for the St. Charles bridge over the Missouri river, to be erected by the North Missouri Railroad Company, and of which the well-known C. Shaler Smith, of Baltimore, is civil engineer. The cost of the required material will not vary greatly from $100,000, and the company hope to complete the contract within three or four weeks. The rolling department of the Norway Company is running night and day.

☞ Seven per cent. interest in gold.—The First Mortgage Seven per Cent. Sinking Fund Bonds of the Rockford, Rock Island and St. Louis Railroad Company, pay both Principal and Interest in GOLD COIN, Free of Government Tax.

Each Bond is for $1000 or $200 Sterling, and is convertible into stock at the option of the holder. The coupons are payable Feb. 1st and Aug. 1st, in New York or London, at the option of the holder.

The Road runs from Rockford in Northern Illinois to St. Louis, a distance including tracks to Coal Mines, &c., of about 400 miles, and traverses the finest district of Illinois.

The Bonds have 50 years to run, and are a lien of $21,000 per mile upon the Company's railroad franchises, its coal lands—of which it has 20,000 acres containing A HUNDRED MILLION TONS OF COAL—its rolling stock, and property of every sort.

A Subscription of $8,800,000, at par, to the Capital Stock of the Company, furnishes a large part of the means required to construct and equip the road.

Nearly half the entire length of the road is graded and substantially ready for the iron; the rails are now arriving upon the line. The first division, giving an outlet to the coal, will be in operation in 60 days, and track-laying will from this time be prosecuted with the utmost energy till the last rail is in position. The Company intend to have the whole road in readiness for the Autumn business of 1869.

The Bonds are for sale at 97½ and accrued interest in currency, and may be obtained through bankers and brokers throughout the country, or at the office of the Company, 12 WALL STREET, New York.

Governments and other securities received in exchange at market rates.

The Trustees for the Bondholders is the UNION TRUST COMPANY of New York.

Pamphlets giving full information sent on application.

H. H. BOODY, Treasurer.

☞ The work on the Queen Anne's Railroad is progressing rapidly, and the whole road graded, except about eight miles. As soon as the Delaware Branch is built from Townsend to Massey's Cross roads, the contractor, Mr. Stearns, will commence laying the track. Iron for the branch is now being delivered at Townsends.

☞ Joshua Motter, Esq., has been elected President of the Emmettsburg Railroad Company, and Edward McIntyre Secretary. The directors decided to use the utmost dispatch, and claim that with such assistance as they expect, passenger trains will be run to the town by the 15th of June next.

☞ The September product of the South Pewabic Copper Mine was 102 tons, 907 lbs.; Huron 90 tons, 186 lbs.; Shelden Columbian, 31 tons, 785 lbs.; Grand Portage, 12 tons, 1,057 lbs.; Quincy, 75 tons, 1,340 lbs.; Franklin, 81 tons, 1,741 lbs.; Phœnix, 40 tons; Copper Falls, 62 tons; National, 28 tons, 1,543 lbs.

☞ The Newtown *Gazette* says that nearly half a mile of the Worcester and Somerset Railroad is ready to receive the ties, and that they contemplate having the whole road graded by Christmas.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of October, were:

☞ A correspondent of the St. Paul *Dispatch*, writing from Superior Wis., says that the charter of the Superior and State Line Railroad has been sold for $3,250. Mr. James Stinson, the largest property holder in and about Superior, is the leading purchaser. The work is to be commenced at the lake, and driven with sufficient force so as meet the St. Paul and Superior Road at or near Twin Lake by the time that road shall be finished to that point.

Journal of Railroad Law.

LIABILITY OF COMMON CARRIERS FOR BAGGAGE—LOSS OF VALISE BY PASSENGER—WHAT CONSTITUTES DELIVERY TO A BAGGAGE MASTER.

The facts in the recent case of Benjamin F. Mudgett *vs.* The Bay State Steamboat Company just decided are as follows:
